The taxonomy has been developed by the European Union Intellectual Property Office (EUIPO) and national offices of the European Union with the collaboration of WIPO. Although based on the Nice Classification, it does not form part of the Classification. The taxonomy does not have any legal effect in trade mark examination or in the comparison of goods and services. This is without prejudice to the possibility of using the taxonomy as an administrative tool in the specification of goods and services on a voluntary basis.

WIPO Madrid G&S Manager (MGS)

■ Background of Introducing the MGS:

- Free online tool provided by the International Bureau (IB) of WIPO to support users in compiling a list of designated goods and services (G&S) for their international applications
- Applicants are able to check whether indications of G&S are acceptable at the IB and IP offices in designated Contracting Parties (dCPs) before filing

■ Major Functions:

Applicants can:

- Check whether indications are subject to receiving irregularity notices
- Check whether indications are acceptable at 29 dCPs
- View and search for standardized indications acceptable at WIPO
- View translations in 18 languages of indications (as of January 2017)

WIPO Madrid G&S Manager (MGS)

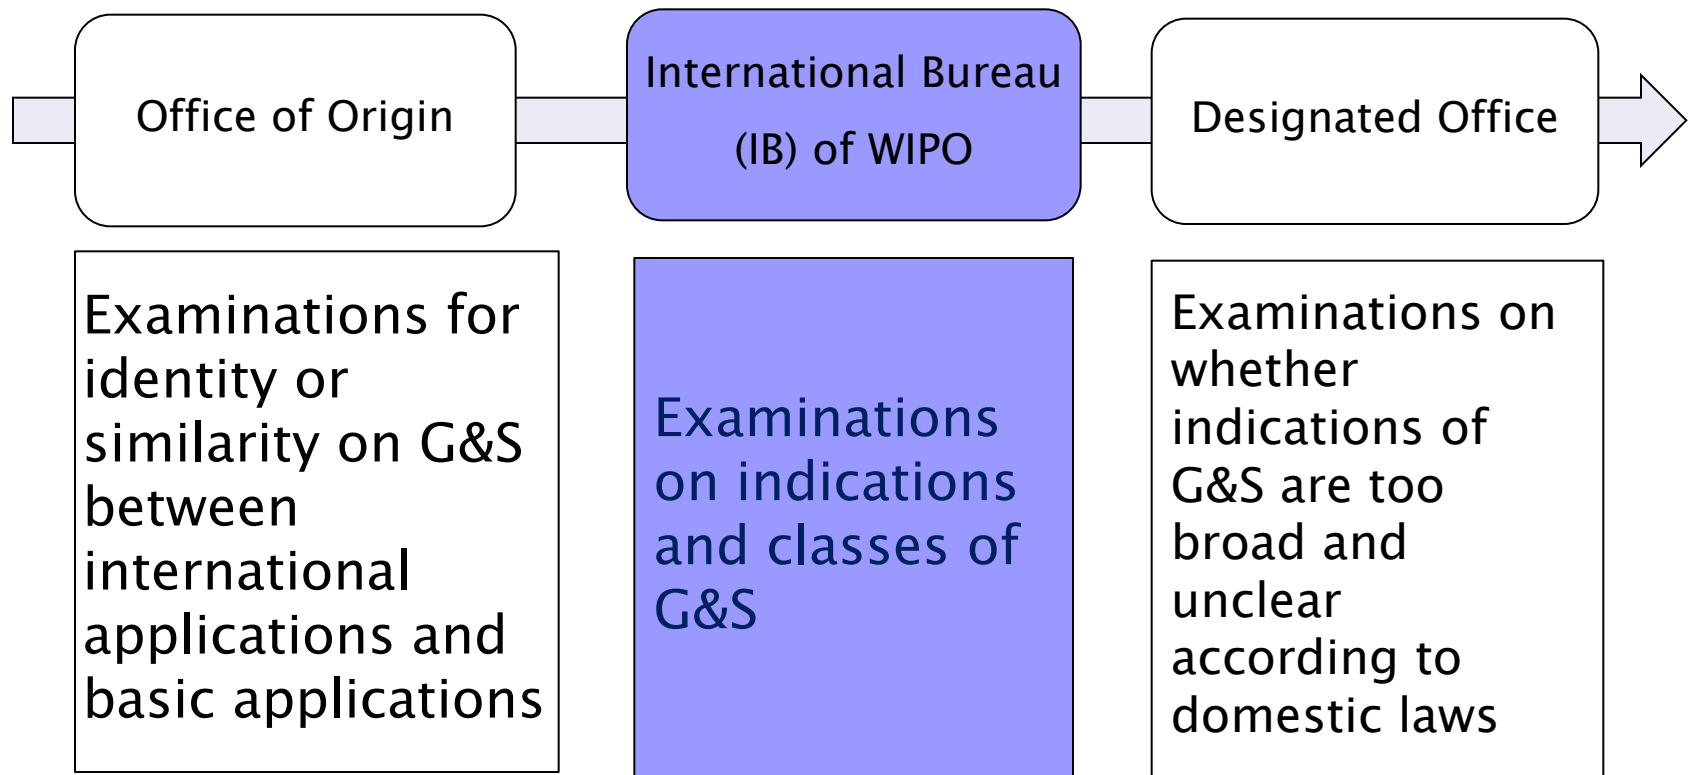

■ Notes for Using MGS

- When applicants specify indications that are contained in the MGS, the indications and classes are acceptable by WIPO.*
- If indications are not in the MGS, the IB will conduct examinations about acceptability.
- The MGS contains indications which the IB recommends.
- There are still quite a few indications that are not acceptable in some dCPs.

* Basically, WIPO reviews and revises indications to be included in the MGS on an as-needed basis, in order to more accurately and appropriately reflect indications and classes of G&S. However, they are not exhaustive. WIPO changes indications and classes of G&S when necessary.
