

Topic 3 WIPO Publish

Assessment and Deployment in the ARIPO Region WIPO's Experience

Dar es Salaam, August 26 to 30, 2019

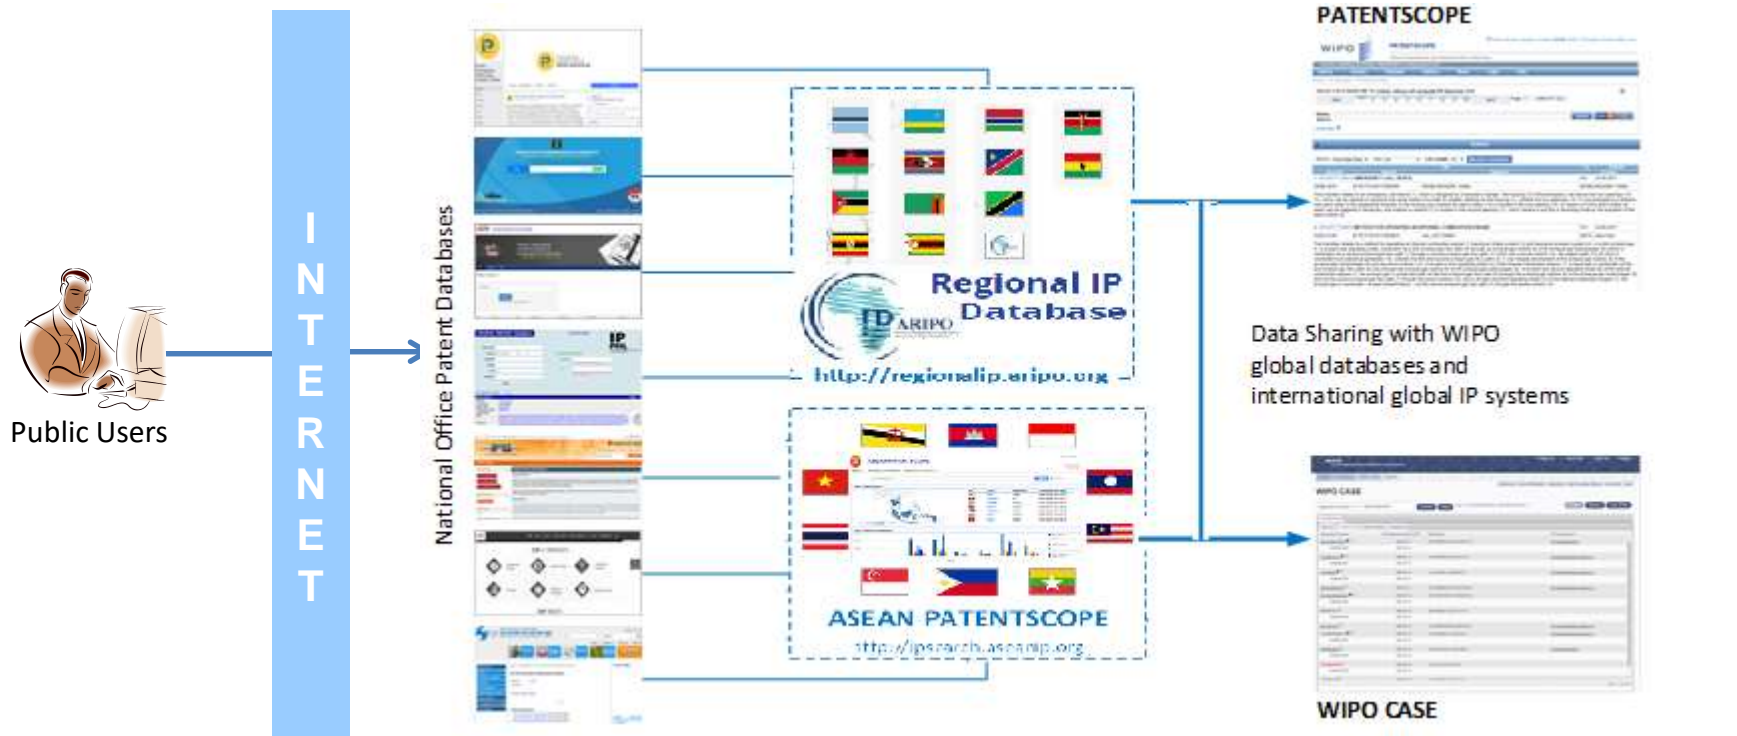

WIPO Industrial Property Business Solutions Division (IPOBSD)

Agenda

- What is WIPO Publish?
- Status of WIPO Publish deployments
- Deployment Checklist
- Payment Gateway
- Recommendations for successful deployments
- Questions and answers

WIPO Publish

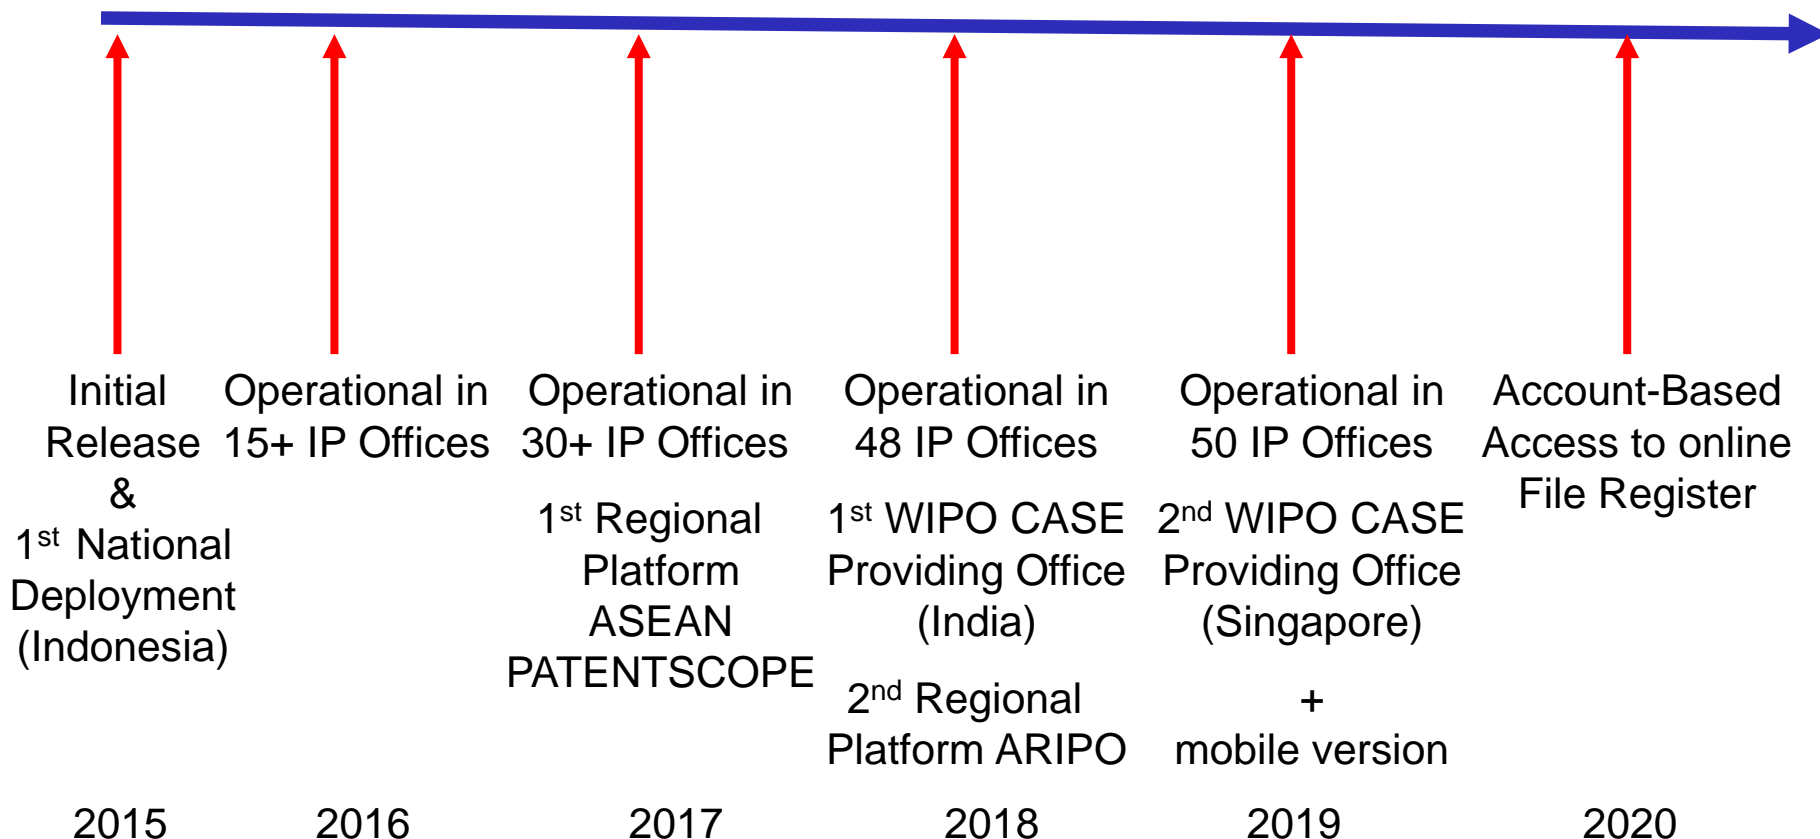

- A platform for the search and digital publication of industrial property data on the Internet for the local and international customers and stakeholders

Motivation

- Facilitate exchange of published data and documents with regional and international systems (including legal statuses and PCT National Phase Entry Information as per **Circular C.PCT 1487**)
- Help IP Offices to deliver better services to their stakeholders through online public search services and online file registers instead of traditional paper journal publications
- Minimize implementation and maintenance costs of data dissemination by IP Offices

Background and Milestones

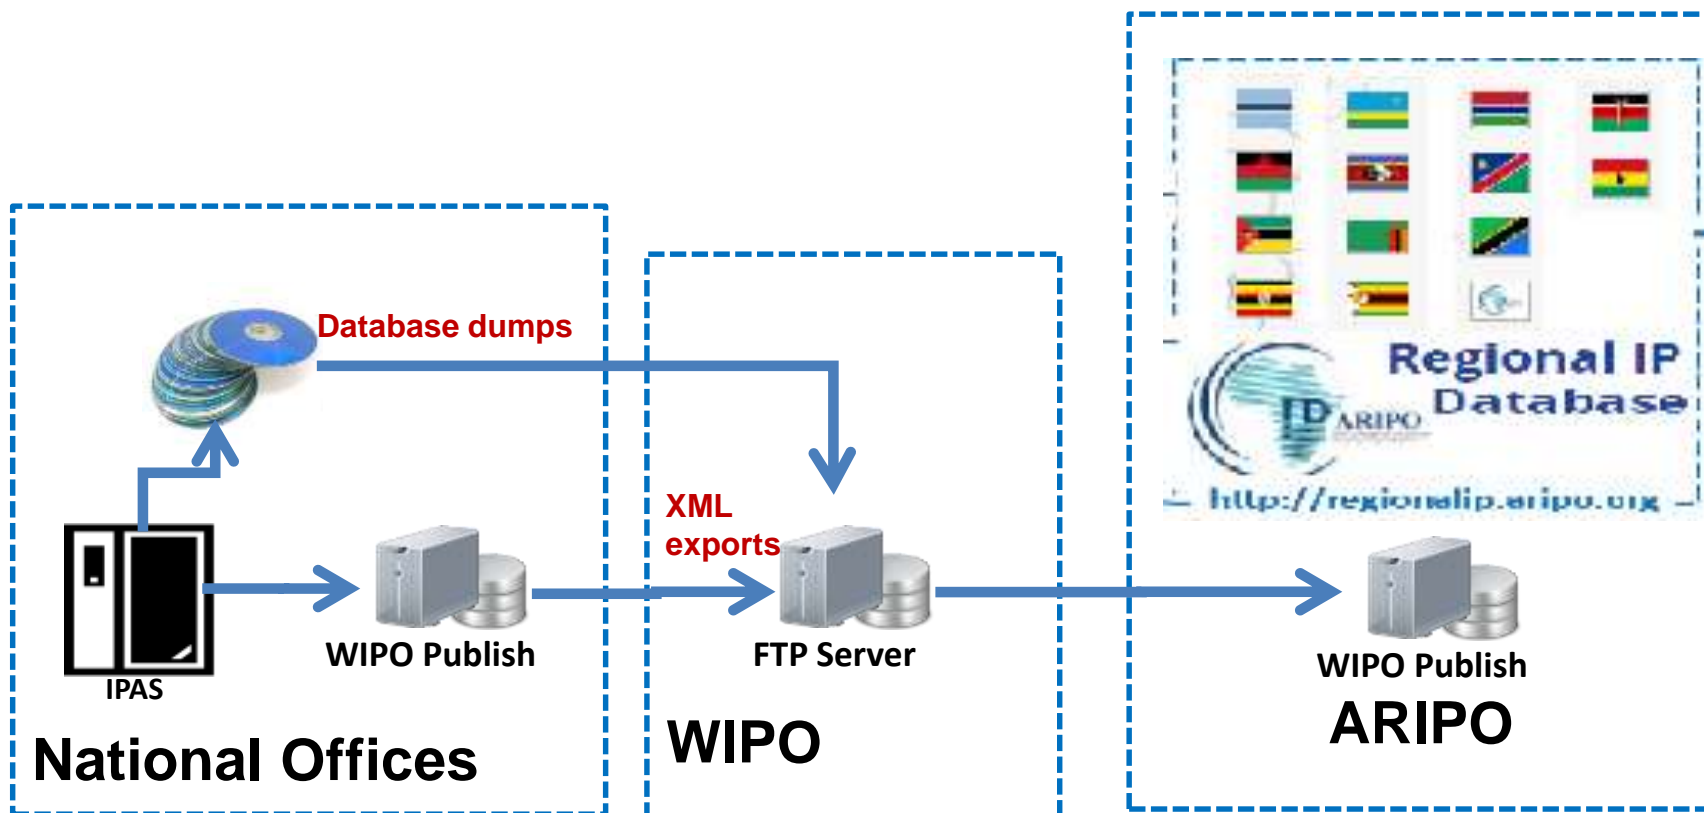

Deployments in ARIPO region

- ARIPO regional IP database has 14 national collections
- Collections of 14 Member State Offices, 7 local WIPO Publish platforms (Botswana, Ghana, Kenya, Malawi, Mozambique, Rwanda, Uganda)

Current Irregular Data Feed on Demand

Example of Data Quality Issues

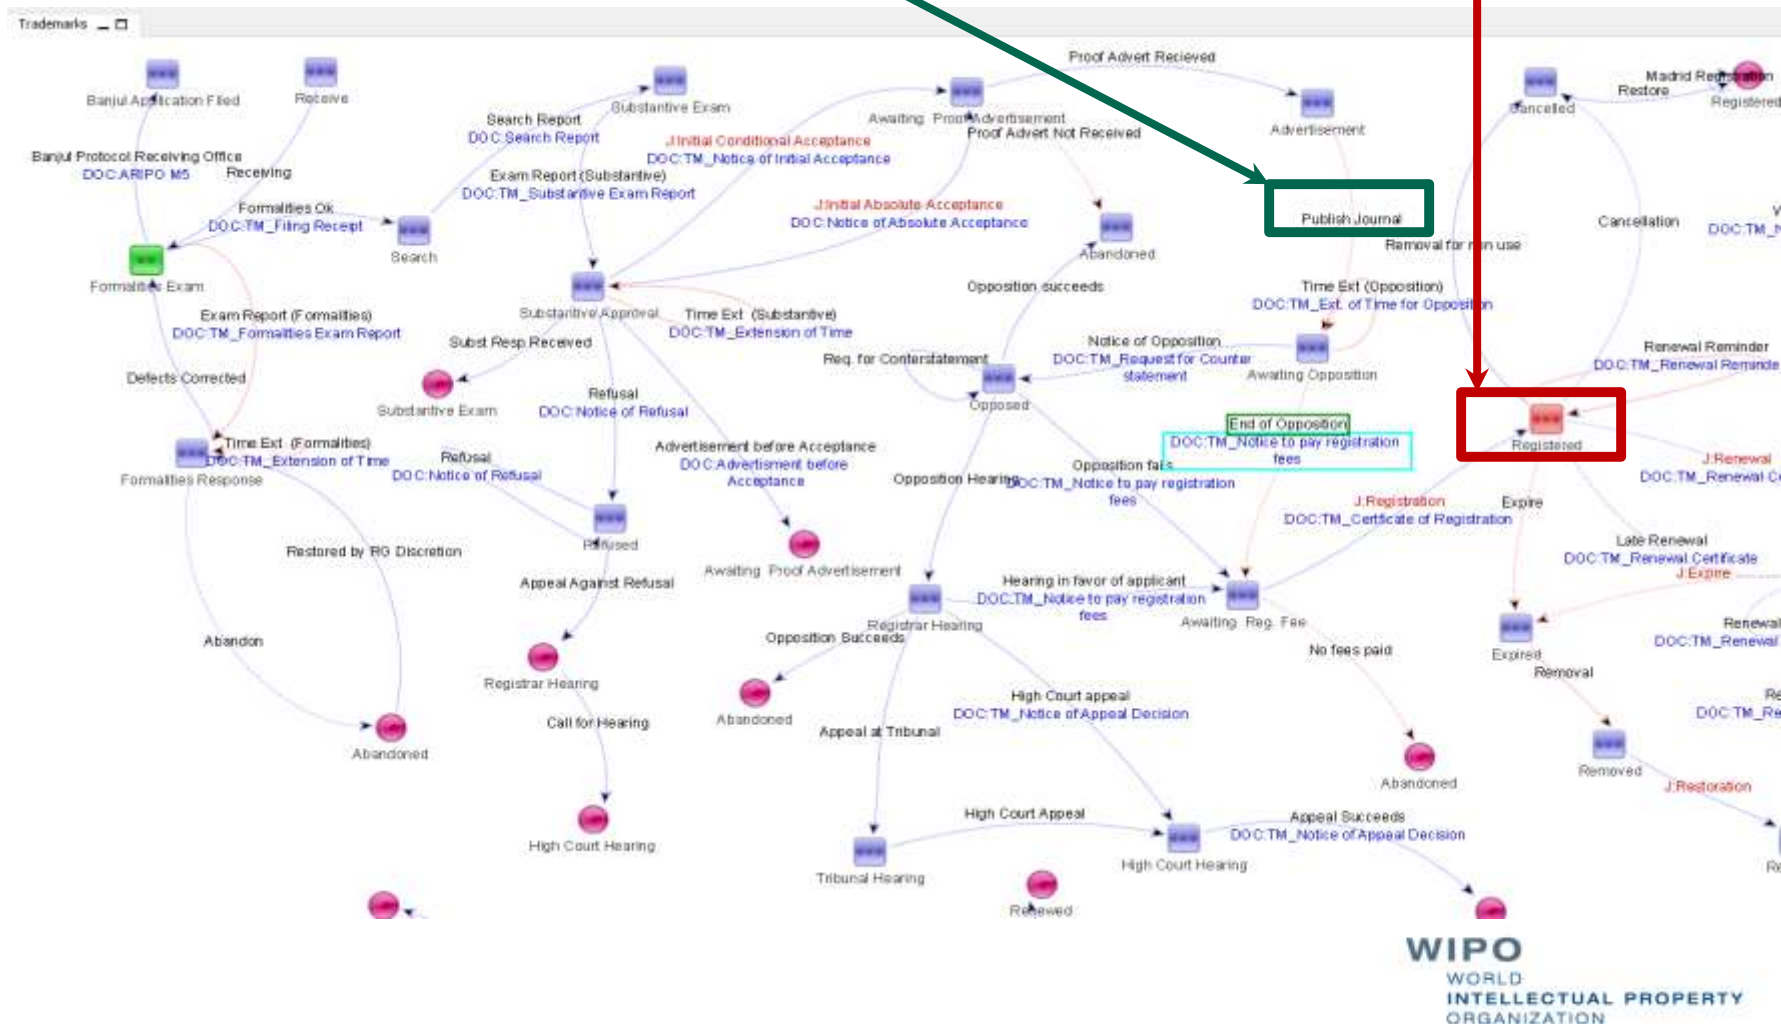

Trademark Collections	Available on ARIPO	Snapshot Sept. 2018	Incomplete registration details	Total Expected	Missing (%)
BOTSWANA	32581	46576	841	33422	2.52
ESWATINI	18785	40637	6359	25144	25.29
GAMBIA	7850	16757	6	7856	0.08
GHANA	27501	70762	15392	42893	35.88
KENYA	74940	130752	9841	84781	11.61
MALAWI	23124	33407	715	23839	3.00
MOZAMBIQUE	36728	31252	307	37035	0.83
NAMIBIA	54180	102428	16895	71075	23.77
ZIMBABWE	71235	95399	1454	72689	2.00
Total	346924	567970	51810	398734	12.99

Other Data Quality Issues

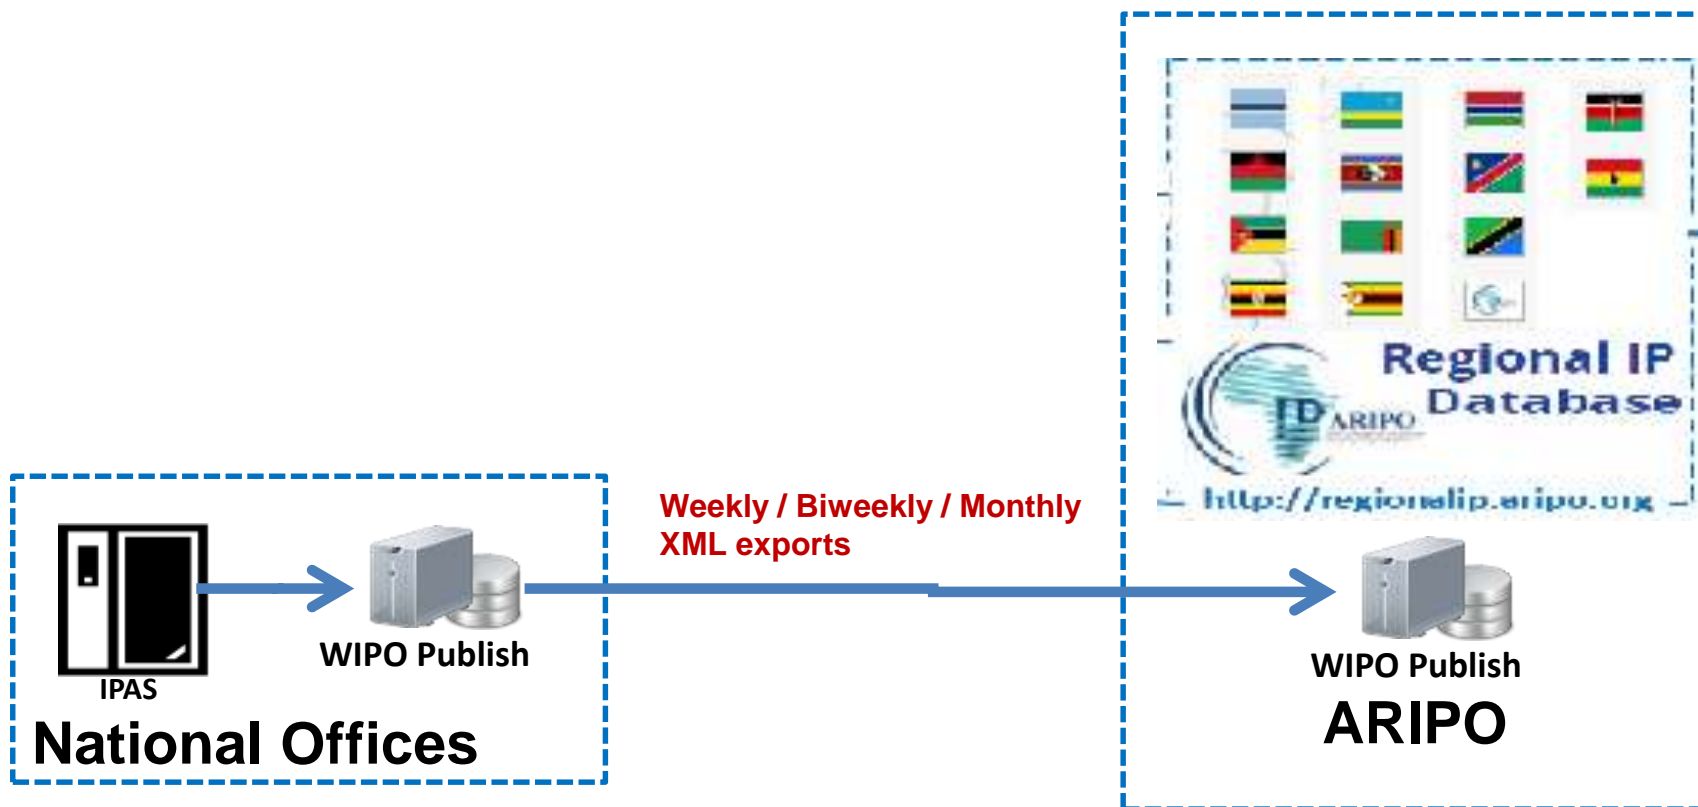

- Publication date
- Registration Date
- Registration Number
- Patent Priority details
- PCT application numbers
- Missing IPC
- Missing invention titles
- Missing invention abstracts

Criteria for Data Dissemination

- Official publications (future)
- Registrations (current)

Future Fully Automated Data Feed

Support Strategy for ARIPO IP Database

- Introduce a new concept of Open for Public Inspection
- Criteria to update published applications
- Local infrastructures to host WIPO Publish when possible
- Additional ARIPO Member States when ready
- Possibility to assess ARIPO collection
- Agree on a regular data feed to ARIPO IP Database
