PCT/TAS/VII/5

ORIGINAL: English

DATE: March 14, 1978

WORLD INTELLECTUAL PROPERTY ORGANIZATION
GENEVA

PATENT COOPERATION TREATY

INTERIM COMMITTEE FOR TECHNICAL ASSISTANCE

Seventh Session
Geneva, March 13 to 17, 1978

**LIST OF NON-PATENT LITERATURE OBTAINABLE FREE
OF CHARGE OR ON VERY FAVORABLE CONDITIONS BY
DEVELOPING COUNTRIES
(ENLARGED LIST)**

(Addendum to Document PCT/TAS/VII/4)

prepared by the International Bureau

1. This document presents in the Annex the enlarged list of Non-Patent Literature (hereinafter referred to as "the enlarged list") obtainable free of charge or on very favorable conditions by developing countries, referred to in paragraph 5 of document PCT/TAS/VII/4.
2. The enlarged list consolidates previous indications, which were also updated, certain periodicals of the previous lists having ceased to be published.
3. The same presentation and arrangement of entries is used as in the Patent Cooperation Treaty Minimum List of Non-Patent Literature.
4. One additional indication has been added to each entry, in brackets: the main technical field, or fields. The indication is neither to be considered as exhaustive nor as the most accurate in its inevitable shortness. It may be refined as needed in future.
5. In respect of the scope of technical fields dealt with in the various periodicals, it is to be borne in mind that the periodicals are published by industrial enterprises, or similar entities, of widely varying fields of specialization and sizes of production. Therefore, broad terms as well as very specific terms have been used in trying to summarily indicate for each periodical the main subjects covered, i.e. the area of technological activity of its publisher. It is hoped that this indication will facilitate the choice of periodicals to developing countries and will be of assistance in their building up of documentation centers also containing non-patent literature that keeps abreast of technological development, thereby supplementing, or sometimes preceding the information contained in patent documents.

6. The enlarged list is not yet complete. Responses from industrial enterprises contacted by the International Bureau are still coming in. Additional indications and offers of technical periodicals are expected to be received from other interested industrial circles all over the world and from Patent Offices of Contracting States of the PCT who have not yet supplied any, or only fragmentary, information about technical periodicals published by industrial enterprises, or similar entities, in their respective countries.

7. The preparation of the present enlarged list was greatly facilitated by the valuable information received from the Patent Offices and the former International Patent Institute, now part of the European Patent Office, that have already contributed information and participated in the establishment of the PCT Minimum List of Non-Patent Literature. Their continuing help is much appreciated.

8. *The Interim Committee is invited to take note of this report in conjunction with document PCT/TAS/VII/4.*

[Annex follows]

PCT LIST OF NON-PATENT LITERATURE OBTAINABLE FREE OF CHARGE OR ON
VERY FAVORABLE CONDITIONS BY DEVELOPING COUNTRIESExplanatory Notes

1. This Annex sets forth the alphabetical list of the technical periodicals constituting the PCT List of Non-Patent Literature Obtainable Free of Charge or on Very Favorable Conditions by Developing Countries. The present list updates previous bibliographic data of the periodicals, that is, their title and the name and address of the publisher and contains additional entries of periodicals. Further details are given below.

2. The structure of the alphabetical list is as follows:

- (i) entries in the list are numbered consecutively by PCT serial number;
- (ii) each entry is concerned with one periodical only and gives for each periodical
 - the original title of the periodical
 - the publisher
 - the address of the publisher
 - the main technical fields generally dealt with, between parentheses;
- (iii) the language of the periodical is indicated opposite the title: Da stands for Danish, Du for Dutch, E for English, F for French, Fi for Finnish, G for German, I for Italian, J for Japanese, No for Norwegian, Po for Polish, Pt for Portuguese, R for Russian, Sp for Spanish, Sw for Swedish; an asterisk next to the language indication denotes an abstract in that language is included.
- (iv) where the periodical is published in two or more parts, or sections, these are indicated under the title (with a short indication of the fields covered by each one, if not obvious from their subtitle).

3. The titles are arranged alphabetically, subject to the following: when several editions of a periodical exist in different languages, the periodical is listed according to the title of the English edition, if any, with the original title given in parentheses. If no English edition exists, the original title is used for purposes of the alphabetical list.

4. Where no editions in English exist of Japanese and Russian periodicals, the names of these periodicals are indicated first in transliteration of the Japanese and Russian names into Latin characters followed by the translation of the name in English (in parentheses).
