Objectives of Research4Life Programmes (R4L)

- To connect developing world researchers with the international scientific community
- To reduce the 'publishing gap' and improve the quality of locally produced articles and journals
- Ultimately – improve health, food security and environment in relation to Sustainable Development Goals (SDGs)

Primary Target Audiences

- Eligible categories of institutions are:
 - national universities
 - professional schools (medicine, nursing, pharmacy, public health, dentistry)
 - research institutes
 - teaching hospitals
 - government: ministries and agencies
 - national medical libraries
 - locally based non-governmental organizations (NGOs)

All permanent and visiting faculty, staff members and students are entitled to access and can obtain the institutional User Name and Password.

Research4Life is the collective name for four programmes -HINARI, AGORA, OARE and ARDI- aiming to reduce the knowledge gap between industrialized countries and developing countries by providing access to critical scientific research.

Research4Life partners include four United Nations Agencies, Yale and Cornell University Libraries, Microsoft, STM, and **195 publishers**.

Institutions in **71** of the world's poorest countries receive **free access** to journal and book content via Research4Life

Institutions in a further **44** countries pay **US \$1,500** per year for a subscription to the Research4Life content – an **effective discount of over 99.9%**

Institutions in eligible countries are: universities and colleges, research institutes, professional schools, extension centers, government offices, local NGOs, hospitals and national libraries.

R4L Programmes Similarities

- As of July 2014, HINARI, AGORA, OARE, ARDI and GIALI portals look quite similar
- Access for **journals, books and other bibliographic databases**, reference management softwares and free access resources are 99% identical
- The following screen captures will summarize these similarities

HINARI Access to Research in Health Programme

HINARI Programme set up by WHO together with major publishers, enables low- and middle- income countries to gain access to one of the world's largest collections of biomedical and health literature. Up to 13,000 journals (in 30 different languages), up to 28,800 e-books, up to 70 other information resources are now available to health institutions in more than 100 countries, areas and territories benefiting many thousands of health workers and researchers, and in turn, contributing to improve world health.

The AGORA program, set up by the Food and Agriculture Organization of the UN (FAO) together with major publishers, enables developing countries to gain access to an outstanding digital library collection in the fields of food, agriculture, environmental science and related social sciences. AGORA provides a collection of more than 3500 key journals and 3300 books to 2500 institutions in 116 countries. AGORA is designed to enhance the scholarship of the many thousands of students, faculty and researchers in agriculture and life sciences in the developing world.

ARDI – Research for Innovation

The Access to Research for Development and Innovation (ARDI) program is coordinated by WIPO together with its partners in the publishing industry with the aim to increase the availability of scientific and technical information in developing countries.

By improving access to scholarly literature from diverse fields of science and technology, ARDI seeks to:

- reinforce the capacity of developing countries to participate in the global knowledge economy; and
- support researchers in developing countries in creating and developing new solutions to technical challenges faced on a local and global level.

Currently, 17 publishers provide access to around 20,000 journals, books, and reference works for 117 developing countries and territories through ARDI.

Below the header, there is a search bar with "Find by:" and three buttons: "Subject", "Language", and "Publisher". The "Language" button is highlighted with a black box. A dropdown menu is open under the "Language" button, listing various languages: -- SELECT A LANGUAGE --, -- SELECT A LANGUAGE --, Chinese, Dutch, French, German, Italian, Japanese, Polish, Portuguese, Russian, and Spanish. The dropdown menu is also highlighted with a black box. At the bottom of the page, there is a footer with the text: "ARDI is administered by the World Intellectual Property Organization" and "The ARDI portal is hosted by the World Health Organization".
