

## Topic 4: **Patent Family Concepts and Sources for Family Information**

Lutz Mailänder

Head, International Cooperation on Examination and Training Section

Pretoria  
February 3, 2020

# Agenda

- Families – **why**
  - Priority rights
- Families – **which**
  - Types
- Families – **when**
  - Do we need to pay attention to different types of families
- Families – **where**
  - Sources of family information

# Further reading on families

Abstract of corresponding document: **WO2007111918 (A2)**

Same US priorities like WO

PCT application number

# Origin of patent families

There are **various reasons** for patent family relations between **distinct applications**/filings:

- A. Patent protection is territorial, i.e. inventors/investors may have to seek protection in various different jurisdictions (“**extensions**”)
- B. ....

- Foreign applications usually claim **priorities** of earlier applications filed in other jurisdictions based on
  - Paris Convention
  - TRIPS agreement
- **Priorities create family relations between earlier and later filings**
- **N.B.: Family relations may exist also without claiming priorities !**
  - Families of PCT national phase entries

# Extended - Simple Family of A

- Extended family is the biggest possible family of application **A** (*blue square*)
- Simple family of application **A** is either equal or smaller (*green circle*)
- If simple family of A is smaller then the extended family includes further simple families

# Domestic families

EA domestic family  
with 2 members

9th application  
included in the  
family

EP domestic family  
with 3 members

# Domestic family

A **Domestic Family** comprises all **subsequent domestic publications** of the **same application** at different prosecution stages, e.g. publication of

- unexamined application (usually 18 months after filing date)
- search report
- granted patent specification
- modified grant after opposition

Such publications are usually distinguished by different **kind codes**, e.g.

- EP123456 A1: Publication of application
- EP123456 B1: Publication of granted patent
- See overview of kind codes:

<http://www.wipo.int/export/sites/www/standards/en/pdf/07-03-02.pdf>

N.B.: Some countries, e.g. US or EA use for a single application different publication numbers in addition to the different kind codes

# Extended – Simple – Domestic Families

extended family  
= simple family

# Members of a patent family

- A patent family comprises
  - Distinct patent **applications**
    - For each application: one or several patent **publications**
- Size of a patent family is usually counted in terms of the number of distinct applications
  - Useful indicator for number of jurisdictions where technology is potentially protected → value of an application

# Patent families with priorities

# Priority claims - sample

The more priorities are claimed, the more complex the family relations may be!

3 priorities  
3 countries

# Second filings abroad

Patent protection for a particular invention is territorial, i.e. inventors may have to seek protection in different additional jurisdictions abroad ("**extensions**")

- **Office of first filing (OFF)**: where an invention is filed for the first time; usually in the country of residence of inventor or applicant
- **Office(s) of second/subsequent filing (OSF)**: where the invention is filed subsequently again to get geographically extended protection ("extensions"), either
  - With claiming priority of OFF (Paris/Trips), or
  - Without claiming priority rights
- (there are no 'offices of 3<sup>rd</sup> filing')

All filings/applications including the "same invention" or parts thereof constitute a **patent family**, e.g. the applications for one invention filed in different countries

# Priorities: Paris Convention of 1883

- Covers patents, designs, trademarks,..
- Facilitates second/subsequent filings abroad
- Equal protection to nationals and foreigners (non discrimination)
  - Foreigners: nationals and residents of any Union country
- Mutual recognition of (Paris Convention) **priority rights**:
  - at OSF: Treatment of application as if filed on date of first filing, i.e. same prior art is to be applied if claimed subject matter is fully disclosed in priority
  - 12 month period to file an application claiming the priority of an earlier application (Art. 4 C (1))
- Permits combination of **multiple priority rights** (same or different countries) (Art. 4 F)
- Permits **additions of technical subject matter** (Art. 4 F)
  - As long as national definition of **unity** is met

# Priorities: Benefits of claiming priorities

## ■ OFF

## ■ OSF

# Article 4 F Paris Convention

"No country of the Union may refuse a priority or a patent application on the ground

that the applicant claims **multiple priorities**, even if they originate in **different countries**, or on the ground

that an application claiming one or more priorities contains one or more elements that were not included in the application or applications whose priority is claimed,

provided that, in both cases, there is unity of invention within the meaning of the law of the country.

With respect to the elements not included in the application or applications whose priority is claimed, the filing of the subsequent application shall give rise to a right of priority under ordinary conditions."

# Article 4 F Paris Convention

"No country of the Union may refuse a priority or a patent application on the ground

that the applicant claims multiple priorities, even if they originate in different countries, or on the ground

that an application claiming one or more priorities contains **one or more elements that were not included** in the application or applications whose priority is claimed,

provided that, in both cases, there is unity of invention within the meaning of the law of the country.

With respect to the elements not included in the application or applications whose priority is claimed, the filing of the subsequent application shall give rise to a right of priority under ordinary conditions."

# TRIPS agreement

- Agreement on **T**rade **R**elated **I**ntellectual **P**roperty Rights
- Provides for 'derived' Paris Convention priority, termed "convention priority":  
Members to TRIPS agreement need not sign Paris Convention but need to apply respective provisions on priority right (**Art. 2 (1)**)

## ***Article 2***

### *Intellectual Property Conventions*

1. In respect of Parts II, III and IV of this Agreement, Members shall comply with Articles 1 through 12, and Article 19, of the **Paris Convention** (1967).

# Patent families without priorities

- An international application is filed for the first time ever with the PCT, i.e. without claiming of any priority
  - All national phase entries together with the international application constitute a '**PCT family**'
  
- **Technical patent families**

Shared priority numbers

Shared PCT application number

# PCT family – simple family

- 'PCT family' includes the international application and all its national phase entries
- Linked through the PCT application number
- Linked as well through the priorities - if any were claimed – which the national phase entries inherit from the international application
  
- There may be additional applications in the simple family which are not PCT NPEs
- For example, a GCC application filed through the Paris route and claiming the same priorities like the PCT application
  
- It may happen that a simple family includes several distinct PCT families; for example PCT/DK2006/000477

# Technical families

- Applications for the same invention or parts thereof filed in different jurisdictions **without claiming priority** constitute a technical family
- Indicators for technical family relation:
  - Same inventor name(s)
    - Right to invention belongs to the inventor(s)
  - Same or similar drawings
    - It is very unlikely that new drawings are prepared for further filings
  - (Same applicant): the right to invention may be transferred/assigned to third parties
  - (Same or similar title)
  - (Same or similar claims)
  - (Same or similar descriptions)
- Technical family relations are usually not recorded in any database (Inpadoc to some extent if detected by EPO examiner)

# Technical families

- Risk of not claiming Paris priority:  
Later filing date implies different prior art, i.e. publications between OFF and OSF filing date are included

- Supplementary top-up searches may reveal more prior art than other search reports obtained for family members using the priority

# Technical families

- Risk of not claiming Paris priority:  
Later filing date implies different prior art, i.e. publications between OFF and OSF filing date are included

# Family concepts

- Paris Convention permits claiming of multiple priorities
- Claiming multiple and different priorities in and from different countries may lead to complex family structures, for example:

OSF1: single application claiming only priority of **JP-xx**

OSF2: single application claiming priorities of **JP-xx + JP-yy**

OSF3: single application claiming priorities of **JP-xx + JP-yy**

OSF4: single application claiming priorities of **JP-xx + US-zz**

OSF5: single application claiming only priority of **US-zz**

- Various concepts / rules exist for constructing family relations
- Largely built on the principle of **shared priorities**
  - **Direct** sharing: completely or partially
  - **Indirect** sharing

# Article 4 F Paris Convention

"No country of the Union may refuse a priority or a patent application on the ground

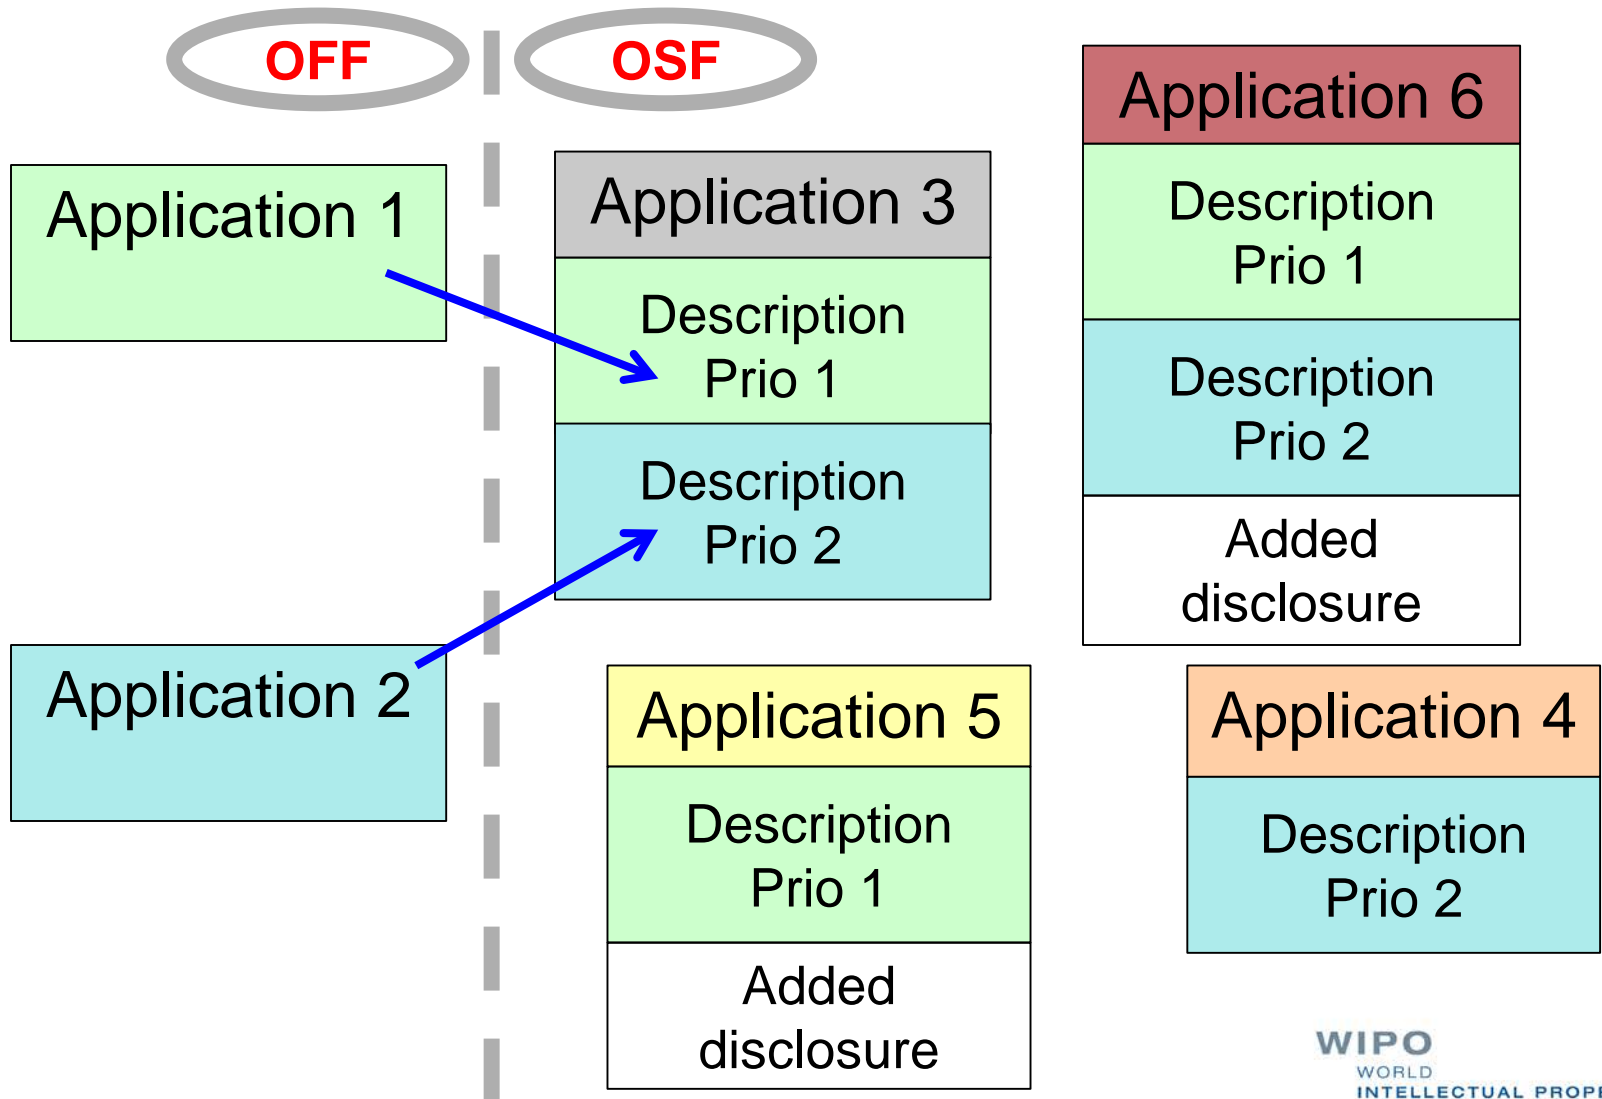

that the applicant claims **multiple priorities**, even if they originate in different countries, or on the ground

that an application claiming one or more priorities contains **one or more elements that were not included** in the application or applications whose priority is claimed,

provided that, in both cases, there is unity of invention within the meaning of the law of the country.

With respect to the elements not included in the application or applications whose priority is claimed, the filing of the subsequent application shall give rise to a right of priority under ordinary conditions."

# Combining multiple priorities

# Technical disclosures of family members

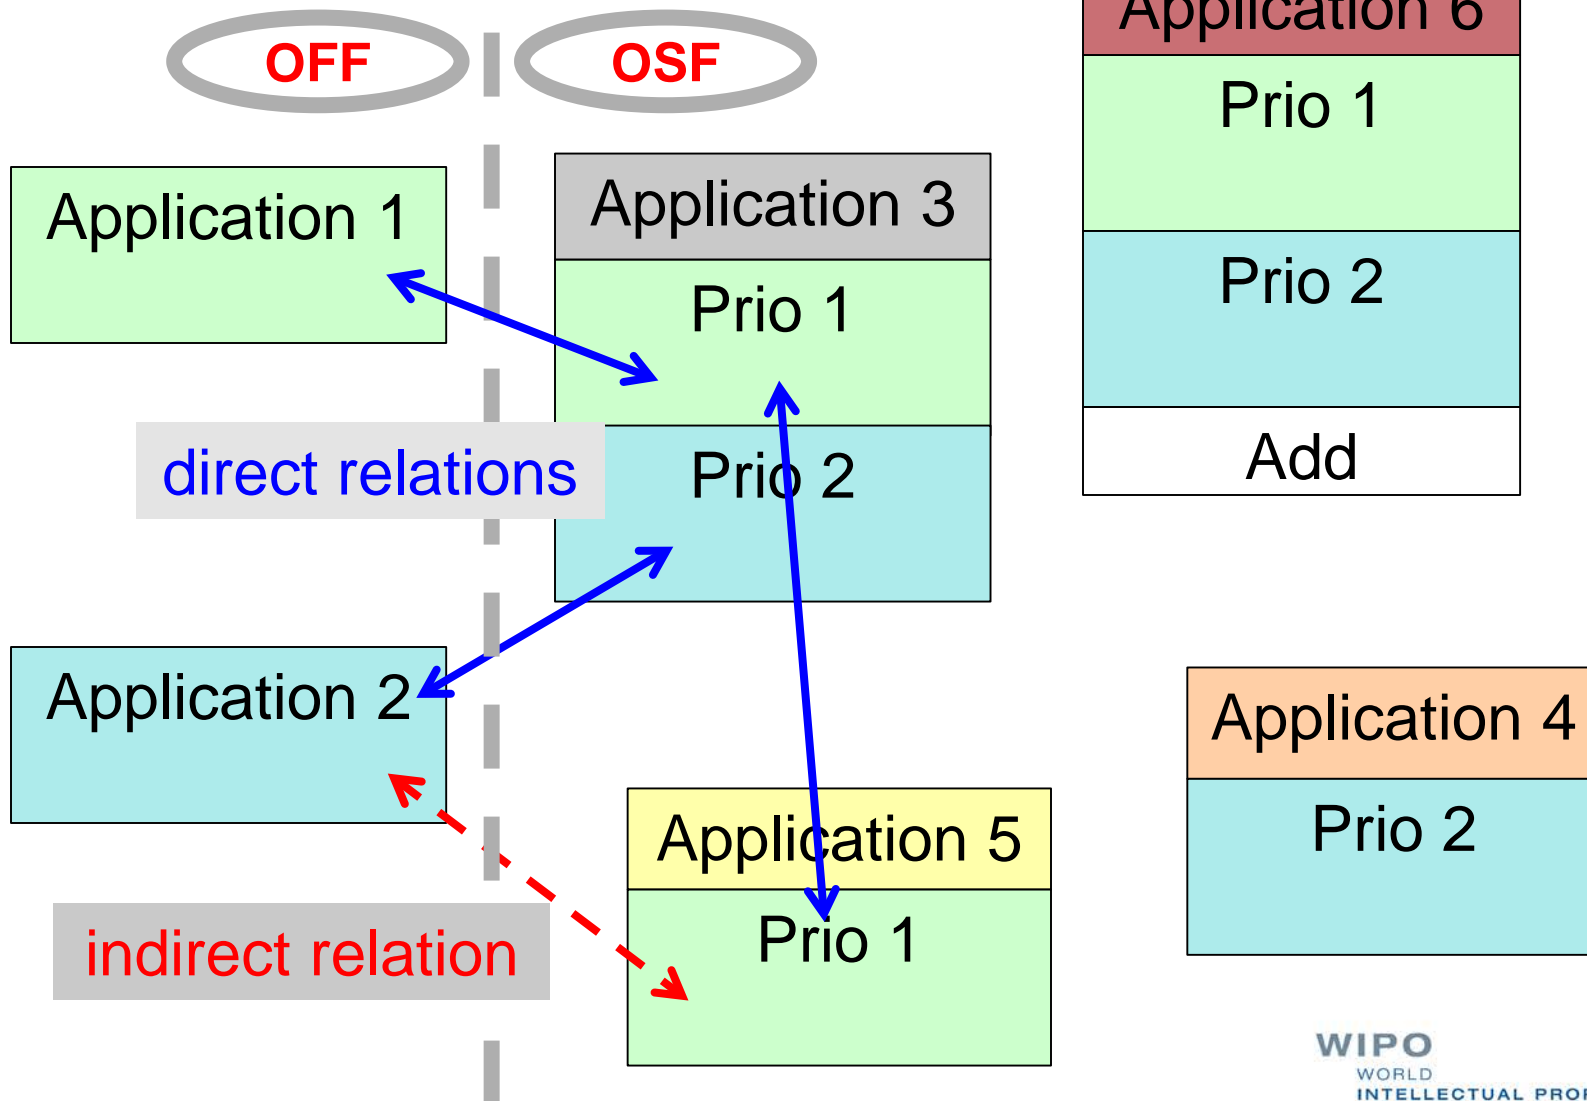

- Even though priorities are claimed, technical disclosure (descriptions and drawings) may differ:
  - Combinations of different sets of descriptions
  - Parts of descriptions may be removed
  - Technical subject matter may have been added
- Claims may also be different since claims need to be supported by description
- Differences are revealed only by comparing descriptions
- Applicants are not obliged to reveal modifications when making a new application
- When are differences least likely?
  - When all claimed priorities are the same

Permitted by  
Paris  
Convention

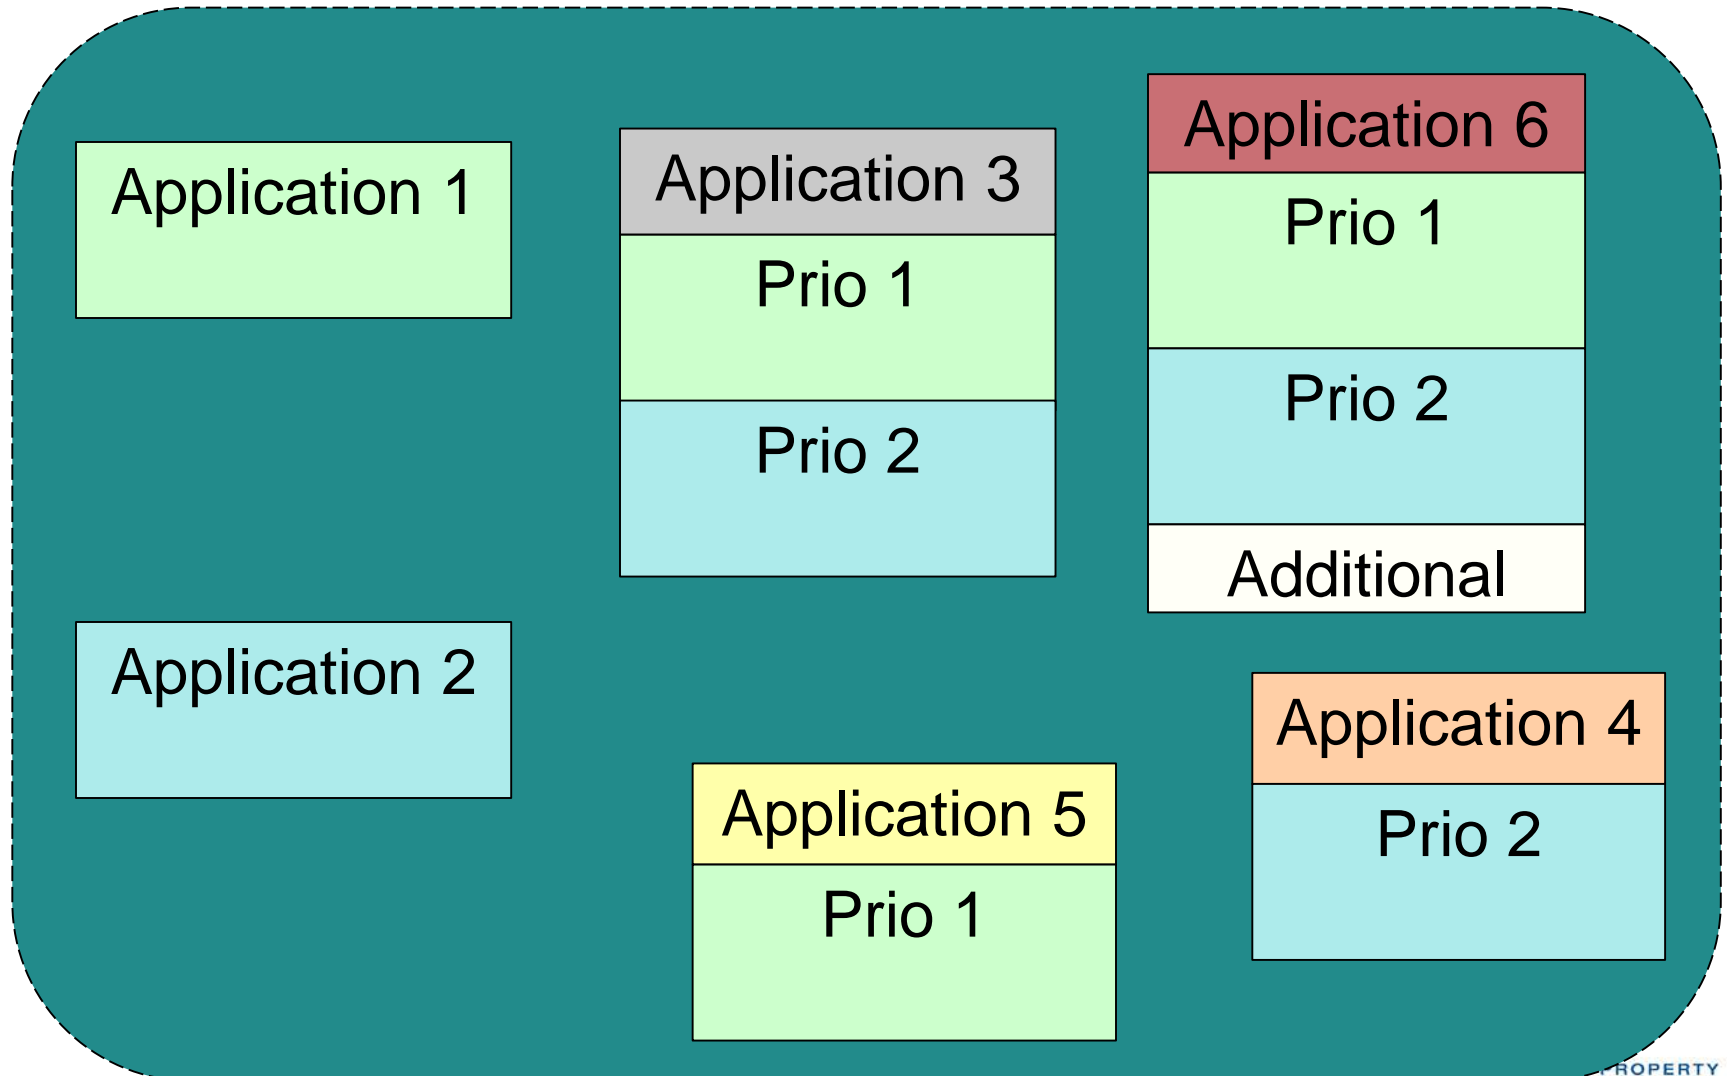

# Family concepts

- Simple family:
  - All members of the family have exactly the same priority or priorities
- Complex family:
  - All members of the family share at least one priority
- Extended family:
  - Any member shares at least one priority with at least one other member
  - Covers indirect sharing of priorities; is therefore the biggest possible family

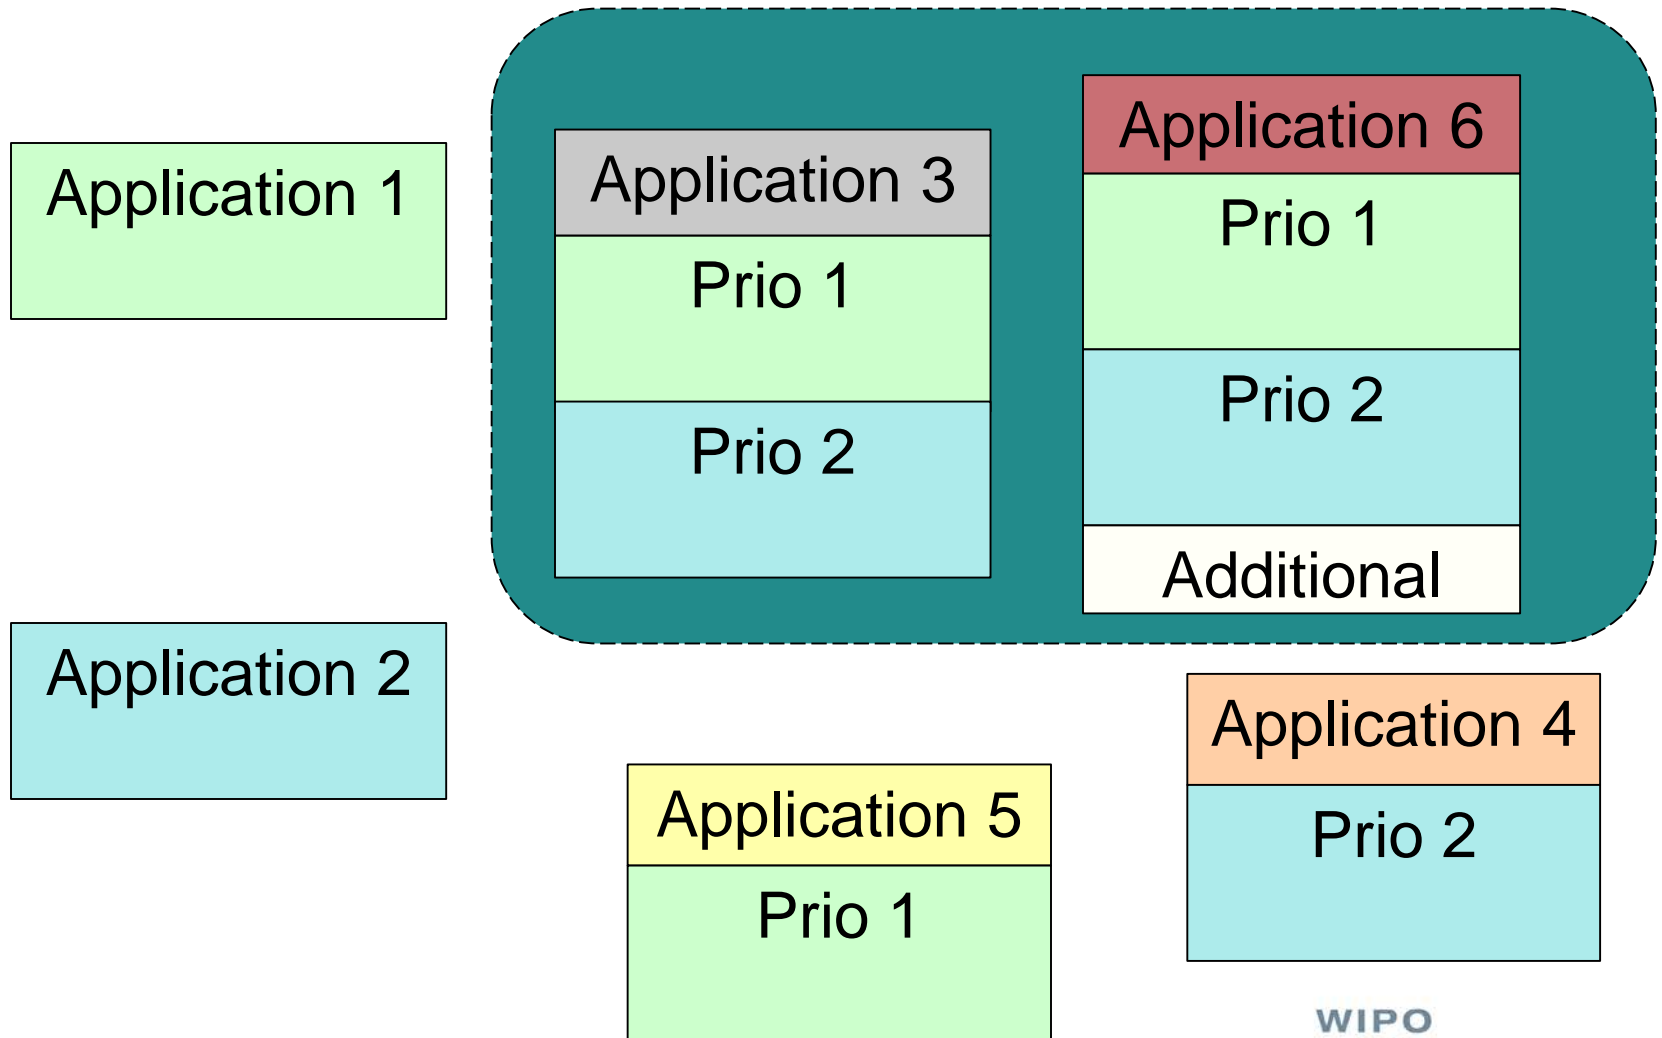

# Multiple priorities

# Extended family

# Simple family

Application 2

Application 4  
Prio 2

# Simple family

# Simple – extended family?

- **Simple family:** all members share the same priorities
- **Simple family (PCT w/o priority):** all members share the same PCT application number
  - It is very likely that descriptions of family members are equal or very similar
  - "Equivalents", "also published as"
  - Ideally, family members are just translations in other languages
  - However, Paris Convention permits additions of subject matter
  - "same invention" or group of very similar inventions
- **Extended (Inpadoc) family:** biggest possible family, includes applications sharing priorities indirectly
  - It is quite likely that descriptions are different
  - More likely that they cover different but related inventions in same area of technology

# Utility of simple families

Since publications belonging to the same simple family are quite likely equivalent, simple family relations are used for

- **Family reduction** of search results: Databases like Espacenet and other professional patent databases include in the search result list only one publication per simple family (which represents the family) because other documents of the same family add no value and only blur up the result list (Patentscope has so far no family reduction)
  
- **Retrieval of language equivalents**
  - Find an equivalent in a language that you understand best
  
- **Database maintenance**, e.g. by EPO, also for, i.e. some data are stored and propagated on the family level, e.g. reclassification data

# PCT family

## Article 28

### Amendment of the Claims, the Description, and the Drawings, Before Designated Offices

(1) The applicant shall be given the **opportunity to amend the claims, the description, and the drawings**, before each designated Office within the prescribed time limit. No designated Office shall grant a patent, or refuse the grant of a patent, before such time limit has expired except with the express consent of the applicant.

(2) **The amendments shall not go beyond the disclosure in the international application as filed** unless the national law of the designated State permits them to go beyond the said disclosure.

Disclosures (descriptions and drawings) of PCT national phase entries are usually equivalent (usually nothing was added; parts may have been removed, though)

# Sources of family information

- **Family building:** family relations are derived from priority and PCT application data
- EPO processes bibliographic data of all publications from all jurisdictions sharing publication data with the EPO (90+ jurisdictions)
- EPO's INPADOC database is major source of such family information, retrievable through:

- Espacenet
- EPO's CCD
- EP Register
- Other free patent information databases, like Depatis, Google Patents,...
- Commercial database, e.g.
  - Thomson/Derwent: **WPI family**
  - Questel/Orbit: **Fampat family**
  - CAS

use widely INPADOC data and additional sources; and apply proprietary family building rules and data cleaning

- Family information (in public databases) includes only information on published family members and only for jurisdictions sharing bibliographic data!

**Quick help**

- Can I export this list?
- What happens if I click on "Download covers"?
- Can I sort the list?
- What happens if I click on the star icon?
- What is a patent family?
- What happens if I tick the "show citations" box?
- What is an INPADOC patent family?
- Are all the documents in an INPADOC family equivalents?
- Why is the same document published several times in the same country?

# Sources of family information: CCD

The screenshot shows the 'Trilateral - CCD' interface. At the top, a search bar contains the number 'US6565803', which is circled in red. Below the search bar, a list of family members is displayed in a table. A red bracket groups the first seven rows of this table. To the right of the table, a yellow box contains the text: 'Simple family ("equivalents") Family members are identified through application numbers'. At the bottom of the interface, a status bar shows 'Simple families: 3' (circled in red) and 'Total family members: 7'. A button labeled 'Get all family members' is also circled in red. A yellow box with the text 'Retrieve extended family' has a red arrow pointing to this button. On the right side of the interface, there is a panel titled 'Inspector: classifications and fields searched' which shows classification details for the selected family members.

# Request to disclose family information

- India, for example, systematically requires applicants to disclose family information
- Disclosure to be found in dossier
- [WO2011162761](#) in Patentscope NPEs: 9632/DELNP/2012
- [WO2011162761](#) in Espacenet family: no India
- [Example](#)

# Indian "Form 3" (patent family disclosure)

**FORM 3**  
**THE PATENTS ACT, 1970**  
**(39 of 1970)**  
**&**  
**The Patents Rules, 2003**  
**STATEMENT AND UNDERTAKING UNDER SECTION 8**  
**(See section 8, rule 12)**

We, THE TRUSTEES OF THE UNIVERSITY OF PENNSYLVANIA, 3160 Chestnut Street, Suite 200 Philadelphia, PA 19104, USA, US hereby declare:

that we, who have made this application No. 8136/DELNP/2015 filed on September 9, 2015 alone made for the same/substantially same invention, application(s) for patent in the other countries, the particulars of which are given below:

Name of the Country	Date of application	Application No.	Status of the application	Date of Publication	Date of Grant
AU	17.03.2014	2014232335	Granted		01.09.2016
CA	17.03.2014	2,898,131	Pending		
CN	17.03.2014	2014800124958	Published		
EP	17.03.2014	14763920.7	Published

## COMBINATION FORMULATION OF TWO ANTIVIRAL COMPOUNDS

*In order to contact Gilead Sciences about this patent,*

**Participant:** GILEAD

Disclosed are pharmaceutical compositions and methods for the preparation of a crystalline form of a combination of two antiviral compounds (I); and an effective amount of said combination of two antiviral compounds. Also disclosed are methods for the preparation of a crystalline form of a combination of two antiviral compounds.

# Families within one jurisdiction

- National, regional, PCT jurisdictions
  - National families
  - Domestic families

# Origin of patent families - reasons

There are **various reasons** for patent family relations between **distinct applications/filings**:

- A. Patent protection is territorial, i.e. inventors/investors may have to seek protection in different jurisdictions (“extensions”)
- B. An application may have certain deficiencies (e.g. lack of unity,...); a subsequent application seeks to heal them
- C. Further improvements of an invention; a subsequent application includes additional further improvements, i.e. new art is added
- D. (Modification/amendment of claims without adding new art)

These reasons may co-occur, i.e.

- a later foreign filing may include added art and/or new claims
- a subsequent domestic filing may include both corrections and added art!

# Origin of patent families - priorities

- Foreign applications usually claim **foreign priorities** of earlier applications filed in other IPOs according to
  - Paris Convention
  - TRIPS agreement
  - (PCT)
- Domestic filings (at same office for reasons B and C) may claim a **domestic/internal priority** of an earlier domestic filing
  - Claiming of domestic priority rights is regulated by respective national legislation

# Claiming national priorities

US '138' claims  
3 national  
priorities

# Domestic second filings

## „Continuation (in part)“

- New national/local application claiming priority of one or several previous national/local applications
- "in part": **Additions of technical subject matter to initial disclosure** of parent (priority) application or other amendments are **permitted**, and usually **intended**, only part of the new application originates in earlier application
- (Up to 12 months after filing date of claimed priority)

## Patent of addition (in some jurisdictions)

- Improvement of original invention of parent patent
- **Unity** with parent patent to be given; i.e. as if further independent claim of parent patent
- Depends on validity of parent patent
- Request possible up to 18 months after filing of parent patent

# Domestic second filings

## Division (US continuations)

- E.g. for healing a lack of unity: **mandatory division** Paris Art. 4 G (1)
- Permits filing of an application with new set of claims based on previously filed disclosure (i.e. **no additions to initial disclosure** permitted): **voluntary division** Paris Art. 4 G (2)
- Initial disclosure (parent application) may comprise several inventions
- Lack of unity is given only if different inventions are "claimed", i.e. if covered explicitly by claims
- Strategic approach by some applicants
- Divisions are possible usually anytime as long as parent application is pending (EPC: only within 24 months after 1st office communication)
- Retains application date and claimed priorities; no explicit priority claim type relation to parent application

# Further sources of family information

- National registers (e.g. US PAIR) include patent family information on national level (domestic families, national families (continuation in part), **divisions**)
- WIPO CASE
  - Applies concept of 'complex families'
  - Derived from priority data in CASE database
  - Families includes therefore (currently) only applications recorded in CASE database
  - Espacenet family information is (currently) more comprehensive
- Patentscope has no family information except for PCT national phase entries

# EP-Register - divisions

# Overview of types of patent families

## Family relations **based** on priorities

- National families (national/internal/domestic priority)
- Filings abroad:
  - Using Paris convention (or TRIPS) priority only
  - Second filings with PCT with Paris (TRIPS) convention priority claim(s)

## Family relations **not based** on priorities

- Technical families
- (Continuations/Divisions)
- First filings with PCT
- Domestic families

# Summary

- Extended families are the largest possible families and may include
  - Several simple families
  - Several domestic families
  - Several national families
- A single application belongs at the same time to
  - One domestic family
  - One national family
  - One simple family
  - One extended family
- A simple family may include
  - Several domestic families
  - Several national families
- Families may have only a single member

Thank you
