

Roving Seminar on WIPO Services and Initiatives

Organized by the World Intellectual Property Organization (WIPO)

in cooperation with the American Intellectual Property Law Association (AIPLA) and with the support of the United States Chamber of Commerce (USCC)

Introduction to WIPO

Speaker: Mr. John Sandage
Deputy Director General,
Patents and Technology Sector, WIPO

E-mail: john.sandage@wipo.int

San Diego, United States of America
November 2, 2016

WIPO

***MISSION:** To lead the development of a balanced and effective international intellectual property (IP) system that enables innovation and creativity for the benefit of all.*

- **MEMBER STATES:** 188
- **OBSERVERS:** more than 390 (NGOs, IGOs, industry groups, etc.)
- **STAFF:** more than 1. 200
- **ADMINISTERED TREATIES:** 26
- **MAIN BODIES:** General Assembly, CC, WIPO CONFERENCE

WIPO is Service and Development oriented

ACCESS TO INTERNATIONAL MARKETS

WIPO main offices

WIPO: Provider of Premier Global IP Services

WIPO's Budget: 756,3 Million CHF for 2016 - 2017

Budget by income

PCT Applications

2015: 218,000 (+1.7%)

PCT Operations at a glance:

- WIPO's International Bureau received 220,000 record copies in 2014, growing 3% over the prior biennium:
 - USA was first, with 57,000 filings.
 - The share of fully electronic filings continued to increase, now 91% of all filings.
- Number of PCT Staff is decreasing:
 - The number of PCT staff has been reduced by 33% -- from a high of 456 to 296 over the last 12 years – a reduction of 160 FTEs.
 - But – Examiner productivity has risen 22%.
- Quality of work by IB is improving:
 - Overall output quality has increased from 81% to 93%.
 - Due mainly to improved timeliness and reduced errors.
- No fee increase in 7 years!

WIPO Systems – and now The Hague!

- Patent Cooperation Treaty (PCT)
- Madrid System
- Alternative Dispute Resolution
- The Hague System
 - Second largest filer worldwide is Procter and Gamble (US), with 95 filings
 - Among the top five origins, the United States of America saw the fastest growth in the number of registered designs (+14.2%)

Industrial Design Applications

The International Registration of Trademarks, Using the Madrid System

Roving Seminar on WIPO Services and Initiatives

Matthew Forno
Senior Counsellor
Information and Promotion Division
Brands and Designs Sector, WIPO

**San Diego, United States of America
November 2, 2016**

It begins with a trademark and a plan to export...

DAIMLER

ORKA GROUP
"FASHION IS OUR BUSINESS"

WINE ESTATES

DZAMA

SONY®

Protection Options

...Then a choice must be made regarding the best way to protect your trademark/s abroad:

- The national route - file trademark application/s with the IP Office of each country in which you want protection
- The regional route - apply through a regional trademark registration system with effect in all member states (ARIPO, Benelux Office for IP, EUIPO and OAPI)
- The international route - file through the Madrid System

The International Route

The international route through the Madrid System may be the preferred option when you:

- Seek protection in multiple markets, particularly if these are in different regions
- Want flexibility to add new markets as your export plans develop
- Have limited budget and/or time to spend on registration and management of your trademarks

The Madrid System is Convenient

- Access a centralized filing and management procedure
- File one application, in one language and pay one set of fees for protection in multiple markets
- Expand protection to new markets as your business strategy evolves

The Madrid System is Cost-effective

- File an international application, which is the equivalent of a bundle of national applications, effectively saving time and money
- Avoid paying for translations into multiple languages or working through the administrative procedures of multiple IP Offices

The Madrid System offers Broad Geographic Coverage

- Protect your trademark/s simultaneously in the 114 countries covered by the 98 members of the System
- Access markets that represent in excess of 80% of world trade, with potential for expansion as membership grows
- Recent accession include –
 - 2013: India, Rwanda and Tunisia
 - 2014: OAPI and Zimbabwe
 - 2015: Algeria, Cambodia, The Gambia and Lao PDR
 - 2016: Brunei Darussalam

Members of the Madrid System

**98 members* (including EU and OAPI)
covering 114 countries**

WIPO
WORLD
INTELLECTUAL PROPERTY
ORGANIZATION

*All are party to the Protocol, the governing treaty, while 55 are also party to the Agreement

How the Madrid System Works

The International Trademark Registration Process

Stage 1

Application through your National or Regional IP Office (**Office of origin**)

- To be **entitled to use** the Madrid System, you must:
 - Have a real and effective industrial or commercial establishment in, or
 - Be domiciled in, or
 - Be a national of a member of the Madrid System

- Before filing an international application, you need to have registered or filed an application (**basic mark**) in your Office of origin

- Submit an **international application** through this same IP Office, which will certify and forward it to WIPO

Stage 2

Formal examination by WIPO

- WIPO conducts a **formalities examination** of your international application
- Once requirements have been met, the mark is **recorded in the International Register**
- WIPO sends a **certificate of international registration** to the holder and notifies the IP Offices, of the **designated Contracting Parties**, in which protection is sought
- The scope of protection is not known at this stage. It is only determined **after substantive examination** and decision by the IP Offices, as outlined in Stage 3

Stage 3

Substantive examination by IP Offices (Office of the designated Contracting Party)

- IP Offices make a **decision within 12 or 18 months** in accordance with their legislation. WIPO records the decisions and notifies you
- If an IP Office refuses to protect your mark, it will not affect the decisions of other offices. You can contest a refusal decision before the IP Office concerned
- If an IP Office accepts to protect your mark, it will issue **statement of grant of protection**
- The international registration is **valid for 10 years**. Renew directly with WIPO with effect in the designated Contracting Parties

Costs

Fees are payable to WIPO in Swiss francs

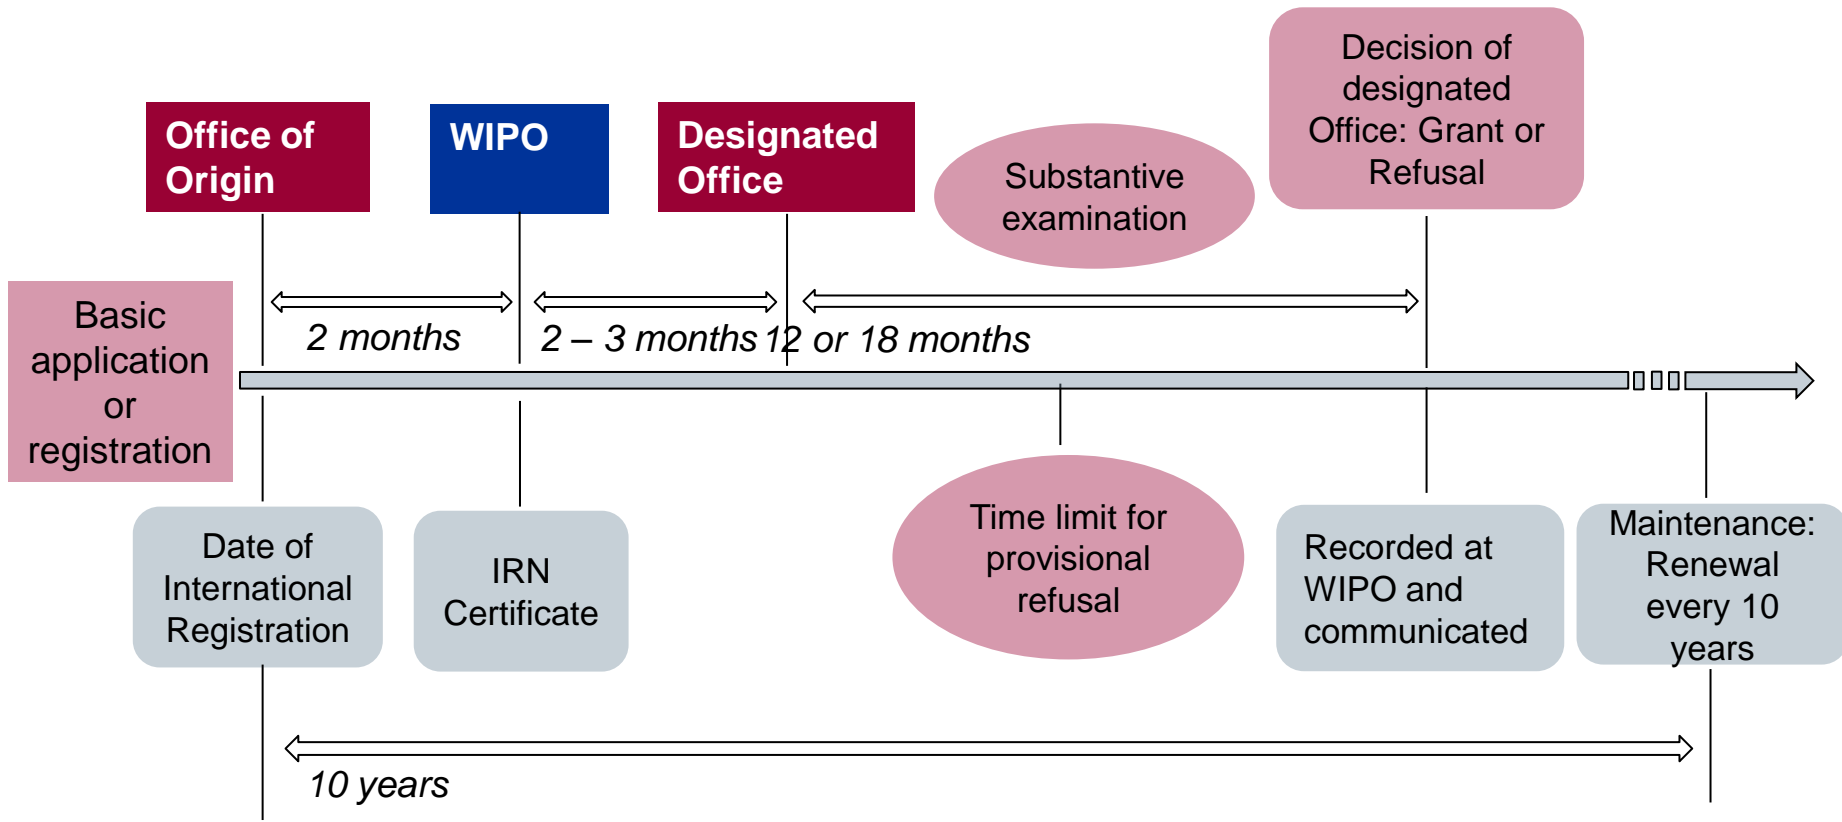

- Basic fee*, which includes 3 classes of goods/services
 - 653 Swiss francs - b/w reproduction of mark
 - 903 Swiss francs - color reproduction of mark

- Fees for designating Contracting Parties (dCP)
 - Standard fees - complementary (100 Swiss francs per dCP and supplementary (100 Swiss francs per class beyond 3)
OR
 - Individual fees where this is declared

* Applicants from [Least Developed Countries](#) benefit from a 90% reduction in the basic fee

The Patent Cooperation Treaty (PCT) Current Status & Recent/Future Developments

Speaker: Matthew Bryan, Director, PCT Legal Division

**San Diego, United States of America
November 2, 2016**

Overview/Current Status

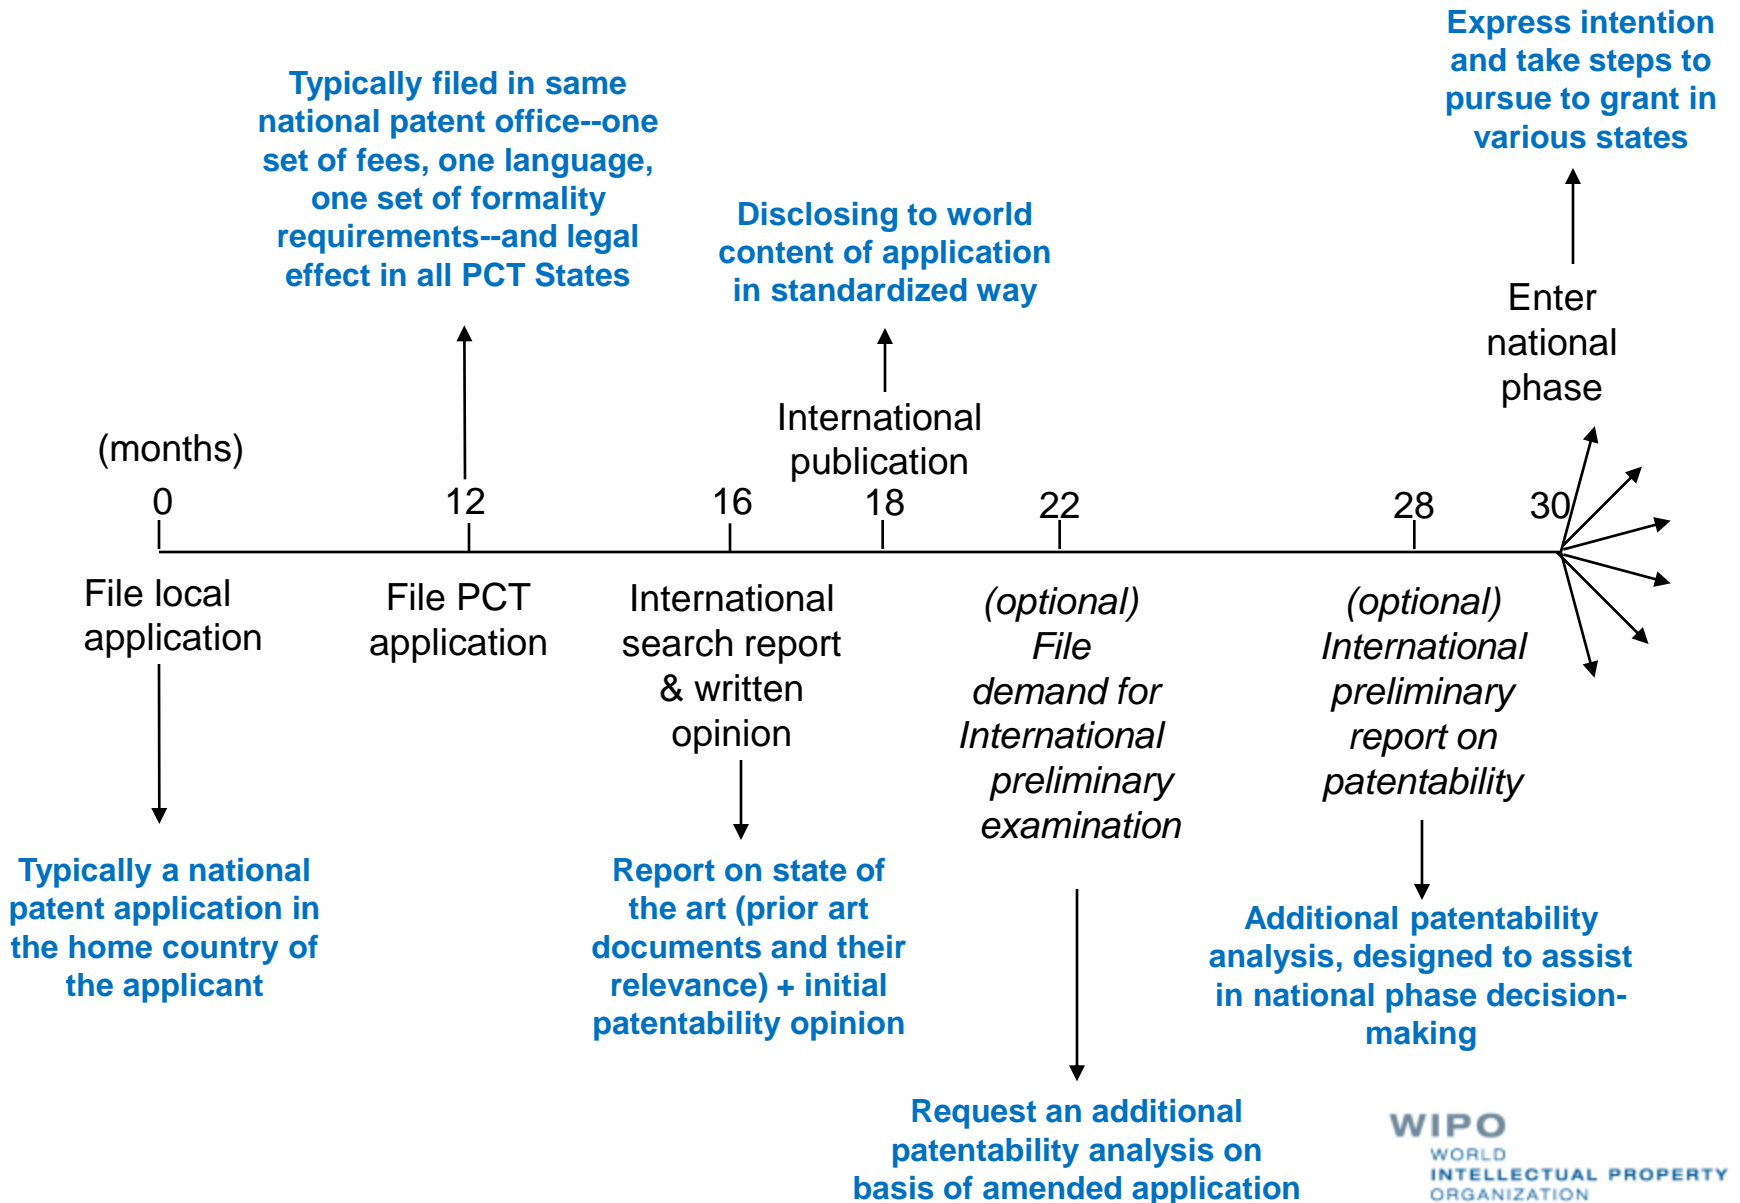

Seeking patents multinationally: traditional patent system vs. PCT system

Paris route vs. PCT national phase

The PCT System

Advantages for PCT Users

The PCT, as the cornerstone of the international patent system, provides a worldwide system for simplified filing and processing of patent applications, which—

1. postpones the major costs associated with internationalizing a patent application
2. provides a strong basis for patenting decisions
3. harmonizes formal requirements
4. protects applicant from certain inadvertent errors
5. evolves to meet user needs
6. is used by the world's major corporations, universities and research institutions when they seek multinational patent protection
7. can result (if PCT reports are positive) in accelerated national phase processing in a number of countries

PCT Testimonial: Start-up

Nokero (produces solar-powered lights which replace kerosene lamps and candles used in developing and least -developed countries--it has so far distributed over 1.4 million lights in 120 countries and won a United States Patent and Trademark Office's Patents for Humanity Award)

“When it comes to patenting, because we operate in so many different markets, we use WIPO’s Patent Cooperation Treaty (PCT). Every start-up has limited funds and the PCT is a great mechanism for delaying patent filing costs, allowing time to test the market and overcome any unforeseen technical problems. Without the PCT, protecting an invention in international markets would be a high-risk strategy with huge upfront costs.”

FIG. 5

PCT Testimonial: Inventor

Professor Shuji Nakamura—co-winner of the 2014 Nobel Prize for Physics for his work on blue LED technology—is quoted in a December 2014 *WIPO Magazine* article:

“... The PCT is critical for these early stage technologies because it gives us the opportunity to protect our patents globally while allowing the market and the technology to mature further before determining which countries might be most valuable to commercial partners.”

PCT Testimonial: Large Company

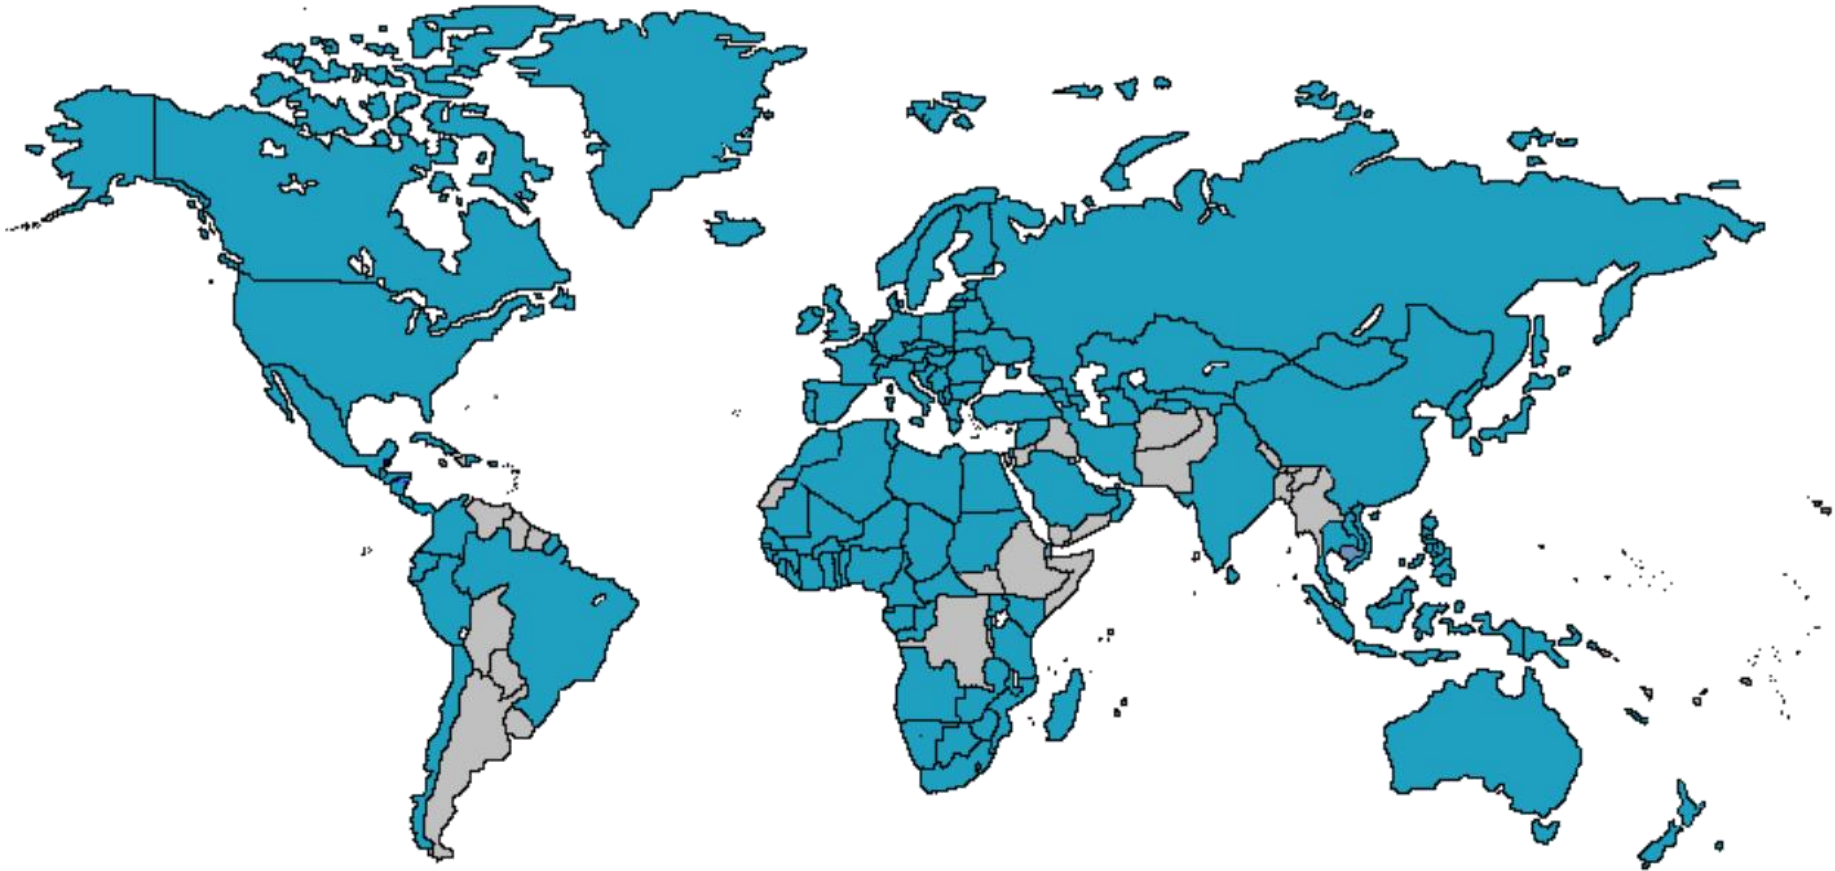

Qualcomm:

- Started in 1985 with 7 people
- Today more than 170 offices in more than 40 countries, and 33,000 employees
- \$25.3 billion in revenue in FY 2015
- #2 user of PCT in 2015: 2442 PCT applications published

“Over the past 25 years, Qualcomm has been one of the largest users of the PCT system. To date we have filed more than 9,000 patent applications. International patent applications are important to the protection of innovations around the globe. The PCT helps put innovation into practice by providing a simple and cost-effective way to file international patent applications. The PCT is critical for Qualcomm because we are, above all, an innovation company....[PCT] has been a vital partner in the success of our company and the growth of the wireless industry.” CEO Paul Jacobs, 2011

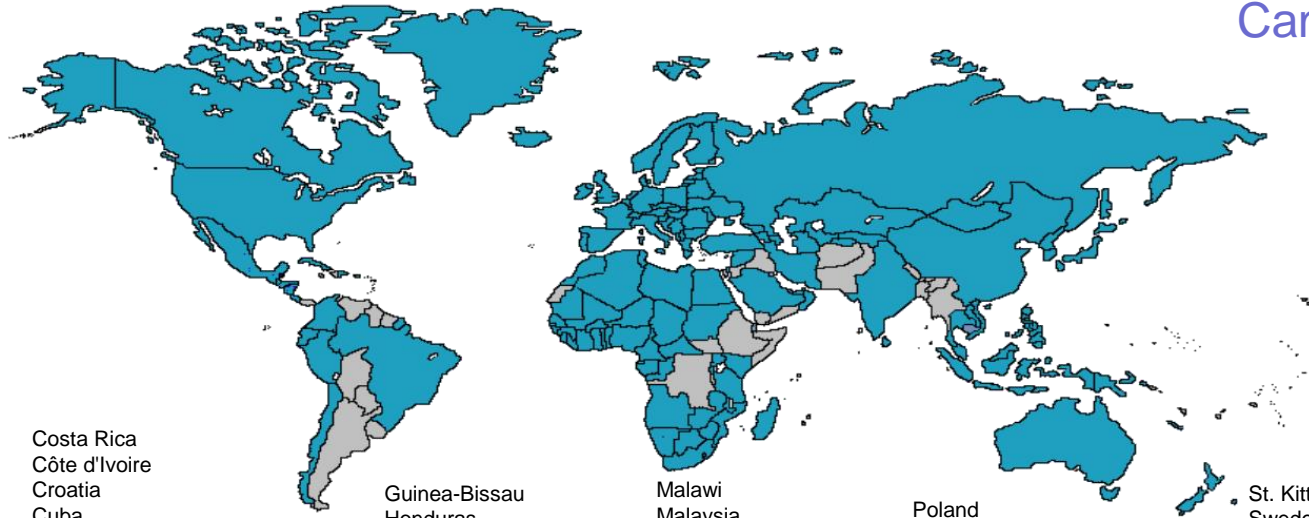

PCT Coverage Today

***PCT discussions ongoing*

International applications received in 2015 by country of origin

- 26+% originating in US
- 75% from top 5 countries; 92+% of filings from top 15 countries
- PCT applications filed by applicants from 132 countries
- Very close to having 80% of UN member countries in the PCT

PCT use in the US (receiving Office)

- Joined PCT effective June 1, 1978
- 57,385 PCT applications filed by US applicants in 2015 with RO/US

PCT International Searching Authorities

The appointed ISAs/IPEAs are the following 22 offices:

Australia
Austria
Brazil
Canada
Chile
China
Egypt
European Patent Office
Finland
India
Israel
Japan
Nordic Patent Institute
Republic of Korea
Russian Federation
Singapore
Spain
Sweden
Turkish Patent Institute
Ukraine
United States of America
Visegrad Patent Institute

Recent/Future Developments

July 1, 2016 PCT Rule Amendments (1)

- legal basis and procedure for removing/withholding certain “sensitive information” from public access on applicant’s request (Rules 9, 48 & 94)
 - upon reasoned request by the applicant to the IB
 - Information will be omitted from publication/public file access, if
 - 1) it does not obviously serve the purpose of informing the public about the international application,
 - 2) publication of or public access to such information would clearly prejudice the personal or economic interests of any person, and
 - 3) if there is no prevailing public interest to have access to that information
 - effective as from 1 July 2016 for applications filed on or after that date
- language of communication with IB via ePCT opened to all publication languages (Rule 92)

July 1, 2016 PCT Rule Amendments (2)

- required transmittal by RO to IB of documents submitted in support of requests for restoration of priority right (Rules 26*bis* & 48)
 - Exception: if “sensitive information” standard (Rule 48(I)) met
- “general unavailability of electronic communications services” as grounds for excuse of delay in meeting certain time limits (Rule 82*quater*)
 - Extension of *force majeure* provisions to time limits missed due to “general failures of electronic communication services”
 - PCT Assembly: “covers outages that affect widespread geographical areas or many individuals, as distinct from localized problems associated with a particular building or single user”
 - Amended paragraph 30 of RO Guidelines:
 - Element of “unforeseeable” must be present and no reasonable alternative filing means available
- Effective as from 1 July 2016 for applications filed on or after that date, and for applications filed before that date where the “event” occurred on or after that date

July 1, 2017 PCT Rule Amendments (1)

- transmittal by RO of earlier search and/or classification results to ISA, where national law permits (Rules 12*bis*, 23*bis* & 41))
 - General Rule: ROs forward the search/classification results from applications of which priority is claimed without the applicant's express permission, where permitted by national law
 - Exception:
 - ROs which have notified the IB (before April 14, 2016) of incompatibility of such forwarding with applicable national law are not required to do so
 - USPTO (and 10 other ROs) made this notification
 - Even in cases in which ROs in principle apply the procedure, when filing the PCT application applicants may request to not have the earlier search results forwarded to the ISA (ROs which act in this way are to notify the IB in advance)
- Effective as from 1 July 2017 for applications filed on or after that date

July 1, 2017 PCT Rule Amendments (2)

- designated Offices required to provide IB with timely national phase entry and related data (Rules 86 & 95)
 - Objective: visibility of the status of PCT application during the national phase on PATENTSCOPE under the “National phase” tab
 - Obligation for designated Offices to timely send national phase entry and related data to the IB (within 2 months from expiry of national phase deadline or asap thereafter)
 - Data required to be transmitted:
 - Date national phase entered
 - National application number
 - Number and date of any national publication
 - Number and date of grant
 - Effective as from 1 July 2017 for applications in respect of which the acts referred to in Article 22 or Article 39 are performed on or after that date

PCT Assembly 2016

■ Outcomes

- Appointment of Turkish Patent Institute as PCT ISA/IPEA (#22)
- Amendments to the PCT Regulations (entry into force: 1 July 2017)
 - Modifying time limit to request Supplementary International Search (from 19 to 22 months)
 - Further small change to Rule 23bis
 - Removal of unnecessary incompatibility provisions

PCT Working Group 2016 (1)

■ Outcomes:

- Report provided on upcoming 3rd pilot of IP5 collaborative search and examination
 - Planned that all IP5 offices will participate, will be applicant driven (to assess business interest), will involve at least 100 PCT applications per office and last up to 3 years, so as to fully assess impact
- IB will consult with Offices and user groups on:
 - proposed pilot for ePCT national phase entry functionality
 - technical/legal/administrative issues related to color drawings
 - translation difficulties relating to the number of words in abstracts and drawings
 - inclusion of CPC/other national classification symbols on front page of published international applications
- Examiner training
 - IB will:
 - compile info on examiner training provided by offices
 - invite offices to provide training to examiners from other offices
 - develop concept for improved coordination of examiner training
 - invite sharing of training materials

PCT Working Group 2016 (2)

- Outcomes (cont.):
 - No agreement on proposals concerning:
 - same day priority claims
 - missing parts/erroneously filed procedure
 - fee reductions proposed by Brazil for universities and public research organizations—for further discussion next year
 - proposed amendments to Schedule of Fees and Rule 92*bis* to assist IB in responding to potentially abusive use of PCT fee reductions

Other practice changes

- Payment by cheque to the IB no longer accepted
 - Following the introduction of further restrictions with regard to the processing of cheques by the International Bureau's banking partners, **the International Bureau will no longer accept payment by cheque with effect from January 1, 2017.**
 - Any cheque received on or after this date will be systematically returned to the issuer

The PCT—1978 to 2016 (1)

- As filing tool: PCT has been extremely successful
 - preferred route for international patenting (\approx 218,000 applications in 2015, > 57% “market share”)
 - harmonization of formal and procedural requirements, beyond PCT
 - national laws; Patent Law Treaty (PLT)

The PCT—1978 to 2016 (2)

- As worksharing tool: (which it was intended by its founders to be), PCT has not been as effective in practice
 - had it been successful up to now in this sense, it would have been of more assistance in addressing national quality of examination and (for some Offices) backlogs in processing
 - expectation by founders was: “flying start” for offices, which would complete, further check, and criticize ...
 - reality: many Offices start “from scratch”, perhaps not in complete isolation, but to a great degree ...
- What is needed: build more trust between patent offices, so that duplicative international phase and national phase processing can be reduced

Continued areas of PCT focus (1)

■ Quality:

- Improve the quality and consistency of PCT international phase reports
- Develop quality metrics for measuring usefulness of international phase reports
- Develop quality feedback system for offices (e.g., DO to ISA)
- Explore collaborative search and examination
- Improve timeliness of PCT work

■ Help designated Offices to better understand reports

- Search strategies, standardized clauses, explanations of relevance of cited documents, etc.

■ Improve timeliness of actions in international phase

- ISAs/IPEAs, ROs (eSearchCopy)

■ Improve access to national search and examination reports

- PATENTSCOPE, WIPO-CASE, Global Dossier

■ Make progress against misleading invitations sent to PCT users

Please pay the Amount, within 14 days. Don't forget to quote the Order Number: **1160500654**

• Registration of the International Patent:

The international patent has been published in the WIPO-Gazette, which is edited by Bureau of the World Intellectual Property Organization. This publishing forms the basis of our offer. Please note, registration is not affiliated with the publication of the official International Patent Application registration and is not a registration by a government entity. This form is solely the offer for the concluding of the contract, being the year registration of your international patent application in our internet database and access to all database services. Applicant in the sense of the provision § 1744 law no. 89/2012 Coll., Civil Code, accepts this motion of Provider to the concluding of the contractual relationship by the execution of the non-cash settlement of the annual registration price to the account of Provider. To access the database, identify the offer number. By the settlement of the price Applicant agrees that the contractual relationship shall be governed by the company general terms of business, specified on the second page of this application; the issues not modified by these terms shall be governed by the law no. 89/2012 Coll., Civil Code. By the acceptance of this motion Applicant hereby declares to familiarize himself with the General Terms of Business and to read them; furthermore, he declares to agree with their wording. Due to legal reasons, all and any back-payment claims and complaints filed directly or via the bank, will neither be processed or accepted by us. The bank cannot refund you without our approval. Please save our as well as your precious time and choose the shortest way for a setting of your complaint and approach us directly at cancel@ipti.biz.

WARNING: Requests for Payment of Fees

It has come to the attention of the International Bureau that PCT applicants and agents are receiving invitations to pay fees that do not come from the International Bureau of WIPO and are unrelated to the processing of international applications under the PCT. Whatever registration services might be offered in such invitations, they bear no connection to WIPO or to any of its official publications.

PCT applicants and agents should note that it is the International Bureau of WIPO alone which publishes all PCT applications promptly after the expiration of 18 months from the priority date (see PCT Article 21(2)(a)); there is no separate fee for such international publication, and the legal effects of international publication are set out in PCT Article 29.

The invitations often identify a particular PCT application by its international publication number (eg: WO 02 xxxxxx), publication date, title of the invention, international application number, priority information and IPC symbols; examples of such invitations can be viewed below.

IIP – International Intellectual Property Office

Published on February 22, 2016

IPTI – International Patents & Trademark Index

Invitation not listed here? E-mail us a copy

- [Trademarks \(Madrid System\)](#)
- [Patents \(PCT System\)](#)

Mitigating this unscrupulous practice

- WIPO invites its customers to use and adapt this standard text to notify applicants and inventors about such fee requests. [\[WORD\]](#)
- Circular letter addressed by WIPO Director General, Francis Gurry to all PCT Contracting States and Regional Organizations. [PDF](#)

How to make a complaint? 

Continued areas of PCT focus (2)

- Helping developing countries benefit from the PCT
 - top 15 countries responsible for 92% of IAs filed in 2015
 - improve training for patent examiners (especially in developing and least developed countries), and better coordinate training already provided
- Making PCT accessible to applicants of all types from all Contracting States
 - fee reductions (SMEs, universities, research institutes, individual applicants)

Continued areas of PCT focus (3)

- ePCT: electronic interface to entire PCT international phase process
 - real time access to IB files and bibliographic data
 - notifications of significant events and approaching deadlines
 - Online electronic preparation and filing with real-time validations (currently with 43 receiving offices, including IB, Algeria, Austria, Australia, Azerbaijan, Brazil, Brunei, Bulgaria, Canada, Chile, Colombia, Cuba, Czech Republic, Denmark, EAPO, Estonia, EPO, Finland, Hungary, Iceland, India, Indonesia, Israel, Iran, Latvia, Malaysia, Mexico, New Zealand, Norway, Oman, Philippines, Poland, Portugal, Qatar, Republic of Korea, Russian Federation, Saudi Arabia, Slovakia, Sweden, Singapore, Turkey, South Africa, and the United States of America)
 - Multilingual (10 language) interface available
 - Working on centralized fee payment mechanisms
 - US PCT users filing with ROUS can now (as of 1 June 2016) use ePCT to prepare their PCT application and upload the resulting .zip file in EFSWeb, but....
 - care should be taken to ensure that the technical data loaded into ePCT is not subject to export controls
 - Consulting on how ePCT could be used for national phase entry

The PCT of the Future

- Should include: (*in the view of the IB*)
 - Renewed emphasis of the “Cooperation” element in PCT:
 - Offices and Authorities performing their roles in a timely way and to the level of quality necessary to allow other Offices and the public at large to trust in the work performed by them
 - Increase the capacity to measure that quality
 - Full faith and credit should be given to an Office’s own ISA workproduct
 - Further consider allowing the market/competition (e.g., greater ISA choice for applicants) to exert an effect
 - Make use of DO feedback, as particularly interested consumers of PCT reports
 - Development of IT systems and standards to support sharing information with other Offices more effectively
 - Centralized fee payment mechanism?
 - Establishment of appropriate applicant incentives so that they play a more effective part in the cooperation
 - Provision of training and assistance to Offices from all Contracting States so that they are able to perform their roles effectively

Reminders

- The PCT contains useful mechanisms, such as:
 - Third party observations
 - Restoration of priority procedures
 - A way to draw attention to individual applications by including licensing-related information
 - Being able to request excuse of delay in meeting national phase entry deadline
- Always:
 - View and review filed application online asap after filing
 - Review published application immediately after publication
 - Respect national phase entry time limit
 - Request RO to prepare and transmit priority document
 - Consider submitting any restoration of priority requests to RO/IB
 - File *92bis* requests only with IB directly
 - Call/email when you have a doubt or question
- Never:
 - Submit a notice of withdrawal to the RO or any authority other than the IB

PCT Information and Training

- 29 video segments on WIPO's Youtube channel and WIPO's PCT page about individual PCT topics
- PCT Distance learning course content available in the 10 PCT publication languages, and a 2nd detailed PCT DL course under preparation
- PCT Webinars
 - free updates on developments in PCT procedures, and PCT strategies—previous webinars are archived and freely available
 - upon request also for companies or law firms, for example, for focused training on how to use ePCT
- Videoconference and audio possibilities also available
- In-person PCT Seminars and training sessions: see PCT seminar calendar (<http://www.wipo.int/pct/en/seminar/seminar.pdf>)
- Monthly Newsletter (<http://www.wipo.int/pct/en/newslett/>)
- Extensive information resources on PCT website (<http://www.wipo.int/pct/en/>)

The International Registration of Industrial Designs, Using the Hague System

Roving Seminar on WIPO Services and Initiatives

Matthew Forno
Senior Counsellor
Information and Promotion Division
Brands and Designs Sector, WIPO

**San Diego, United States of America
November 2, 2016**

What is the Hague System?

- A one-stop shop to obtain and maintain industrial design protection in export markets
- A closed system and an option to the national route
- A purely procedural treaty
- The domestic legislation of the designated Contracting Parties set the conditions for protecting industrial designs and determine the rights which result from protection

Paris Route vs. Hague Route

Direct/Paris Route

The Hague System

Key Features of the Hague System

- Entitlement, but no basic design
- Direct filing with the International Bureau of WIPO
- One application – one language – one set of fees
- One registration covering multiple territories
- «Self-designation» is possible
- Possible deferment
- Fixed time limit for refusal – 6 or 12 months
- Renewal – every 5 years – 15 years for the 1999 Act
- Centralized management of portfolio

Hague Union: Going Global

51 Geneva Act (1999) (including EU and OAPI)

14 Hague Act (1960)

65 Contracting Parties

Hague Union Members according to the most recent applicable Act

Geneva Act (1999)

•African Intellectual Property Organization, Albania, Armenia, Azerbaijan, Bosnia and Herzegovina, Botswana, Brunei Darussalam, Bulgaria, Croatia, D.P.R. of Korea, Denmark, Egypt, Estonia, European Union, Finland, France, Georgia, Germany, Ghana, Hungary, Iceland, Japan, Kyrgyzstan, Latvia, Liechtenstein, Lithuania, Monaco, Mongolia, Montenegro, Namibia, Norway, Oman, Poland, Republic of Korea, Republic of Moldova, Romania, Rwanda, Sao Tome and Principe, Serbia, Singapore, Slovenia, Spain, Syrian Arab Republic, Switzerland, Tajikistan, the former Y.R. of Macedonia, Tunisia, Turkey, Turkmenistan, Ukraine and the United States of America (51)

Hague Act (1960)

•Belgium, Belize, Benin, Côte d'Ivoire, Gabon, Greece, Italy, Luxembourg, Mali, Morocco, Netherlands, Niger, Senegal and Suriname (14)

Potential Accessions

-  China
-  Russian Federation
-  Morocco
-  ASEAN countries
-  Israel
-  Canada
-  United Kingdom
-  Mexico
-  Madagascar

Trends: Continuing Growth

■ 2015:

- 3,581 international registrations contained 14,484 designs;
- Growth (%) 2014-2015: +32.5% registrations, +7.3% designs

■ 2016 (until September 30):

- 3,892 international registrations contained 13,456 designs
- Growth (%) to same period in 2015: +62.9% registrations, +32 % designs

Trends: 2016 (until September 30):

TOP 10 Designations (designs recorded by Designated Contracting Party)

		Growth
European Union	10615	+23%
Switzerland	6348	-2%
Turkey	4613	+10%
United States of America	3181	+422%

- USPTO's Quick Guide
- Integrated Export License
Process
- Transmittal Fee

DIRECT:

WIPO E-filing Interface

- Dedicated electronic tool
- Easier than using paper form
- Embedded alerts and guidance
 - Integrated fee calculator
 - No additional fees
 - No intermediary
- Workbench / Re-use functions
- Online correction of irregularities

US Filings* (as received at the IB May 2015 up to September 30, 2016)

* By the Applicant's Contracting Party

Have Export License? Then File Directly

E-Filing Platform

The E-filing platform includes the following features:

a WIPO User account

facilitated downloading of reproductions

real time checking of certain formalities

saving of applications in progress

fully integrated fee calculator

payment of fees by credit card

and much more...

New Features of the E-Filing Portfolio Manager

Send corrections to irregularities or defects

Receive and download notifications from the IB relating to international applications

Retrieve in real-time current status of IA

Hague Express Database

Hague Express

The Hague Express Database, updated weekly, includes bibliographical data and, as far as international registrations governed exclusively or partly by the 1999 and/or by the 1960 Act(s) of the Hague Agreement are concerned, reproductions of industrial designs relating to international registrations that have been recorded in the International Register and published in the International Designs Bulletin as of issue No. 1/1999. International registrations that have lapsed are not removed from the database.

Tips

Guidance on Preparing and Providing Reproductions in Order to Forestall Possible Refusals on the Ground of Insufficient Disclosure of an Industrial Design by Examining Offices at http://www.wipo.int/export/sites/www/hague/en/how_to/pdf/guidance.pdf

- Established in consultation with Contracting Parties, in particular all those that currently have an Examining Office, and several user organizations

In Conclusion

- Many advantages in using the Hague System: flexibility of the system, tailormade designations, multiple design application, simple fee structure, and subsequent management.
- Design protection is not simple,
 - But Hague makes it simpler...

Thank you
for your attention

matthew.forno@wipo.int

Resolving IP Disputes outside the Courts through WIPO ADR: WIPO's Arbitration and Mediation Center

Matthew Bryan
Director
Patent Cooperation Treaty Legal Division
WIPO

**San Diego, United States of America
November 2, 2016**

Top Ten Priorities in Choice of Dispute Resolution Clause (WIPO Survey)

WIPO Arbitration and Mediation Center

- Facilitates the resolution of commercial disputes between private parties involving IP and technology, through procedures other than court litigation (alternative dispute resolution: ADR)
 - Offices in Geneva and Singapore
 - Users around the world
- ADR of IP disputes benefits from a specialized ADR provider
 - WIPO mediators, arbitrators and experts experienced in IP and technology - able to deliver informed results efficiently
- Competitive WIPO fees
- International neutrality
- Services include mediation, (expedited) arbitration, expert determination, and domain name dispute resolution

WIPO ADR

Mediation, Arbitration, Expert Determination

- **Mediation:** informal consensual process in which a neutral intermediary, the mediator, assists the parties in reaching a settlement of their dispute, based on the parties' respective interests. The mediator cannot impose a decision. The settlement agreement has force of contract. Mediation leaves open available court or agreed arbitration options.
- **Arbitration:** consensual procedure in which the parties submit their dispute to one or more chosen arbitrators, for a binding and final decision (award) based on the parties' rights and obligations and enforceable internationally. Arbitration normally forecloses court options.
- **Expert Determination:** consensual procedure in which the parties submit a specific matter (e.g., technical question) to one or more experts who make a determination on the matter, which can be binding unless the parties have agreed otherwise.

Why Consider WIPO ADR?

- Cost of IP court litigation
 - *Calls for expedient solutions*
- Internationalization of creation/use of IP
 - *Calls for cross-border solutions; consolidate in one procedure*
- Technical and specialized nature of IP
 - *Calls for specific expertise of the neutral*
- Short product and market cycles in IP
 - *Calls for time-efficient procedures*
- Confidential nature of IP
 - *Calls for private procedures*
- Collaborative nature of IP creation and commercialization
 - *Calls for mechanisms that preserve relations*

Routes to WIPO ADR

- ADR contract clause electing WIPO Rules
 - WIPO Mediation, and/or
 - WIPO Arbitration / Expedited Arbitration, and/or
 - WIPO Expert Determination
- Model clauses: www.wipo.int/amc/en/clauses/index.html
 - Parties can shape the process via the clause (e.g., location, language, law)
- ADR submission agreement electing WIPO Rules, e.g., in existing non-contractual disputes
- Unilateral request for WIPO Mediation by one party (Art. 4 WIPO Mediation Rules)
- Court referrals

WIPO ADR Options

WIPO Model Clause Example: Mediation followed by Expedited Arbitration

"**Any dispute**, controversy or claim arising under, out of or relating to this contract and any subsequent amendments of this contract, including, without limitation, its formation, validity, binding effect, interpretation, performance, breach or termination, as well as non-contractual claims, **shall be submitted to mediation in accordance with the WIPO Mediation Rules**. The place of mediation shall be **[specify place]**. The language to be used in the mediation shall be **[specify language]**"

If, and to the extent that, **any such dispute**, controversy or claim **has not been settled pursuant to the mediation within [60][90] days of the commencement of the mediation**, it shall, **upon the filing of a Request for Arbitration by either party, be referred to and finally determined by arbitration in accordance with the WIPO Expedited Arbitration Rules**. Alternatively, if, before the expiration of the said period of [60][90] days, either party fails to participate or to continue to participate in the mediation, the dispute, controversy or claim shall, upon the filing of a Request for Arbitration by the other party, be referred to and finally determined by arbitration in accordance with the WIPO Expedited Arbitration Rules. The place of arbitration shall be **[specify place]**. The language to be used in the arbitral proceedings shall be **[specify language]**. The dispute, controversy or claim referred to arbitration shall be decided in accordance with **[specify jurisdiction]** law."

Any dispute, controversy or claim arising under, out of or relating to this contract and any subsequent amendments of this contract, including, without limitation, its formation, validity, binding effect, interpretation, performance, breach or termination, as well as non-contractual claims, shall be submitted to mediation in accordance with the WIPO Mediation Rules.

The place of mediation shall be [specify place].

The language to be used in the mediation shall be [specify language].

If, and to the extent that, any such dispute, controversy or claim has not been settled pursuant to the mediation within [specify timeline] days of the commencement of the mediation, it shall, upon the filing of a Request for Arbitration by either party, be referred to and finally determined by arbitration in accordance with the WIPO Arbitration Rules. Alternatively, if, before the expiration of the said period of [specify timeline] days, either party fails to participate or to continue to participate in the mediation, the dispute, controversy or claim shall, upon the filing of a Request for Arbitration by the other party, be referred to and finally determined by arbitration in accordance with the WIPO Arbitration Rules.

The arbitral tribunal shall consist of [a sole arbitrator][three arbitrators].

The place of arbitration shall be [specify place].

The language to be used in the arbitral proceedings shall be [specify language].

The dispute, controversy or claim shall be decided in accordance with the law of [specify jurisdiction].

WIPO Center Case Role

- Administering cases
 - Under WIPO Rules, or under special procedures
 - Active management: containing time and costs
 - WIPO ECAF (optional online case management)
- Facilitating selection and appointment of mediators, arbitrators, experts
 - WIPO list of 1,500+ neutrals
 - From numerous countries in all regions
 - Specialized in different areas of IP and IT

WIPO Electronic Case Facility (ECAF)

- Simple; secure; instant; location-independent; optional

WIPO Arbitration

WIPO Expedited Arbitration

- One exchange of pleadings
- Shorter time limits
- Sole arbitrator
- Shorter hearings
- Fixed fees

WIPO Mediation, Arbitration and Expert Determination Cases

- IP/IT disputes and commercial disputes, for example:
 - Contractual: patent licenses, software/ICT, R&D and technology transfer agreements, patent pools, distribution agreements, joint ventures, copyright collecting societies, trademark coexistence agreements, settlement agreements
 - Non-contractual: infringement of IP rights
- Domestic and international disputes (25/75%)
- Case venues around the world
- Amounts in dispute from USD 50,000 to USD 1 billion

Relative Time and Cost of Technology Dispute Resolution

Uniform Domain Name Dispute Resolution Policy (UDRP)

- 1999: WIPO-created international administrative ADR procedure
- Allows trademark owners to resolve “clear cut” cases of abusive domain name registration and use (“cybersquatting”)
- Operates outside the courts, but preserves party court option
- Uniform: applicable to all gTLDs “old” (.com, .net, .org, etc.) and “new” (.bike, .nyc, .xyz, etc.)
 - Also available for 75 ccTLDs
- Applicable via mandatory “contract web” between ICANN, registrars, and registrants

UDRP: Principal Advantages

- Significantly quicker and cheaper than court litigation
 - Two-month average; fixed fees (USD 1,500)
- Predictable criteria and results
- Decision (transfer) implemented directly by registrar
- Prevents consumer confusion/brand abuse

The UDRP Test – Three Elements

- Trademark must be **identical or confusingly similar** to the domain name; and
- The registrant of the domain name must have **no rights or legitimate interests** in the domain name; and
- The domain name must have been registered and used **in bad faith**.

- WIPO Jurisprudential Overview of Selected UDRP Questions

www.wipo.int/amc/en/domains/search/overview/index.html

WIPO Overview of WIPO Panel Views on Selected UDRP Questions, Second Edition ("WIPO Overview 2.0")

1. First UDRP Element

- 1.1 Does ownership of a registered trademark to which the domain name is identical or confusingly similar automatically satisfy the requirements under paragraph 4(a)(i) of the UDRP?
- 1.2 What is the test for identity or confusing similarity, and can the content of a website be relevant in determining this?
- 1.3 Is a domain name consisting of a trademark and a negative term confusingly similar to the complainant's trademark? ("sucks cases")
- 1.4 Does the complainant have UDRP-relevant trademark rights in a trademark that was registered, or in which the complainant acquired unregistered rights, after the domain name was registered?
- 1.5 Can a complainant show UDRP-relevant rights in a geographical term or identifier?
- 1.6 Can a complainant show UDRP-relevant rights in a personal name?
- 1.7 What needs to be shown for the complainant to successfully assert common law or unregistered trademark rights?
- 1.8 Can a trademark licensee or a related company to a trademark holder have rights in a trademark for the purpose of filing a UDRP case?
- 1.9 Is a domain name consisting of a trademark and a generic, descriptive or geographical term confusingly similar to a complainant's trademark?
- 1.10 Is a domain name which contains a common or obvious misspelling of a trademark (i.e., typosquatting) confusingly similar to a complainant's trademark?
- 1.11 Are disclaimed or design elements of a trademark considered in assessing identity or confusing similarity?

2. Second UDRP Element

- 2.1 Is the complainant required to prove that the respondent lacks rights or legitimate interests in the disputed domain name?
- 2.2 Does a respondent automatically have rights or legitimate interests in a domain name comprised of a dictionary word(s)?
- 2.3 Can a reseller/distributor of trademarked goods or services have rights or legitimate interests in a domain name which contains such trademark?
- 2.4 Can a criticism site generate rights or legitimate interests in the disputed domain name?
- 2.5 Can a fan site generate rights or legitimate interests in the disputed domain name?
- 2.6 Do parking and landing pages or pay-per-click (PPC) links generate rights or legitimate interests in the disputed domain name?
- 2.7 Does a respondent trademark corresponding to a disputed domain name automatically generate rights or legitimate interests?

3. Third UDRP Element

- 3.1 Can bad faith be found if the domain name was registered before the trademark was registered or before unregistered trademark rights were acquired?
- 3.2 Can there be use in bad faith when the domain name is not actively used and the domain name holder has taken no active steps to sell the domain name or to contact the trademark holder (passive holding)?
- 3.3 What constitutes a pattern of conduct of preventing a trademark holder from reflecting the mark in a corresponding domain name?
- 3.4 Can constructive notice, or a finding that a respondent "knew or should have known" about a trademark, or willful blindness, form a basis for finding bad faith?
- 3.5 What is the role of a disclaimer on the web page of a disputed domain name?
- 3.6 Can statements made in settlement discussions be relevant to showing bad faith?
- 3.7 Does the renewal of the registration of a domain name amount to a registration for the purposes of determining whether the domain name was registered in bad faith?
- 3.8 Can third-party or "automatically generated" material appearing on a website form a basis for finding registration and/or use in bad faith?
- 3.9 Can use of a privacy or proxy registration service form a basis for finding bad faith?
- 3.10 Can the use of "robots.txt" or similar mechanisms to prevent website content being accessed in an on-line archive form a basis for finding in bad faith?
- 3.11 Can tarnishment of a trademark form a basis for finding bad faith?

Global IP Databases, Platforms and Tools for the Connected Knowledge Economy

Irene Kitsara, IP Information Officer,
Access to Information and Knowledge Division,
Global Infrastructure Sector

Outline

- A. Global IP Databases
 - PATENTSCOPE
 - Global Brand Database
 - Global Design Database
 - WIPO DAS
 - WIPO Lex

- B. Tools facilitating understanding of patent data and IP Management-related decisions
 - Patent Analytics (Patent Landscape Reports (PLR) and related resources)

- C. Collaboration platforms
 - WIPO RE:SEARCH
 - WIPO GREEN
 - WIPO Match

The importance of infrastructure in a knowledge economy

“Just as participation in the physical economy requires access to roads, bridges, and vehicles to transport goods, similar infrastructure is needed in the virtual and knowledge economy. However, here the highway is the Internet and other networks, bridges are interoperable data standards, and vehicles are computers and databases” Director General Francis Gurry

- Challenges of:
 - **Access** to relevant information (information sources, tools and search skills)
 - **Analysis, understanding and strategic use** of information (content understanding, decision-making, establishment of partnerships)

A. Global IP Databases: Access point

The screenshot shows the WIPO website homepage. At the top, there is a dark blue header with the WIPO logo and navigation links for Media, Meetings, Contact Us, My Account, and English. Below the header is a navigation bar with links for IP Services, Policy, Cooperation, Reference, About IP, and Inside WIPO, along with a search bar. The main content area features a large heading: "The World Intellectual Property Organization (WIPO) is the global forum for intellectual property services, policy, information and cooperation." Below this is a colorful graphic of interconnected nodes. To the right of the graphic is a section titled "WIPO Translate" with text describing a new AI-based translation tool for patent documents. Further down, there is a section titled "Global services for protecting IP" with a sub-heading "File, manage or search patents, trademarks, designs and appellations of origin. Not there yet? Learn all about intellectual property and how to protect it." At the bottom, there are four icons representing different IP systems: WIPO | PCT (The International Patent System), WIPO | MADRID (The International Trademark System), WIPO | HAGUE (The International Design System), and WIPO | ADR (Alternative Dispute Resolution Domain Name Disputes).

www.wipo.int

Access to the world's IP information

Search technology, terminology and brand-related information in our free global databases. Download our other reference materials: [publications](#), [statistics](#), [economic studies](#) and more.

PATENTSCOPE

57,450,000 international and national patent documents

Global Brand Database

27,520,000 international and national records of trademarks, appellations of origin and emblems

ROMARIN

International marks recorded under the Madrid System

Global Design Database

1,600,000 industrial design registrations from the Hague System and participating national collections

WIPO Lex

14,100 records of national IP laws and treaties of some 200 countries

The infographic shows a bar chart titled "WIPO/LED THE MOST PCT PATENT APPLICATIONS IN 2015". The chart displays the number of PCT patent applications filed in 2015 for various countries. The U.S. is the highest, followed by China, Japan, and Germany. Below the chart, there is a section titled "International IP filings in 2015" with the text "U.S. Extends Lead in International Patent and Trademark Filings." and a link to "Press release | Infographic PDF".

Growing importance of patent information

Patent applications and grants worldwide

[Press release](#) | [Infographic](#) [PDF](#)

The screenshot shows the WIPO PATENTSCOPE website. At the top, the WIPO logo and 'WORLD INTELLECTUAL PROPERTY ORGANIZATION' are displayed. A navigation menu includes 'IP Services', 'Policy', 'Cooperation', 'Reference', 'About IP', and 'Inside WIPO'. A search bar is located on the right. The main content area features the heading 'PATENTSCOPE' and a descriptive paragraph: 'The PATENTSCOPE database provides access to international Patent Cooperation Treaty (PCT) applications in full text format on the day of publication, as well as to patent documents of participating national and regional patent offices. The information may be searched by entering keywords, names of applicants, international patent classification and many other search criteria in multiple languages.' Below this is a button that says 'Access the PATENTSCOPE database'. To the right, there is a world map graphic and a section for 'WIPO Translate - Instant Patent Translation', which states: 'WIPO Translate uses cutting-edge translation technology to produce translations of patent documents with an unprecedented level of accuracy.' At the bottom, there are sections for 'News' and 'Resources'. The 'News' section lists two items: 'WIPO Develops Cutting-Edge Translation Tool For Patent Documents' (dated October 26, 2016) and 'Chemical Structure Search' (dated October 13, 2016). The 'Resources' section lists: 'Video tutorials', 'WIPO Translate', 'Data services', 'External databases', 'Webinars', and 'Frequently asked questions'.

Int.Class	Appl.No	Title	Applicant	Ctr	PubDate
G01N 21/88	201210165493.5	1. 102798635 Method to inspect components of wind turbine		CN	28.11.2012

The invention relates to a method to inspect components of a wind turbine. An unmanned aerial vehicle (UAV) is guided to the component for the inspection. A certain predefined distance between the unmanned aerial vehicle and the component is chosen in a way that high resolution images (IMG 1-IMG 9) of the component are gathered by the unmanned aerial vehicle (UAV). The images are gathered by an image acquisition system (IAS). The inspection is done remote controlled and based on the images, which are gathered by the unmanned aerial vehicle.

(FR) SYSTÈMES ET PROCÉDÉS DE COMMANDE DE VÉHICULE AÉRIEN SANS PILOTE

Abstract: (EN) A pilotless aircraft is provided which can include any number of features. In one embodiment, the aircraft includes a flight controller configured to establish first and second endpoints representing first and second absolute positions in space, constrain movement of the pilotless aircraft to a straight or curved path between the first and second endpoints, receive input from a user of the pilotless aircraft to move the pilotless aircraft forwards or backwards along the straight or curved path between the first and second endpoints, and receive input from the user to independently control an orientation of the camera.

(FR) L'invention concerne un véhicule aérien sans pilote qui peut comprendre un nombre quelconque de caractéristiques. Dans un mode de réalisation, le véhicule aérien comprend un dispositif de commande de vol conçu pour établir des premier et second points d'extrémité représentant des première et seconde positions absolues dans l'espace, pour limiter le déplacement du véhicule aérien sans pilote à une trajectoire droite ou incurvée entre les premier et second points d'extrémité, pour recevoir une entrée en provenance d'un utilisateur du véhicule aérien sans pilote de afin de déplacer le véhicule aérien sans pilote vers l'avant ou vers l'arrière le long de la trajectoire droite ou incurvée entre les premier et second points d'extrémité, et pour recevoir une entrée en provenance de l'utilisateur afin de commander indépendamment une orientation de la caméra.

Designated States: AE, AG, AL, AM, AO, AT, AU, AZ, BA, BB, BG, BH, BN, BR, BW, BY, BZ, CA, CH, CL, CN, CO, CR, CU, CZ, DE, DK, DM, DO, DZ, EC, EE, EG, ES, FI, GB, GD, GE, GH, GM, GT, HN, HR, HU, ID, IL, IN, IR, IS, JP, KE, KG, KN, KP, KR, KZ, LA, LC, LK, LR, LS, LU, LY, MA, MD, ME, MG, MK, MN, MW, MX, MY, MZ, NA, NG, NI, NO, NZ, OM, PA, PE, PG, PH, PL, PT, QA, RO, RS, RU, RW, SA, SC, SD, SE, SG, SK, SL, SM, ST, SV, SY, TH, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, ZA, ZM, ZW.

2. (CN204423159) Novel universal obstacle avoiding module for drone

National Biblio. Data | Description | **Claims** | Drawings | Documents

Note: Text based on automatic Optical Character Recognition processes. Please use the PDF version for legal matters

权利要求书

1.一种新型无人机通用避障模块，其特征是，由距离传感器，惯性传感器、单片机以及无线通信模块组成；其连接结构为：距离传感器，惯性传感器、无线通信模块、分别连接单片机；单片机还分别连接无人机飞控、遥控接收机；其中，距离传感器用于探测无人机与障碍物之间的距离，惯性传感器用于补偿因无人机飞行时的倾斜而引起的距离误差，无线通信模块负责传输无人机的飞行状态，单片机用于数据的处理。

WIPO Translate Beta is a powerful instant translation tool, designed specifically to translate patent texts (currently Chinese to English only). Simply cut and paste text from any Chinese patent document into the box below, then click on “Translate” to get an English translation ([examples of Chinese patent documents from PATENTSCOPE](#)).

This beta version WIPO Translate (Chinese to English) is currently being piloted. Please bear with us if you receive any errors related to capacity issues – we’re currently working on increasing our server power.

New PATENTSCOPE feature: Chemical compound search

The screenshot displays the WIPO PATENTSCOPE interface. At the top left is the WIPO logo, and to its right is the text 'PATENTSCOPE' and 'Search International and National Patent Collections'. A navigation bar includes 'Search', 'Browse', 'Translate', 'Options', 'News', 'User: ikitsara@gmail.com' (highlighted with a red box), and 'Help'. A dropdown menu is open under 'Search', listing 'Simple', 'Advanced Search', 'Field Combination', 'Cross Lingual Expansion', and 'Chemical compounds' (highlighted with a red box). Below the menu is a search input field with a 'Front Page' dropdown and a 'Search' button. The main content area contains a message about patent documents and a 'New Chemical Structure Search functionality' announcement.

Legal status information and how WIPO helps accessing such information

- Legal status data essential for certain types of analysis (FTOs, portfolio analysis, CI/BI)
- Challenge of accessing relevant and up-to date legal status information
- Need to access the primary source of legal status information - Patent Registers/Gazettes for most up-to-date information
- In the context of the Development Agenda Project “IP and the Public Domain”, WIPO prepared a feasibility study on availability, reliability and comparability of patent legal status data (http://www.wipo.int/patentscope/en/programs/legal_status)
- Portal to national patent registers – pilot project
- Towards the development of a new standard: the work of the Legal Status Task Force of the CWS (http://www.wipo.int/edocs/mdocs/cws/en/cws_4_bis/cws_4_bis_5.pdf)

Patent Register Portal

Patent Register Portal

The portal aims to facilitate the verification of legal status of patents and related SPCs by compiling relevant information of national registers of various jurisdictions, e.g. availability of online access to a national or regional register. Please see the [Quick Help](#) for how to use this page, and the [User Guide](#) for detailed information about the page and the portal project. To access a register online, please click on the respective Y in the column 'Online National Register'. The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by WIPO.

Patents and the Public Domain: Future developments

- New Development Agenda Project on the “*Use of information in the public domain for economic development*” (approved by the CDIP in April 2016)
- Project outputs:
 - Practical guides on the identification and use of inventions in the public domain
 - Documentation of experiences and best practices in the identification and use of inventions in the public domain
 - New and enhanced training materials for TISCs
 - Roster of experts on identification and use of inventions in the public domain
 - **Improved Patent Register Portal**

PATENTSCOPE: learning resources

Video tutorials

Tutorials

1. Introduction What is PATENTSCOPE, what is included in its database and how to access it. 	2. Browse Option In this video, you will learn how to use the "Browse by week", "Sequence listing", "IPC Green Inventory" and the "Register Portal" options. 	3. Simple Search The Simple search is the PATENTSCOPE default interface that contains 8 predefined search fields. 
4. Field Combination The Field Combination interface enables you to combine many different predefined search fields. Search using specific search criteria in any of the search fields available. 	5. Advanced search The Advanced Search interface can be used to create complex search queries using an unlimited number of search terms. 	6. Search result list You will learn how to read the search result list.

Global Brand Database

Search the Global Brand Database before filing a trademark application, or to simply browse marks in markets of interest to you. The Global Brand Database is your gateway to more than 27,496,499 records from 35 national and international collections, and the first step in researching whether a mark similar or identical to yours already exists.

Look for trademarks, appellations of origin and armorial bearings, flags and other state emblems protected in various countries around the world, as well as the names, abbreviations and emblems of intergovernmental organizations.

Global Design Database

The screenshot shows the WIPO website header with navigation links: Media, Meetings, Contact Us, My Account, and English. Below the header is a search bar labeled 'Search WIPO'. The main content area features the title 'Global Design Database' and a description: 'Via a single, intuitive interface, the Global Design Database enables free, simultaneous searches of more than industrial designs registered under the WIPO-administered Hague System and/or in participating national collections.' A prominent button reads 'Access the Global Design Database'. To the right, a 'Links' box contains 'Help' and 'Contact us'. A 'News' section at the bottom lists two items: 'WIPO adds more than 1 million new documents to Global Design Database' (dated August 5, 2015) and 'Global Dissemination of IP Data Initiative' (dated May 12, 2015). An 'All news' button is also present.

<http://www.wipo.int/designdb>

WIPO Digital Access System (DAS)

- DAS (Digital Access System) used by 14 IPOs
- A System that allows IPOs and applicants to securely exchange or submit a digital copy of priority documents to multiple IPOs

Participating Offices

The digital libraries of the following offices are participating in the WIPO Digital Document Access Service (DAS), established under the [Framework Provisions for the Digital Access Service](#).

There are two different types of notification possible:

- **Depositing Office** (paragraph 10 of the Framework Provisions): The Office, which is usually acting as the Office of first filing, allows applications to be made available to the Service;
- **Accessing Office** (paragraph 12 of the Framework Provisions): The Office, acting as an Office of second filing, allows the applicant to request that a priority document be retrieved from the Service instead of having to file a certified copy.

At present, the service is operational for patent documents only. One office is ready to deposit and retrieve patent and utility model documents. Documents relating to other IP rights, such as industrial Designs and trademarks will be exchanged through the system once the participating offices have made the necessary operational and technical changes.

The main effects of the notifications, as well as information on digital libraries which have been designated, are summarized in the table below. For more information, refer to the [complete notifications](#).

WIPO DAS

Why use this service?

Applicants

Easy

- Simply ask the office of first filing to add the priority document into the system, and request offices of second filing to use the service for obtaining access.

Secure

- Use of an access code to authorize access;
- Documents exchanged via secure channels;
- Service hosted and administered by WIPO.

Quick

- No need to provide a certified copy of a priority document separately to each office of second filing.

Inexpensive

- No need to pay for multiple copies of paper priority documents;
- No charges by WIPO. Offices can charge, but it is expected that most will not.

Analysis

Sort by: Pub Date Desc View All List Length 10 Machine translation

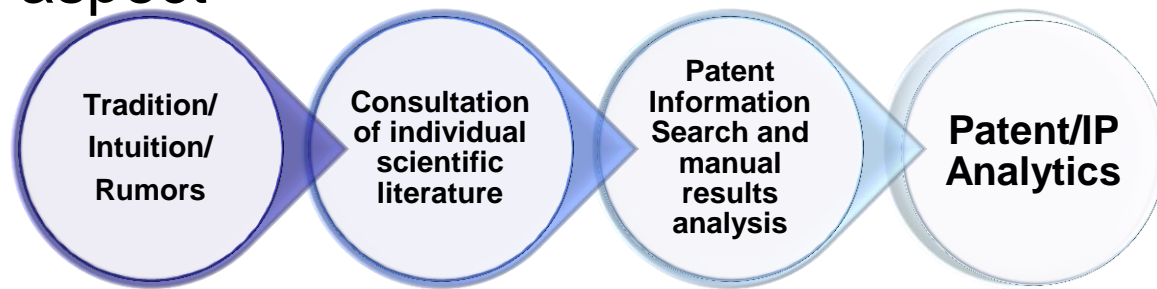

Int.Class	Appl.No	Title	Applicant
1. WO/2016/113766	ELECTRICALLY CHARGING SYSTEM FOR DRONES		
B60L 11/18	PCT/IT2016/000004	SEQUOIA AUTOMATION S.R.L.	
An electrically charging system(l) for drones is described, comprising a ground subsystem (3) and a subsystem (5) on drone, where comprises: a supply grid (7) adapted to supply current through contact to a drone; a charging carpet (8) on which the supply grid (7) unit (14) adapted to control the ground subsystem (3) and to communicate with the subsystem (5) on drone; and wherein said subsystem (5) comprises: a plurality of sockets (24) adapted to get in contact with the supply grid (7) to supply the drone; at least one battery (32) monitored by a control unit (31) connected to the sockets (24); at least one charge balancing device (30) operatively connected to battery (32), battery monitor (34) and control unit (31) to operate the charge on a drone.			
2. WO/2016/113592	INVENTION TO INTERRUPT, DISSOLVE OR DESTROY A TORNADO		
	PCT/IB2015/002632	PERAFAN HOMEN, Pastor	
The function of this invention is to build a Tornadoes' s Destroyer Center to dissolve, or to destroy the tornadoes during their formation stage, or during their projection toward the earth, before they reach the earth and before they reach the earth and before they start their destructive and violent whirling movements. The technology to use will be the commercial fumigation aircraft, the drones (non-pilot aircrafts), or any type of piloted, or non-piloted aircraft, equipped or adapted to in form of spray, to launch "strong streams of hot water", or, if it would be necessary, these above mentioned aircrafts could be adapted to launch streams of extinguishment substances. The above mentioned specially equipped aircrafts will launch strong streams of hot water, or streams of extinguishment substances against the weakest point where be possible to reach the projection's cone of a detected tornado. Once the above mentioned strong streams of hot water, or streams of extinguishment substances, reach and permeate the projection's cone of a tornado, it instantaneously will be dissolved, or destroyed. Therefore, this tornado will not cause damages on the earth, because through this effective system, during the tornado's projection toward the earth they will be fully eliminated.			
3. 20160200415	MULTI-ROTOR SAFETY SHIELD		
B64C 1/06	14991141	Robert Stanley Cooper	
The Multi-Rotor Safety Shield (MRSS) provides a complete and substantial encasement system which can be secured about a Drone, protecting a multitude of aircraft components from contact with any outside disturbance and which can protect the sensitive components from dust, water, wind, rain, snow, fingers, toes, appendages of any kind, and atmospheric changes as example, from disabling the Drone and can protect people, places or things from high velocity spinning exposed rotor/propellers. The MRSS provides rigid non-permeable platform for attaching or incorporating additional safety devices as found in the Drone industry (or other industries) resulting in a safety device that completely prevents the loss a Drone due to the catastrophic failure of any Drone system or combination of systems which would typically result in

How are decisions taken in a knowledge economy?

- Cross sectoral/disciplinary effort: many aspects taken into account (Science/Policy/Economics/Business/Marketing)
 - Policy/Regulations
 - Relevant market definition and analysis
 - Competitors activity and analysis
 - Economic/financial aspect
 - Risk
- Data-driven decisions
- Patent Information: important source of:
 - Technical
 - Business information
 - Legal

What is a Patent Landscape Report (PLR)?

- Research and analysis of **innovation patterns** and **patenting trends** in a specific **technological field/geographical area** using patent information
- Transformation of **raw patent data** through **patent search** (patent databases) into **comprehensive for non-experts patent analysis** (breakdown and analysis of the results, visualization, conclusions)

- Facilitates dialogue between various stakeholders, creating easily understood by non-experts data

What kind of questions can a PLR answer?

(The Answer to The Ultimate Question of Life, the Universe, and Everything, The Hitchhiker's Guide to the Galaxy, Douglas Adams)

- Which **technology trends** exist in which **geographical areas** and how have they developed **over time**?
- Are there gaps or **white spaces**, i.e. areas with little patent protection, that permit business opportunities or give them an added value?
- Which **players** are the **most active** in a said technical area and what is their specific focus and strategy?
- Which **other patents** are **relevant** for a **company's activities** or a **product development/commercialization**? (Infringement/FTO, licensing-in, collaborations)
- Which **patents** are **about to expire** ? Which technologies move in the **public domain** and provide **business opportunities** ?
- What is the **patent portfolio of competitors** and what is the **impact on the company's portfolio** and activities? **Correlation** and **effect on value**

Powerful New Enzyme for Transforming Biomass

Background:

Converting plant cellulose and hemicellulose into fermentable sugars is a major bottleneck in the biofuel industry. Chemical pretreatment and enzyme hydrolysis (breakdown) usually are required.

Among chemical pretreatments, ammonia fiber expansion (AFEX) alkaline pretreatment has many advantages.
