1. Introduction

This document is an inception report for the evaluation of the project Intellectual Property (IP) Management and Transfer of Technology: Promoting the Effective Use of IP in Developing Countries, Least Developed Countries and Countries with Economies in Transition. This document outlines the purpose, objectives, strategy, methodology and work plan of the evaluation. The final report will be based on this inception report, pending approval from WIPO.

2. Purpose and Objectives

The main purpose of this evaluation is to assess implementation of the project and its overall performance. This will feed into the decision-making process of the Committee on Development and Intellectual Property (CDIP).

The main objective of this evaluation is two-fold:

- 1. Learning from experience during project implementation: what worked well and what did not work well for the benefit of continued activities in the field. This includes assessing the project design framework, project management, including monitoring and reporting tools, as well as measuring and reporting on results achieved to date and assessing the likelihood of sustainability of results achieved.
- 2. Providing evidence-based evaluation information to support CDIP's decision-making process.

In particular, the evaluation will assess the extent to which the project has been successful in

- (a) Establishing a framework for more effectively targeting capacity building activities in the field of technology transfer; and
- (b) Creating capacity in IP management and transfer of technologies amongst the key role players in the categories of funders, developers, managers, and users of IP.

3. Evaluation Strategy

- The evaluation will take a participatory approach and involve all relevant stakeholders in the different steps of the evaluation, as far as feasible.
- The information and data will be gathered from multiple sources using different research methods in order to be able to triangulate and cross-reference the results drawn.
- The evaluation will find a balance between questions of project design ("what worked?") and questions of effectiveness ("what was achieved?"). Moreover, it will include questions on the

likelihood of sustainability of the results achieved. This will directly support meeting the above-mentioned objectives.

4. Evaluation Framework

Theme and questions	Proposed indicators	Data collection tools	Sources of information	
Project design and manag	Project design and management			
Appropriateness of the initial project document as a guide for project implementation and assessment of results achieved.	Modifications required during the implementation of the project	Document review Interviews	WIPO staff External stakeholders	
2. The project monitoring, self- evaluation and reporting tools and analysis of whether they were useful and adequate to provide the project team and key stakeholders with relevant information for decision-making purposes.	Level of usefulness of monitoring and reporting tools	Document review Interviews	WIPO staff External stakeholders	
3. The extent to which other entities within the Secretariat have contributed and enabled an effective and efficient project implementation.	Number of WIPO units involved in the project and their contribution	Document review Interviews	WIPO staff External stakeholders	
4. The extent to which the risks identified in the initial project document have materialized or been mitigated.	Type of risks encountered during project implementation and how they were addressed	Document review Interviews	WIPO staff External stakeholders	
5. The project's ability to respond to emerging trends, technologies and other external forces.	Level of ability of the project to respond to emerging trends, technologies and external factors	Document review Interviews	WIPO staff External stakeholders	
Effectiveness	T =.	Τ =	1	
The implementation process by which project results were achieved	Planned vs. actual activities implemented; strategies, tools developed/used for achieving results; Barriers, facilitators,	Document review Interviews	WIPO staff External stakeholders

4.1 Evaluation Tools

The research tools will be used across the different themes and questions. The following table provides further information on these tools and how they will be deployed.

Tool	Description	Information source
Interviews – internal	Some 10 semi-structured interviews and/or small group discussions	By video call:

5

Inception Report for the Evaluation of the Project on Intellectual Property Management and Transfer of Technology

		WIPO Secretariat staff, including: - Innovation and Knowledge Infrastructure Department/Technology and Innovation Support Division - TISC Development section - DA Coordination Division - Program Performance and Budget Division - Division for LDCs - Regional Bureaus (Asia & Pacific, Latin America, Africa)
Interviews – external	Some 10 semi-structured interviews and/or small group discussions	By video or phone call: - Focal points in the 4 pilot countries: Chile, Rwanda, South Africa, Indonesia
Document review	Review of main documentation	WIPO documentation including internal/external reports/publications, in particular the TNA manual and toolkit, TNA reports, IVC mappings, training plans.

The list of persons to be interviewed will be agreed upon jointly with WIPO.

The interview questions (see the Annex for a list of topics to be covered) will be slightly adapted according to the interview partner and his/her involvement in the project. The advantages of semi-structured interviews are to prepare questions beforehand that help guide the conversation and keep the respondents on topic. Moreover they allow for open-ended responses from participants for more in-depth information.

Data analysis methods: The data collected will be analyzed and compiled using comparative methods. The data will be correlated and organized to respond to the evaluation questions. These findings will then be used to inform the conclusions and recommendations proposed.

5. Work Plan and Timetable

The proposed milestones and timelines are as shown here below:

Milestones/Deliverables	Key dates
Work starts	05 January 2021
Submission of inception report to WIPO	25 January 2021
Feedback from WIPO on inception report	29 January 2021
Submission of final inception report to WIPO	5 February 2021

6

Inception Report for the Evaluation of the Project on Intellectual Property Management and Transfer of Technology

Milestones/Deliverables	Key dates
Submission of draft report to WIPO	26 February 2021
Factual corrections from WIPO on draft report	5 March 2021
Submission of final report to WIPO	22 March 2021
Presentation of evaluation report at the CDIP	To be defined

6. Key Assumptions and Risks

It is assumed that the project team and the Development Agenda Coordination Division (DACD) will assist the consultant in identifying and accessing all key documents; informing key stakeholders about the evaluation, making necessary introductions, providing contact information and facilitating interviews as required; and providing consolidated timely feedback on deliverables. It is also assumed that the interviews to be undertaken will be successful and language and technical issues (e.g. poor connection) will not be a barrier. It is also assumed that the people to be interviewed will be available and willing to provide the required information.

7. Annex

Topics to be covered during semi-structured interviews:

Project design, management, and coordination appropriateness of monitoring, self-evaluation and reporting tools risk management coordination with and within WIPO

Effectiveness and usefulness:

what worked well/less well (in particular concerning the capacity building framework, IVC mapping and TNA process)

most significant results achieved

contribution of the project to capacity development of IP management and TT in the IVC contribution of the project to understanding of IVCs, training needs, and means for addressing training needs (in the pilot countries)

Sustainability:

factors that contribute to the sustainability of the action, plans for re-using/expanding on created tools

Contribution of the project to the implementation of DA recommendations

Learnings:

key lessons learned suggestions for improvements for similar projects

As mentioned above, according to the interview partner's involvement in the project, the topics covered will slightly vary.
