PCT data products

List of products available at: <https://www.wipo.int/patentscope/en/data/>

The screenshot shows the WIPO Patentscope website. At the top left is the WIPO logo (World Intellectual Property Organization). The top right navigation bar includes links for Media, Meetings, Contact Us, IP Portal, and English. Below this is a secondary navigation bar with links for IP Services, Policy, Cooperation, Resources, About IP, and About WIPO, along with a search bar labeled 'Search WIPO'. The breadcrumb trail reads: Home > Resources > PATENTSCOPE > Data Services. The main heading is 'PATENTSCOPE Data Products and Services'. Below the heading is a paragraph: 'Subscribe to our free and/or fee-based information products and services.' To the right of this paragraph is a grey box with a 'Note' stating that patent data from national and regional offices is not currently available from WIPO. Below the main text is an orange box with a 'Warning' about conditional use clauses and a link to 'general sale conditions'. At the bottom, there are three blue links: 'Subscription products for sale', 'PCT backfiles for sale', and 'Other products'. A dark blue button at the very bottom says 'Subscribe to PATENTSCOPE data products and services'.

Legacy version of GBD

In production since 2011

Difficult to maintain (written in plain javascript)

Single Page Application

Monolithic architecture using on-premises servers that does not scale easily

Less and less stable over the years due to the combination of:

- ⇒ A lot more records from more trademark offices (10 million records in 2013, now almost 73 million records from 71 offices)
- ⇒ A lot more usage in terms of unique users and traffic
- ⇒ Constant target of numerous robots on the internet trying to download large amounts of data in breach of terms and conditions

New version of GBD

To offer a better service to end users:

New look and feel to align with WIPO's corporate internet look and feel

New simpler graphical user interface

New scalable architecture deployed in the cloud (AWS):

Ready for more volume/collections

Better resilience to robotic attacks thanks to AWS WAF

Available at: <https://uat.branddb.wipo.int>

Since November last year

Reload after cleaning and new ST96 format : Japan

New national collections:

Indonesia, Montenegro, Bulgaria

How does it look like

QUICK SEARCH

[Use the legacy website instead](#)

Searching Trademark applications, appellations of origin, emblems and international non-proprietary names. Covering 52,623,622 records from 71 data sources. [Check our data coverage](#)

New version of GBD: timeline

What next?

Currently working on processing the TM collections of GB, RU and BR
(planned to be put in production during the parallel run)

Working on a new version of the Vienna Classification Assistant for version
9 of the classification

Investigating how Machine Learning can help trademark applicants choose the
best goods and services terms to file their trademarks through Madrid in
multiple jurisdictions

Questions/answers

Global Design Database update

IP Round Table 2022
Hybrid WIPO headquarters/online

2022-10-10

Christophe Mazenc

Since November last year

New national collections:

Indonesia, Israel, Bulgaria, Philippines

2023 objectives:

Start of development of new version of GDD (similar architecture and look and feel)

Implementation of a first Image Similarity Search engine for designs taking as inputs a set of images of the design to be searched (front view, rear view, top view, perspective view...)
