- ▶ **WIPO INSPIRE**
- ▶ WIPO INSPIRE is a global knowledge center for innovation, helping innovators and entrepreneurs make informed decisions throughout the innovation cycle.
- ▶ WIPO INSPIRE provides a unique blend of information and knowledge on patent search, patent analytics, technology transfer, and institutional IP policies, combining reference data with expert insights into resources, tools, and good practice recommendations.

WIPO INSPIRE assists...

Innovators

- In identifying prior research and patenting activity in their area of work by [choosing the right patent database platform](#) for their needs.
- In keeping up-to-date with current trends and developments in their area of work by [mapping the patenting landscape](#).
- In generating value from their innovations, for themselves and for society, by [following good practices in technology transfer](#).
- In building an effective working relationship with research collaborators and funders by [having supportive institutional frameworks](#) in place.

Patent professionals

- In [identifying patent documents](#) to support patent prosecution and other patenting activity.
- In [determining the legal status of patents](#).
- In [gaining an overview of innovations, individuals, and organizations](#) in a given field of technology to guide research, patenting, and business activities.

Entrepreneurs

- In [analyzing the competitive landscape](#) for new products and services.
- In [minimizing the risk of infringing the patent rights](#) of others.
- In [managing technology transfer](#) effectively.
- In [collaborating with researchers](#) in academic and research institutions.

Technology and Innovation Support Centers (TISCs)

- In providing services to innovators and entrepreneurs, including in [patent search](#), in particular [freedom-to-operate analysis](#), [patent analytics](#), [technology transfer](#), and [IP rights management](#).
- In [knowledge sharing and peer learning](#) with [TISC](#) staff and other experts from around the world.

Summary	
Provider	Minesoft
Fee	Fee paying
ASPI	Yes
Database description	<p>Chemical Explorer is Minesoft's tool for simplifying searching chemical information from patent full text, images and R-group table compounds. The index is updated daily to cover new publications from over 100 patent-issuing authorities. The update speed ensures users have access to the latest information.</p> <p>Chemical terminology such as names, including systematic names (e.g. International Union of Pure and Applied Chemistry (IUPAC)), trivial names (e.g. International Nonproprietary Name (INN)), trade names, CAS numbers, condensed line formulas, images (from United States Patent and Trademark Office (USPTO)), R-group table compounds (from USPTO) can be searched. Direct links to external sources are also included to enable further research. Full chemical structure drawing is supported, and the ability to import or export these chemical structures is included as well. Flexible search options include the ability to search by identity, similarity or substructure.</p> <p>Chemical Explorer can be used in conjunction with PatBase and PatBase Express. Results from chemical structure searches on Chemical Explorer can be loaded directly to PatBase and PatBase Express for a detailed review of the patent text. Refer to the PatBase or PatBase Express reports for more information.</p>

Jurisdiction file: Belgium

BELGIUM - BE

Jurisdiction - General Information

Belgium has been a Contracting Party to the Paris Convention for the Protection of Industrial Property since July 7, 1884. It has also been a Contracting Party to the Patent Cooperation Treaty (PCT) since December 14, 1981, but it can be designated only through a European Patent. In addition, it is a party to the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure and the Patent Law Treaty (PLT).

Belgium is also a member of the European Patent Organization (EPO).

More legal information about intellectual property-related laws and regulations of Belgium can be found on [WIPO Lex](#).

Online Patent Register and Online Gazette

Belgium has an [Online Register](#) and an [Online Gazette](#) ("Recueil des brevets d'invention").

Features and search functionalities

The online patent register (eRegister) has a **Dutch, English, French, and German interface**. Information can be found about Belgian patents, European patents (EURO-PCT included) designating Belgium, and Belgian **Supplementary Protection Certificates (SPCs)** for medicines and phytopharmaceutical products.

Through the online patent register you can retrieve information on **Legal Status, Fee Payment, SPCs**, and access the **Dossier/File Wrapper Information** and the **Full Publications**.

The patent register can also be searched by **Applicant/Inventor Name** and by **Priority Data**.

Additional Information

Particularities of patent protection in Belgium

Protection through **SPCs** is available.

In the framework of the Benelux Office for Intellectual Property, the national intellectual property offices of Belgium, the Netherlands, and Luxembourg have developed a common IT system, the Benelux Patent Platform (BPP), to modernize and support all patent related business processes for the three national offices.

While the three national offices are adopting a shared IT system and have made an effort to harmonize their business processes and legal procedures to a large extent, they continue to conduct their work at a national level for patent protection.

Search tips

The patent register of Belgium can be searched by a large number of usual items including names, numbers and dates but also by particular ones like marketing authorization number, last annual fee payment date, pledge data, etc.

An example of data reported as a **Legal Status** is e.g. "lapsed" for patent 1014166.

To access the **Dossier/File Wrapper** Information, select search for "Document", e.g. for patent no. 1022285. It is also possible to access the **Full Publications** through a link to Espacenet available for each patent.

Granted European Patents designating Belgium can be searched online in the patent register by publication number, e.g. "3059479". The European Patent Register is otherwise also accessible at this [link](#).

Patent Analytics

Patent analytics uses [patent information](#) to uncover innovation insights and patterns in a particular area or technology field.

Patent analytics provides data-driven, evidence-based information that allows organizations make better strategic decisions in areas of research and development, innovation policies, IP commercialization and licensing, research collaboration, and many others.

Patent analytics is often carried out in several steps, such as obtaining data, evaluating it and finding patterns, and presenting results.

Patent Landscape Reports

WIPO patent landscape reports provide an overview of the patenting activity in a particular technology field within a country or region, or worldwide. They can inform policy discussions, strategic research planning or technology transfer. They may also be used to analyze the validity of patents based on data about their legal status.

WIPO Technology Trends

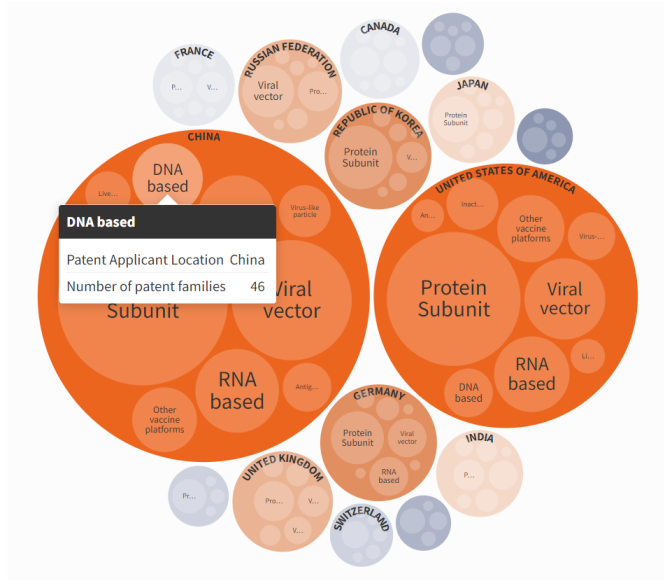

This series of reports goes beyond patent data and includes other types of data, expert contributions and case studies, to provide solid, factual evidence on innovation in specific fields. The resulting knowledge base informs and supports business leaders, researchers and policy-makers in their decision-making.

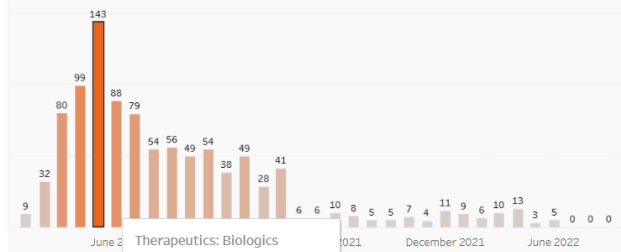

Reports by Other Organizations

A compilation of patent landscape reports many free of charge, published by other organizations and IP officers. You can search reports by topic, key words, issuing country or publication language.

Intellectual Property and Technology Transfer

Technology transfer supports the life cycle of technology, from inception to market diffusion and commercialization.

Intellectual property (IP) is an important instrument at the research and development level. It helps assure the ownership over intellectual findings and the capacity to control the use of IP in line with an institution's mission and core values.

IP is also a powerful business tool to gain position on the market and exclusivity over a new product or process. This makes it an important instrument to attract partners and potentially obtain return on research investment through development collaboration or licensing deals.

Understanding how IP serves technology transfer is the first step towards managing your technology transfer processes effectively.
