Dear Mr. Jean-Paul Hoebreck

In reply to your report of the Twenty-Second Session of the Preparatory Working Group (CLIM/GTP/22/5) of April 12, 2002 I have pleasure in sending you herewith the Japanese new proposals for changes to the eighth edition of the Nice Classification.

I have enclosed the Japanese Proposal List.

#### Japanese Proposal

Prop No .	Class	Indication	Remarks/Observations	
) )	5	Dental bleaching gels for medical purposes	New indication	
	İ			

#### Justification for a new indication

US-1-004 (dental bleaching gels) is adopted in Class 3. However, for the purpose of clearly separating this product and the product for medical use used by dentists, we propose changing the indication "dental bleaching gels" to the above indication.

#### Japanese Proposal

Category 3

Prop. No	Class	Proposal	Remarks/Observations
BX-1-006	3	Change" Neutralizing odors on clothing or textiles (Preparations for-)" to "Neutralizing odors on clothing or textiles for laundry use (Preparations for-)"	
US-1-004	3	Change "Dental bleaching gels" to "Dental bleaching gels, not for medical purposes"	c.f New Japanese indication

#### Justification of transfer

#### 1. Reason for proposal (BX-1-006)

BX-1-006 (Neutralizing odors on clothing or textiles) is adopted in Class 3. However, there are many types of neutralizing odors. In accordance with the explanatory note to Class 5 (sanitary preparation for personal hygiene, other than toiletries; and deodorants other than for personal use;), products other than those for laundry use are thought of as contained in Class 5. To prevent confusion with Class 5 we propose amendment to the general explanatory note of Class 3 to the effect that it contains the expression "for laundry use."

2.Reason for proposal (US-1-004)
Please refer to the new Japanese proposal.

Dear Jean-Paul

PREPARATORY WORKING GROUP: TWENTY-THIRD SESSION GENEVA, MARCH 31 TO APRIL 4, 2003

I have pleasure in enclosing proposals to revise the 8th edition of the International Classification, to be discussed at the 23th meeting of the Preparatory Working Group, due to next meet on March 31th, 2003.

I have restricted the United Kingdom proposals to two items which have been causing our office problems and if any further explanation is required, please let me know.

Yours sincerely

#### 23<sup>rd</sup> MEETING OF THE PREPARATORY WORKING GROUP Changes in the text to the Explanatory Notes

#### Proposal to modify part of the text of the explanatory notes of Class 35

The following explanatory notes appear in the 8th edition of the International Classification under Class 35:

#### Includes, in particular:

- the bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods;

#### Does not include, in particular:

 activity of an enterprise the primary function of which is the sale of goods, i.e. of a socalled commercial enterprise;

#### Reason for modification of the text

The origins of "the bringing together etc" are well known: this phrase was added to the 7<sup>th</sup> edition in 1997 in order to reflect that retailing as a service is in Class 35. The note which excludes activities of an enterprise whose primary function is the sale of goods first appeared in 1983 and is intended to serve as a warning that the sale of goods cannot be a service. Neither of these explanatory notes are clear. For example, the "bringing together etc" does not mention retailing at all and needs to be expanded in order to put these activities into context. Furthermore, the reference under "Does not include, in particular" to "a so-called commercial enterprise" is not capable of clear definition and may include within its scope such enterprises as retail stores whose primary function is to bring together goods for the purpose of sales. Both explanatory notes cause problems because the users of the International Classification find them difficult to interpret and they appear contradictory. It is therefore proposed that these notes should be modified as follows:

#### Includes, in particular:

the bringing together, for the benefit of others, of a variety of goods (excluding the transport thereof), enabling customers to conveniently view and purchase those goods; such services may be provided by retail stores, through mail order catalogues or by means of electronic media, e.g. through web sites or television shopping programmes.

#### Does not include, in particular:

goods: although this class includes the services of enterprises whose primary function is to facilitate the sale of products. Class 35 is a service class and therefore cannot include any goods (consult the alphabetical list of goods).

#### 23rd MEETING OF THE PREPARATORY WORKING GROUP

#### Existing indications to be deleted

CI.	SERIAL No. (E)	INDICATION OF SERVICES (English version)	BASIC No.	INDICATION OF SERVICES (French version)	SERIAL No.(F)
37	V 0013	Vehicle service stations	370083	stations-service	S 0038

#### Reason for deletion:

The term "service station" is defined as "an establishment beside a road selling petrol and oil and typically having the facilities to carry out maintenance". In the context of Class 37 this item cannot include the sale of goods and therefore the only service which is within its scope is the maintenance of vehicles. The present entry causes considerable confusion and since there is already in the International Classification an existing entry for "vehicle maintenance" - V 0008 (Fr "véhicules (entretien de-) - V 0008), it is proposed that this item should be deleted.

## PROPROSALS BY THE UNITED STATES OF AMERICA FOR THE 23<sup>ND</sup> SESSION OF THE PREPARATORY WORKING GROUP

The following are proposals by the United States of America for consideration at the twenty-third session of the Preparatory Working Group for the Nice Agreement (March 31 – April 4, 2003)

Most of the U.S. proposals concern the classification of goods made from precious metals. The classification of such goods has caused confusion since some, but not all, goods that can be made of precious metal are specifically included in the alphabetical list for Class 14 of the Nice Agreement. However, the Nice Agreement is silent as to whether goods that are made of precious metal but are not specifically listed in Class 14 should also be classified in Class 14 or whether they should be classified in the class that is appropriate for the same goods when not made of precious metal. The proposals by the United States attempt to simplify this area of classification by making it clear that all goods that are made of precious metal are classified in the same class as are those goods when not made of precious metal. These proposals remove all specific goods from Class 14 that have been included in that Class in the alphabetical list when made of precious metal. Further, entries for those goods in classes other than Class 14 have had the language "not made of precious metal" deleted from their entries. Only items that are classified by their material compositions have been left in Class 14 and in corresponding classes of material composition. An example of such an item is statuettes. Statuettes are classified in Class 14 when they are made of precious metal. They are also classified in Class 6 when made of common metal, Class 21 when made of porcelain, terra-cotta or glass, Class 19 when made of stone, concrete or marble and Class 20 when made of wood, wax, plaster or plastic. Other goods that are presently in the alphabetical list and are treated in a similar manner are boxes [for general use], busts, figurines [statuettes], statues and works of art. These remain as they currently exist in the list.

Other than this extensive proposal, the other proposal made by the U.S. for the 23<sup>rd</sup> meeting of the Preparatory Working Group is the transfer of hosting computer sites [web sites] (420200) from Class 42 to Class 38. Hosting a computer site is a necessary service provided to entities who wish to have a site on the global computer network but do not have the resources to support a computer server of their own. Since the hosting of the site is the first step necessary in establishing a means of communication on the global communication network, it is more appropriate to classify this service in Class 38 than in Class 42.
