#### 1. INTRODUCTION

Each year, increasing number of trademark owners use the Madrid system to protect their trademarks abroad. Governed by the Madrid Agreement of 1891 and the Madrid Protocol (in operation since 1996), the Madrid system offers the possibility to obtain trademark protection in the countries of the Madrid Union by filing a single international application. To date, the Madrid Union has 84 members (see list at <a href="http://www.wipo.int/madrid/en">http://www.wipo.int/madrid/en</a>).

The seminar will be conducted by staff of the World Intellectual Property Organization (WIPO) and invited speakers. It aims at increasing awareness and practical knowledge of the system among actual and potential users, whether in industry or in private practice and focuses on the needs of independent and in-house trademark agents (paralegals as well as attorneys) who file applications for international registrations of trademarks and/or administer such registrations. All aspects of the international registration procedure and relevant administrative and legal questions will be dealt with in detail. In addition, ample time will be reserved for discussion and practical exercises.
