### WHAT IS THE MADRID APPLICATION ASSISTANT?

The Madrid Application Assistant is an electronic version of the official MM2 form that you must use to file an international application under the Madrid System.

The Madrid Application Assistant records all the information required to complete an international application in an intuitive and linear manner. Once completed, the international application will be made available in a PDF format ready for you to submit to the Office of origin for certification.

### WHY USE THE MADRID APPLICATION ASSISTANT?

Information required for your international application can be imported directly from the Office of origin's national/regional trademarks database. This not only saves time and effort, but also reduces the risk of irregularities, thus making the process of filing an international application more efficient and accurate.

WIPO recommends using the Madrid Application Assistant to complete international applications where online filing is not made available by the Office of origin.
