INNOVATIONCENTERS, INCUBATORS, TECHNOLO GYPARKS

Dr.KariSipila,SeniorAdvisor,FoundationforFinnishInventions, Espoo,Finland

### INNOVATIONCENTERS, INCUBATORS, TECHNO LOGYPARKS

### INVENTIONS AND INNOV ATIONS ARE CORNERS TO NES

Inventions and innovations are in many countries the corners tones of successful competitive products and business reforms. The new ideas may come from the needs of markets from customers, from university research, from development work or "out of the blue".

Veryfewideasarereadyfromthestart -inventionsmustbedevelopedintomarketable products. During their early life, inventions must be taken care of, just like plants edlings, to allow the mtogrow and develop. Particularly in the ideation and develop ment phase, several projects should be underway simultaneously, because all of the mwill not be successful. After several phases, many inventions -but by no means all of the m-can be converted into finished products that are taken into production and marketed. The development phase requires plenty of creative effort, know -how and financial resources, for which outside expertise is usually needed.

Firstassistanceindeve lopinganideaintoaproductforbusinessisoftenreceivedfrom InnovationCenters(orInnovationFoundationsorsimilarinnovationsupportorganizations). Start-up orspin offcompaniesbegintheiractivitiesofteninincubators, which often are located in orare part of technology parks.

### **INNOVATIONCENTERS**

Inmanycountriesthegovernmenthasdecidedtosupportthedevelopmentworkof inventions. The support includes often in addition to advising and consultancy work also financial support to coverp art of the development costs of the invention. The organization al models vary. Often an Innovation Centeror Foundation is established. It may have offices in different parts of the country. Sometimes the work is made in a technology center or linked to a university. It may also be a part of some ministry or other governmental organization. It is also good if private organizations or funding possibilities are linked to the Innovation Center.

ThemaintasksoftheInnovationCenterorFoundationmayinclud e

- Promotionandcommunicationsofinnovativeactivities.
- Advisingandevaluation of inventions.
- Advisingandassistinginintellectualpropertyrights, mostly patenting.
- Assistingintheprojectmanagementandproductdevelopment, for instance in building prototypes.
- Advisinginmarketingandcommercializationoftheinnovativenewproducts.
- Financingpartlyorfullyofthepatenting,productdevelopmentandcommercialization costsofaninvention.

### TheworkoftheInnovationCentermayalsoinclude

- Advisingworkfortheestablishmentofnewenterprises.
- Incubatoractivities for start -upcompanies or co -operation with technology parks.
- Participationorco -operationwithventurecapitalactivities, especially in the early phase seed financing.
- Educational or training activities for inventors and entrepreneurs.
- International co-operation and business contacts.

#### STARTINGTHEINNOVAT IONCENTER

Thelegalform, financial resources and the size of the Innovation Centermay vary. The start of an Innovation Centermay be modest, first 2 — 4 persons and aboard representing the interest groups. The director and the staff should be experienced in patenting and other intellectual property rights as well as product development and marketing. Some legal expertise and officer out in es are also needed. The office should be equipped with modern information technology including Internet connections to data banks related to patenting and marketing. The possibility to finance invention development costs is recommended, becaus the nitis possible to get the inventions faster to the market.

Anyway, it is essential that it is a confidential service organization where inventors and entrepreneurs can get assistance in the field of innovations and that it is a cradle of new business opportunities and successful innovations. Another important principle is that an Innovation Centerneed stime and patience—the results will come slowly.

### INNOVATIONCENTERANDTHEDEVELOPMENT OF AN INNOVATION INTO A PRODUCT

InnovationCentersassi stinventors,innovatorsandentrepreneursinmanyways,when developingtheinventionsfromideatoamarketableproductusing,forexample,thefollowing phasesandmeans:

- Patent,technicalandmarketinginformationrelated to the invention is collected and the invention is evaluated.
- Theresultsoftheevaluationarereviewed.
- Theinventor/owneroftheinventionsubmitsapatentapplicationtothePatentOffice possiblywiththeassistanceofapatentagent,andtheappropriateinternationalpaten tingis dealtwithingoodtime.
- Aplanforimplementingtheprojectisdrawnup.
- Productdevelopment, further research or a prototype is produced for further evaluation, testing and for the commercialization.
- The characteristics of the invention are tested (acheck is made to see whether it meets, e.g., the quality and safety requirements set for the product) and new prototypes are made if necessary.
- Abusinessplanisdrawnupwiththefocusonthecommercializationoftheinvention (marketsurveys,marke tingmaterialetc.)aswellasonhumanandfinancialresources

e

- Theinventioncanbemanufacturedandmarketedeitherasthecurrentornewcompany's ownproductionoralicenseagreementonitscommercializationcanbeconcludedwitha companyinthesect or.
- Themarketingandmanufacturingoftheinnovative products tarts by different means to companies or other customers often first domestically and later on internationally.

Itisgoodtorememberthatexploitersandbuyersaregenerallymoreinterested in the competition situation and commercial possibilities or success than in the idea itself.

#### ADVICEANDEVALUATIO NOFINVENTIONS

AnInnovationCentermustpossessconsiderableexpertiseinadvisingonmattersrelatingto theevaluationanddevelopment ofinventions, theirpatenting and related strategy as well as in marketing. As far as possible within resources, the Centeral sooffers general advice by telephone. The most common questions The Innovation Center is asked are

- Ihaveaninvention, isitaninvention?
- WhatisapatentandhowdoIgetit?
- · Whataretheinventiondevelopmentphasesandcosts?
- · HowandfromwherecanIgetfinancing?
- Canyouhelpmeinmarketing?
- Howmuchdolearn.willIbecomeamillionaire?

There are some general principle stoin ventors, who think they have made a feasible invention:

- Donotpresentyourinventionpublicly(atfairs,inthemedia,inarticles)beforethepatent application. This is very important is sue especially for researchers.
- Assesstheadvantages,topi calityandmarket -worthinessoftheinvention:whatproblem doestheinventionresolve,howcanitbemadeintoaproductandwhoneedsit.
- Investigatenoveltyandpatentability.
- Evaluatethetechnicalsolution, effectiveness, economicalness, costs and fun manufacturability compared to competitors on the market.
- Determine the ownership of your invention.
- Approachadvisory, assessment and financing organizations at a suitable stage (the Innovation Center).

Atthisstagealready, the inventor should make a full check - list and plan for his invention: customers, requirement, technical development stage, novel ty and patent situation, funding, manufacture, who would be responsible for directing the project, sales, the potential for an employment-related invention, description of productide and presentation material. A business plans hould be made already in an early phase and updated during the development of the project.

Itisagoodtorememberthatfinanciersoftenassesstheinventor's personalcha ncesofturning anideaintoaproductforthemarket. The way in which theideais presented is also very important.

Agoodidea,inventionorinnovationandrelatedproductsmayberecognizedinadvanceby thefollowingearmarks,whichusuallyarethem ainevaluationcriteriaofaninventiontobe developedandeventuallyfinanced.

- Theproductismarketdriven; it is indemand.
- Theproductisinventive, novel, and patentable.
- The productissignificant to the business and to employment.
- The productisf unctional, capable of being produced and economical.
- Theproducthasasuitableleveloftechnology.
- Theproductcanbelaunchedquickly.
- Thereispersonalororganizationalcommitmentbehindthedevelopmentprojectandthe product.
- Investorsareintereste dintheventure.

Itisimportanttofindoutthegoodandpromisinginventionsalreadyintheearlyphaseand financetheirdevelopment. Onlythegoodinventions will get more public or private funding or investments lateron.

The evaluation of themar ketpotential is a key factor during the entire product development phase. As the process approaches the commercialization phase, the focus shifts to marketing and commercialization tasks.

The Center can also consultouts ide experts for evaluating invential on proposals. The experts are primarily from universities and research institutions, and abide by the confidentiality, which must be principle of the Innovation Center.

TheInnovationCenterprovidesexpertassistancefortheprotectionofinventions,usu allyby meansofpatenting.

Intheproductdevelopmentphasetheideaorinventionismadeconcretebydesignandby makingaprototypeandtestingandimprovingit. Theworkisdoneinaprototypeworkshop, which can be part of the Innovation Center. It produces observation models and develops, builds and test sprototypes. The plansare made confidentially incollaboration with the inventor. The prototypes and their testing can also be commissioned elsewhere, for example, a tinstitutes of technology, uni versities or private confidential workshops.

### MARKETINGANDCOMMER CIALIZATION

The Innovation Center provides as sistance in the marketing and licensing of inventions.

Theindustrialandcommercialimplementationofinventionprojectsispromoted by the various methods of marketing and marketing communication. New products or inventions after a patent application are presented to entre preneurs by means of direct marketing or at innovation or sector fairs and other business events or via the various media. The Center can also have printed lists of market able inventions or Internet can be used.

The Center can also help the inventor withest ablishing links and with contract ualissues with both domestic and foreign businesses. In the Innovation Centerislo cated near a university, it can also take care of the university's technology transfer activities or commercialization of university inventions. - operate with the

The customers of the Center can obtain contractual and legal assistance in a texploiting an invention, for instance by using a license agreement.

### FINANCINGOPPORTUNIT IES

The patenting and development of inventions into marketable products may be expensive. That is why it is recommended that an Innovation Cente rean provide support funding to inventors.

Supportfundingisgenerally used for paying the costs of

- Patenting
- Productdevelopment
- Prototypes
- Commercialization and
- · Legalmatters.

Thefundingmaybeinaformofgrant, supportfunding, loanorguarante e. In a subsidized risk financing model a conditional refund to the Center depends on the success of the project and on the revenue received from it by the recipient. If the invention fails to be exploited economically, the recipient of the support funding is undernoobligation to refund the support money to the Center.

#### **COMMUNICATIONS**

The Innovation Centershould be active in the field of communications and other innovation promotion activities like invention contests and awards. It is essential to have a vailable leaflets and book lets related to patenting and other phases of the invention development process. Internet -contacts are important. Information of innovation activities and successful projects are often interesting to different audiences, including students, as well as to press, tv and radio.

### **EXPERIENCESOFINNOVATIVEACTIVITIES**

Theexperiencesofadvisoryandsupportservicesforinventorsfrommanycountrieshave beenpositive:theseservicesincludetheexploitationofintellectualproperty rightsandthe provisionoffundingforthefirststagesoftheinventionprocess,i.e.theinitialevaluation costs,patentingandproductdevelopment,andfurtheron,promotingthepossibilitiesfor commercialization. Inmanycountriestheseserviceshav ebeenbroughtclosetothecustomer. Theroleoftheregionalnetworkanditsfunctionistoscreentheideaswiththebestpotential fromthelargenumberofproposalssubmittedandtoassistindevelopingtheseintosignificant innovations. Oftenthein novationactivitieshaveincreasedinallofthethreemaingroupsof innovators:inbusinessenterprises,inuniversitiesandamongprivatepersons.

The positive activities and atmosphere towards innovations and entrepreneurs hip have had many important influences such as

- Childrenandstudentsinuniversitiesaremoreinterestedinsciencesandmathematics
- Universities and companies are active with their innovation and patenting strategies and policies
- Thegovernmenthasvalidtechnologyandinnovationpo licy
- Innovativecompaniesallocatemorehumaneffortsandfinancialresourcestoresearchand developmentactivities
- Amountsofpatentapplications,newproductsandinnovativeenterpriseshavegrown
- Manyinnovativecompaniesseemtobemoreprofitableth anothers
- Withsuccessofinnovativecompanies, differentinterest groups get profitor revenues, like taxestogovernmentand municipalities, dividends to shareholders, business opportunities to subcontractors and service companies, more employmentand go od products to customers
- Newtechnologiessupportarenewingsociety.

#### **TECHNOLOGYPARKS**

TechnologyparksorcentersorScienceparksareorganizations, whereinnovative, modern and oftentechnology -oriented companies are located. They are often near univ ersities, from where also often many new businesside as come. Incubators are often part of technology centers. In addition to office and workshops pace, technology centers may offer many other activities, which helpespecially new or small technology comp anies. These activities may include business and office services, educational activities for instance in business development, technology transfer, legal matters, internationalization etc. Technology parks createnew areas of co-operation between companie s, universities and other establishments of higher education, financiers, municipalities, and stateorganizations. In technology parks there are often also some units from universities, research centers or R&D units of large corporations.

Technologypark isalsooftenasuitablelocationforaninnovationsupportorganization (InnovationCenter). Technologyparksareoftenlimitedliabilitycompanies, whereare public and private owners (government, city, university, banks, corporation setc.)

Technology parkshavenational and international o operation, for instance IASP.

Helsinki)andinOulu(northFinland).In -uporspin offcompanies

#### **INCUBATORS**

Thetaskofbusinessincubatorsistoofferofficefacilitiesandtohelpstart -uporspin off companiesornewentrepreneursandcompaniesto meettheirbusinessobjectivesfasterand betterthenbefore.

ThebusinessincubatorsforinstanceinFinlandfollowservicemodel, which successfully combines the promotion of starting new companies, generating new jobs, the diversification of the economic structure, the exploitation of high technology, as well as the generation of new services for entrepreneurs and companies.

The common quality work started by the incubators can be expected to develop the operation of the new estincubators and also to improve the services and operations of the older incubators to be stbene fit the entrepreneurs and companies.

Thenetworkofbusinessincubators, with the full range of services for starting and growing companies, is a good example of just the kind of in dustrial policy that is meant in the Finnish Government Entrepreneurs hip Programme.

### **Conclusions**

Thepotentialandcapacityofenterprises for innovation does not only dependent echnical and financial resources. Innovation requires expert know—how in any areas such as management, intellectual property rights, the innovation process, production, marketing and co—operation skills. Networking is often advantageous. Under standing and managing various parts of the processises sential for securing the devel—opment of innovation activity. The public sector promotes innovation activity in many ways, but the responsibility and capacity for successive with the enterprise itself.
