15.15 – 16.45   Roundtable Discussion (public agencies only)

16.45 – 17.00   Summing-up and Closing

<u>Issues</u>

- The proposed definition of a pirate site is: *an online location which deliberately infringes or facilitates the infringement of copyright, whether in its country of establishment or elsewhere.*

- What, if any, arrangements currently exist to prevent legitimate advertising from appearing on pirate web sites?

- In what form are existing lists of pirate web sites shared with stakeholders?

- What is the procedure for compiling the lists? Is any contact attempted with the operators of the site?

- Would there be interest in contributing data to the WIPO database?

- What governmental process would be required to secure the participation of the agency concerned?

- What would be a good name for the database? "Argus" is one suggestion.
