WIPO: World Intellectual Property Report, 2013

Most countries have seen use of the trademark system intensify...

Trademark applications divided by GDP, index (1985=100), 1985-2011

Upward trend in applications

Figure 1.11 Trademark growth has taken off since the mid-1970s in highincome economies, and since the 1980s in middle-income economies

400,000 1,400,000 350,000 1,200,000 Brazil India Republic of Korea 300.000 1,000,000 OHIM France 250,000 Australia Russian Federation 800,000 Mexico Germany 200,000 China (right axis) Turkey 600,000 150,000 400,000 100.000 200,000 50,000 0 0 1975 976 1978 1979 1980 1984 1986 1988 1989 1990 1999 2009 2010 1974 1977 1985 1987 1994 1995 1996 1998 2000 2003 2004 2005 2006 2008 2011 1981 982 88 1991 <u> 8</u> 8 1997 2001 2002 2007

Trademark applications at selected offices, 1974-2011 (China, right hand axis)

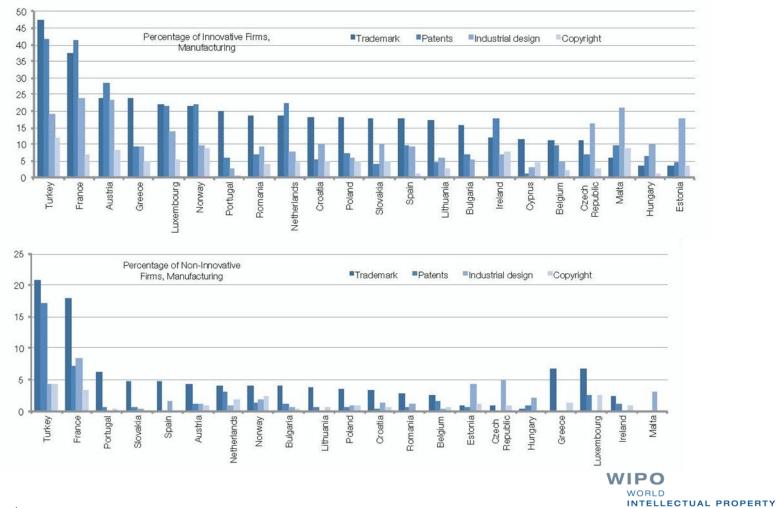

Note: The chart includes economies with a single-class trademark filing system (China, Mexico indicated with dotted lines) and a multi-class trademark filing system (the remaining economies). The levels of trademark filings are not directly comparable across these economies with different systems (see Box 1.7). Australia and Japan are not included, given the structural break in the series due to the introduction of a multi-class system in 1996.

SMEs mostly use trademarks

Number of IP-active SMEs in the UK, 2001-2005

WIPO WORLD INTELLECTUAL PROPERTY ORGANIZATION

.....growth in filings is partly due to...

- Growth in brand investment
- Increase product innovation
- Shift towards service economy
- Globalization abroad filings

Future data development

Individual records database like the USPTO

Surveys to understand companies strategies towards branding and use of the trademark system.

Thank you!
