# Goals of Research4Life Programs

- To connect developing world researchers with the international scientific community
- To reduce the 'publishing gap' and improve the quality of locally produced articles and journals
- Ultimately – improve health, food security and environment in relation to millennium development goals that were developed in 2000

# Primary Target Audiences

- Eligible categories of institutions are Not-for-profit Entities and Development Agencies, E.G.:
  - National universities
  - Professional schools (medicine, nursing, pharmacy, public health, dentistry)
  - Research institutes
  - Teaching hospitals
  - Government: ministries and agencies
  - National medical libraries
  - Locally based non-governmental organizations (NGOs)

# Who is eligible for Research4life Programs (01 2016)

1. Countries, areas, or territories with a total GNI above us\$ 1 trillion are not eligible for research4life regardless of other factors
2. Core offer group A - Free access all countries, areas, or territories fulfilling any of the below criteria:
  - A. Un least developed country list and/or
  - B. Human Development Index (HDI) is at or less than 0.50 and/or
  - C. Total Gross National Income (GNI) is at or less than US\$ 150 billion where:
    - HDI is at or less than 0.63 and/or
    - Gross national income per capita (GNIPC) is at or less than US\$ 1600

### 3. Core offer group B - fee access :

A. Total GNI is at or less than US\$ 1 billion and/or

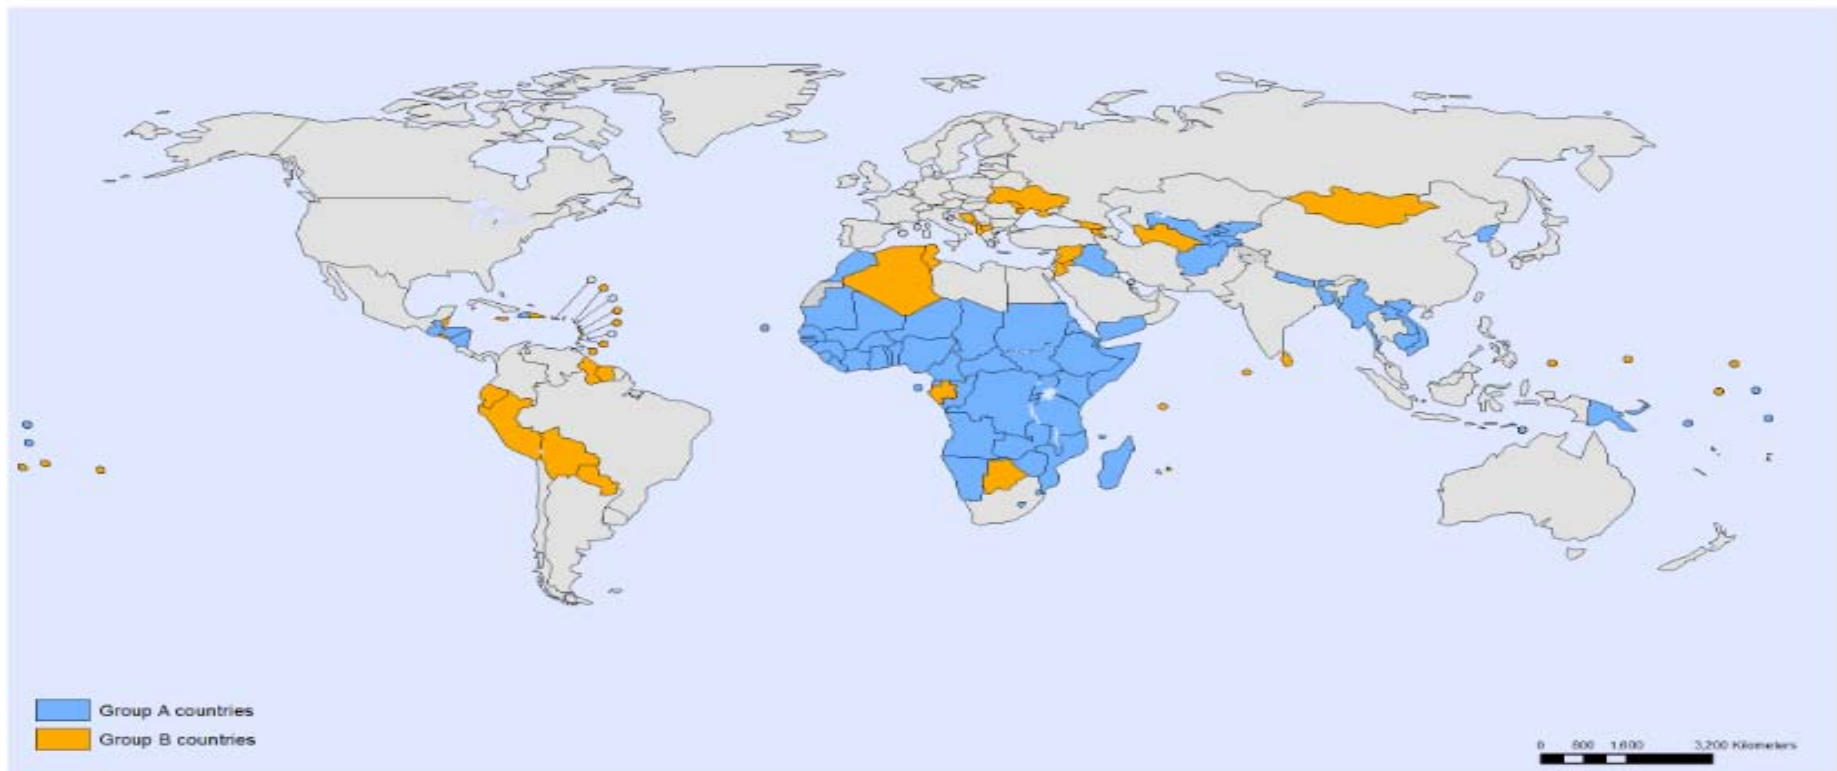

B. Total GNI is at or less than US\$ 20 billion where GNIPC is at or less than US\$10,000 and/or

C. Total GNI is at or less than US\$ 180 billion where:

- HDI is at or less than 0.67 and/or
- GNIPC is at or less than US\$ 5000

# Eligibility by Country

Countries, areas and territories eligible for Research4Life

The boundaries and names shown and the designations used on this map do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

# HINARI

## (HINARI Access to Research Initiative)

- Online portal to access information on health and related social sciences
- Launched in Jan 2002
- Led by WHO and Yale University
- Currently, more than 5700 registered institutions
- 500 publishers offering up to 15,000 journals / 47,000 books / 100 other information resources / 500 publishers' content included in more than 30 different languages [January 2016]

### HINARI Access to Research in Health Programme

HINARI Programme set up by WHO together with major publishers, enables low- and middle- income countries to gain access to one of the world's largest collections of biomedical and health literature. Up to 15,000 journals (in 30 different languages), up to 47,000 e-books, up to 100 other information resources are now available to health institutions in more than 100 countries, areas and territories benefiting many thousands of health workers and researchers, and in turn, contributing to improve world health.

Access to Global Online Research in Agriculture (AGORA) is a programme to provide free or low cost access to major scientific journals in agriculture and related biological, environmental and social sciences to public institutions in developing countries. Launched in October 2003, AGORA provides access to more than 3000 journals from the world's leading academic publishers.

Led by the Food and Agriculture Organization of the United Nations, the goal of AGORA is to improve the quality and effectiveness of agricultural research, education and training in low-income countries, and in turn, to improve food security. Through AGORA, researchers, policy-makers, educators, students, technical workers and extension specialists have access to high-quality, relevant and timely agricultural information via the Internet. AGORA is one of the four programmes that make up Research4Life.

## ARDI – Research for Innovation

The Access to Research for Development and Innovation (ARDI) program is coordinated by WIPO together with its partners in the publishing industry with the aim to increase the availability of scientific and technical information in developing countries.

By improving access to scholarly literature from diverse fields of science and technology, ARDI seeks to:

- reinforce the capacity of developing countries to participate in the global knowledge economy; and
- support researchers in developing countries in creating and developing new solutions to technical challenges faced on a local and global level.

Currently, 17 publishers provide access to around 20,000 journals, books, and reference works for 117 developing countries and territories through ARDI.

# Research4life Resources Usage: Do Share

## INSTITUTION'S R4L USERNAMES AND PASSWORDS WITH:

- Authorized Users: An Institution's Employee, Permanent Or Visiting Faculty Or Student
- Walk-in Users: Anyone Who Comes To The Institution's Premises And Is Permitted By The Institution To Access Services There

NOTE: ACCESS FROM REMOTE ACCESS IS PERMISSIBLE BUT LIMITED TO COMPUTERS OWNED PERSONALLY BY EMPLOYEES OR BY INSTITUTION

# Abuse of Privileges: Do Not

- Share usernames and passwords with those from outside the institution
- Supply documents to individuals or organizations outside the registered institution
- Charge a fee for supplying documents except to recover cost of printing
- Use R4L Programs when outside the country

# Do Not (continued)

- Upload or post the material to a publicly available website or elsewhere
- Post usernames and passwords to websites or blogs that are publically accessible

NOTE: Violations result in the institution or possibly entire country denied access until the problem is resolved. If your institution's password does not work for several days, it may have been compromised. Do not register again. Report this each of the programs helpdesks
