Madrid Monitor Help

Madrid Monitor is a new service provided by WIPO combining the search, [WIPO Gazette](#), [Madrid E-alert](#) and [Madrid Realtime status](#) tools into a single, simple tool. The old tools will remain available while we gather your feedback on the new tool, but hopefully you will find the new, combined approach easier to use to find and monitor all information associated with Madrid international trademark registrations.

Video tutorials are available to help you learn about all the features available in Madrid Monitor.

Overview

The page is divided into three tabs:

1. The [search](#) tab is your basic interface to find records of interest. It has four options: The [simple Search](#) (the default), [advanced search](#), [realtime search](#), and [image search](#).
2. [Gazette](#) is the official publication of the Madrid System. Every week the International Bureau publishes data regarding new international registrations, renewals, subsequent designations and modifications affecting existing international registrations. Note that the same information should be available by searching, which is updated daily, but the gazette provides an easy way to see all the official information published by WIPO each week.
3. Support contains general information and this help file to help you use this system.
