PATENTSCOPE TRAINING COURSE

Geneva, Switzerland, June 3 to 5, 2014

GENERAL INFORMATION

Prepared by the Secretariat

What is the training course about?

The PATENTSCOPE search service is the most up-to-date source for PCT applications and related documents. It currently also includes 29 patent collections from regional and national offices, in addition to the complete PCT collection, covering over 18.6 million documents.

The PATENTSCOPE search system offers different types of searches from beginner to expert level, as well as state-of-the art language and analysis tools.

Key search and analysis features include:

- Deep bibliographic indexing
- Keyword proximity search
- Keyword weighting
- Search term stemming
- Unlimited number of keywords
- Advanced Boolean and proximity operators
- On the fly “top 10” analysis (tables or chart)
- Sortable result list by relevance or publication date
- Keywords highlighting in results list as well as description and claims
- TAPTA for the translation of abstract and title of patent documents and
- CLIR which will not only translate your query into 11 languages but also finds synonyms of your query.

Who should attend the training?

The proposed training aims at increasing practical knowledge of the system among users. It will focus on the different search features of the PATENTSCOPE system and will contain many practical exercises (please bring your laptop, wifi will be available). The training will also cover other aspects of patents, such as the PCT system, patent landscapes, etc..

Who are the speakers?

The speakers of the training will be composed of a panel of experienced staff members of WIPO (IT developers, IPC specialists, etc.).
