

WIPO GREEN WEBINARS

March 15 & 16, 2022

All WIPO Member State IP Offices are cordially invited to webinars hosted by WIPO GREEN as part of our newest initiative: **IPO GREEN**. The IPO GREEN initiative supports IP Offices in all regions to enact policies and programs that advance green technology innovation.

During the webinars, we will present the findings of our recent research, and IP Offices will present examples of green programs. There will be ample time for discussion. We have organized similar webinars at different times to accommodate different time zones.
