Introduction

Intellectual property may be generally described as a set of legally enforceable rights emanating from intellectual creativity. Intellectual property is traditionally divided into two sections — industrial property and copyright. Industrial property encompasses the rights relating to intellectual property objects such as inventions, distinctive signs, industrial addesigns and rules against unfair competition. Whereas copyright protects the rights of the authors of original literary and artistic works, the rights of the performers, the producers of sound recording and broadcasting organizations are called neighbor in grights or related rights.

Inventions are protected under the patent system. A patent is granted to an invention whichisnew, involves an inventive step and is industrially applicable. An invention -asolutiontoaspecificproblemintechnology -mayrelateeithertoaproductorprocess.An inventionisnewifitisnotanticipatedbypriorart.Priorartincludeseverythingdisclosedto thepublicbyanymeansanywhereintheworld. Anindustrialdesignisadesignwhichgives anewappearan cetoausefularticleinindustryorhandicraft.Onlyanewindustrialdesignis protectedunderthelaw. Anewindustrialdesignmeans an industrial design which has not beenmadeavailabletothepublicanywherethroughanymeans. Atrademarkmeans an y visiblesignservingtodistinguishthegoodsofoneenterprisefromthoseofotherenterprises whereasaservicemarkmeansanyvisiblesignservingtodistinguishtheservicesofone enterprisefromthoseofotherenterprise. A commercial name is a name ordesignation identifyingtheenterpriseofaperson. Any act contrary to honest practices in industry or businessismadeunlawfulunderthelawoftheprotectionagainstunfaircompetition. A geographicalindicationisanindicationwhichidentifies agoodasoriginatinginacountryor aregionorlocality in that country, where a given quality, reputation or other characteristics ofthegoodisessentially attributable to its geographical origin. Such geographical indications are protected under the elaw of geographical indications. Information is protected under the lawofundisclosedinformationsolongassuchinformationissecret, has commercial value becauseitissecret, and is kept secret. The rights of the authors of original literary and a rtistic worksareprotectedundercopyrightlaw. The law of related rights protects the rights of the performingartists to their performances, the producers of sound recording to their sound recordings, and of broadcasting organizations to their broadcas

TheOxfordAdvancedLearnersDictionarydescribesfolkloreas"thetraditions, stories, customsetc.ofacommunity".Insubstance, folkloreisthe "wisdomofthepeople". AccordingtotheUNESCO/WIPOModelProvisions(1982), expressionsoffolklore are understoodasproductionsconsisting of characteristic elements of the traditional artistic heritaged eveloped and maintained by a community or by individuals reflecting the traditional artistic expectations of such a community. Thus folk lore has rece ived different descriptions or definitions covering a broader range of subjects, activities and practices such as "literary, artistic, religious, scientific, technical and other traditions and productions which are transmitted from one generation to another resolutions or community.

Theissuewhetherfolklorecanbedulyprotectedwithintheexistingintellectual propertysystemattractsalotofdebateand demandscarefulconsideration. This discussion paperattempts to highlight certain relevant areas in order to facilitate assession of constructive deliberation.

SomeFundamentalIssues

Inanalysingtheexistingintellectualpropertysysteminthecon textoftheprotectionof folklore, a few fundamentalissues concerning the subject necessarily arise. The existing intellectualpropertysystemisbasedonindividualorprivateownershipandcentresaround commercialpurposes.Onthecontrary,folklorei ssomethingincommunityorcommon ownershipandinmanycasescommercialpurposesaretraditionallyunknowntofolklore.It isthereforeuncertainwhethertheexistingintellectualpropertysystemhasanyapplicationto ssueastowhethertheparticularnationorcommunityisthe theprotectionoffolklore. Thei owneroffolklorewithinthemeaningofthepresentlegaldefinitionofownershipisimportant and may result in other related legalissues. It is a rguable that they are not actually the owners offolklorebutmerelytheholdersorpossessorsoffolklore.Inthecaseofcommunityor common owners hip the question as to who actually constitutes that community or nationdemandscarefulexamination. Thenature and the scope of the legally enforce ab lerightsthat theownersoffolkloreareentitledto, and the enforcement of such rights, would be some othercrucialissues. The persons who have the statustogoto Court, the nature of desirable remedies, and in the case of payment of compensation, th osewhoareactuallyentitledtosuch compensation, needcareful attention. Certain items embraced within the meaning of folklore mayspreadthroughmanynationalboundariesaswellasthroughawholeregion.Insucha case, the ownership and the enforce mentofrightsrelatingfolklorewouldbefurther complicated. The term of protection for most intellectual property rights currently last sonly for a limited period of time. The rights relating to folklore cannot be so restricted to a limited termofpro tection. Folklore has been in the public domain forcenturies. The formation and $enforcement of legal norms and practices in respect of creations in the public domain are {\it constant}. The constant is a constant of the co$ boundtobeahardexercise. The question is whether the innovations involving or basedon folklorecanbemeasured with the standards of the western concept of innovation. The protectionandmanagementoffolkloremaybesubjecttodifferentlegalandcustomarynorms indifferentcommunities who own the folklore. Such diverse approac heswouldmakethe taskofproducingareasonableharmonizedlegalmechanismmoredifficult. Theactual effectiveness of national laws as an instrument for the protection of folklore in the absence of the contraction of the contrrecognizedandrespectedinternationalnormsshouldb eproperlytested.

Application of the objects of existing intellectual property system

Ontheonehand, the application of various objects of intellectual property to the protection of folklore faces certain difficulties common to many of these objects or peculiar to a particular object. On the other hand, certain objects have some potential as an active mechanism for the protection of folklore. The following observations can be made in this regard.

COPYRIGHT

Copyrightlawcannotbethecorrectmec hanismfortheprotectionoffolklore.It concernstheeconomicandmoralrightsoftheindividualauthorsortheownersoforiginal literaryandartisticworkswhichareprotectableforaspecifiedperiodoftimewhereas folkloreistheresultofaconti nuousandimpersonalprocessofcreativityinacommunity. Folklorebelongstoacommunityincommon.

Article 15 (4) of the Berne Convention indicates the possibility of granting protection for expressions of folklore. However, the efficacy of this a rticle is to be tested and the outcome is doubtful. Moreover, the Berne Convention concerns the protection of works within the copy right system. The regime of folklore extends beyond the ambit of copy right law.

Copyrightprotectionmayhaveindirecta pplicationtotheprotectionoffolkloretoa certainextentasfarascollectionsandcompilationsofexpressionsoffolkloreareconcerned. Therightsrelatingtotheseproductionsmaybelongtothepersonwhohascreatedsuch productionsusinghisinte llectualskills. However, such protectionis also not free from complications. For example, the folklore belongs to a community in common and compilation or collection of folklore may be long to the individual who creates it. A chieving a compromise between these two ends may be an interesting task. Similarly, the authorization of the acts of such collection and compilation, abuse of such productions, and benefits having will be some other crucial issues.

RelatedRights

Itispossibletoarguethatexp ressionsoffolkloremaybeprotectedunderthelawof relatedrightsandthereforetheprotectionoftherightsofperformingartists,phonogram producersandbroadcastingorganizationsmaybeachievedthroughthemechanismofrelated rights. Theprotec tionaccordedunderthisareaoflawisindirectinthesensethatprotectionis notextendedtofolkloreproper. Relatedrightsdonotprotectexpressionsoffolkloreagainst unauthorizedperformances, fixations, reproductions, broadcastingorothercom municationto the public. Thus national laws as wellasthe Rome Convention, the Phonograms Convention and the Satellite Convention cannot offer aviable protection within their parameters. Protection under related rights involves some other complicatio nsas well. For example, folklore is not limited to the areas that may be protected under the concept of related rights.

IndustrialDesigns

The law of industrial design does not protect traditional designs in the traditional arts and crafts because they are not new as required under the law. Community owners hip and the protection for a limited period of time are some other issues which are hard to overcome. However, the designs of traditional artisans and handicraft producers who build upon folklore traditions but introduce their own original elements into the set raditions may be protected under industrial design law.

GeographicalIndications

Thelawrelatingtogeographicalindicationsprotects indications which identify a good as originating in a particular territory or a region or locality in that territory, where the given quality, reputation or other characteristic of the good is essentially attributable to its geographical origin. The productions involving folklore which fall within the ambit of geographical indications may be protected under the law of geographical indications. However, this law may not cover the whole range of subjects coming under the purview of folklore.

UndisclosedInformation

Thelawofundisclosedinformati onprotectsinformationwhichissecret, has commercial value because it is secret and is kept secret. The remay be certain instances where undisclosed information can accord protection to certain areas of traditional knowledge of the communities. Howeve r, this protection may be very limited in scope because much of the information in the folklore regime is not secret. Moreover the legal framework of undisclosed information is purely based on private ownership and commercial interest. Certain holderso ftraditional knowledge, for example, do not use their knowledge for commercial purposes at all.

UnfairCompetition

Anyactofcompetitioncontrarytohonestpracticesinindustrialorcommercialmatters constitutesanactofunfaircompetition. Unfai rcompetitionlawmaycounterunfairtradeand industrialactivitiesinvolvingfolkloresolongassuchactivitiesfallwithintheambitofunfair competition. Asthislawconcernstheunfairactsinindustryorcommerceonly, itdoesnot protectfolklore proper.

DistinctiveSignsandNames

Eventhoughindividualmarksmaynotbeinapositiontoofferanyprotectionto folklore, certificationmarks and collective marksmay be useful as a protective device. The genuine holders of folklore may certifyt hat the goods concerned satisfy the prescribed standards relating to origin, material, mode of manufacture, quality, accuracy or other characteristics. By way of collective marks, an association of traders show that a member belongs to the association. The semarks may offer some kind of indirect protection intrade activities involving folklore but such protection is not capable of offering a satisfactory solution. The law of tradenames does not also accordany kind of protection to folklore.

PATENTS

Thelawofpatentscannotprovideafullsolutionfortheprotectionofthescientific heritageofcommunitiesbecausesuchknowledgeisnotpatentableasitisalreadyknownand partofpriorart.Onthecontrary,theinventionsbasedonorrelatedto orderivedfrom traditionalscientificheritagemaybeprotectedunderthepatentlawuponthefulfillmentof theconditionsofpatentability.

UNESCO/WIPOMODELP ROVISIONS

UndertheUNESCO/WIPOModelProvisionsexpressionsoffolkloreareunderstooda productionsconsistingofcharacteristicelementsofthetraditionalartisticheritagedeveloped andmaintainedbyacommunityorbyindividualsreflectingthetraditionalartistic expectationsofsuchacommunity. These provisions may offersome sorto fprotection within the national boundaries but their competence as a via ble means of protection is doubtful. The Model Provisions concernonly traditional artisticheritage and not other areas such as scientificheritage. The Competent Authority, its constitution, its authority and power and the execution of the given powers may run into difficulties. The exception stoauthorization are also complicated. For example, the concept of borrowing of expressions of folklore is something which is not very clear. The establishment and proof of infringement of folklore

rightsisdifficultduetovariouspracticaldifficulties. The difficulties include that often the expressions of folklore are not properly documented and the documentation, if any, is not property authenticated. The folklore may be illicitly used by outside forces merely by naming the act of illicituse "aninnovation" or acreated original work. Moreover, the national laws will be in effective if the international community do not respect the rights of the holders of traditional knowledge, including folklore.

NegativeProtection

Certainobjectsofintellectualpropertyprotectedunderexistinglawmayhelpthe holdersoffolkloretostopordiscourageothersfromencroachingupontheirrigh tsand interests. Forexample, any attempt to patent traditional knowledge may be opposed under the patent law on the ground that the invention is not new. The law of industrial design may be used to defeat the attempt storegister traditional designs as new industrial designs. The law relating to geographical indications may counter the attempt stomisus esuch geographical indications. However, it should be noted that the opposition proceedings in intellectual property of fices and Courts are expensive and time consuming. The poor holders of traditional knowledged on other expensive and time consuming. The poor holders of traditional knowledged on other expensive and time consuming. The poor holders of traditional knowledged on the vector of traditional knowledged on the vector of traditional knowledged on the vector of the vector

<u>PracticalIss uesintheAcquisitionandEnforcementofIntellectual</u> <u>PropertyRightswithandwithoutFormalities</u>

Theacquisitionandenforcementofintellectualpropertyrightsinfolkloreisrather complicated and demands careful attention both nationally and intern ationally.Folkloreis,as farastheexistingintellectualpropertyregimeisconcerned,inthepublicdomain.Itbelongs toacommunity. It is developed and maintained by a community without any formal requirement. However, introduction of somekind offormality, nationally and probably internationally, would facilitate the identification of the actual holders of folklore and the enforcementprocess. Issuessuchasthenature of the rights of the persons or groups who own orpossessfolkloreandthe personsorgroupswhocanacquiresuchrightswouldbesome examples of practical as well as theoretical difficulties. Required formalities are a hardissue. Collection and documentation is not an easy exercise. Certain rituals and arts are associated wihreligions and are not expected to be performed or used in all contexts. They cannot be acquired, developed and enforced by every body. The developments based on or related tofolklorewouldcreateanotherseriesoftheoreticalandpracticaldifficulties issueiswhetherthewesternconceptofinnovationcanhaveapplicationtotheinnovations involvingfolklore.

<u>PracticalIssuesintheExerciseandCollectiveManagementofIntellectual</u> <u>PropertyRightsinFolklore</u>

Asindicated above, the exercise of intellectual property rights in folklore is surrounded by many practical is sues and difficulties. The determination of actual owners or holders of folklore, the nature of the enforceable rights, proof of ownership, lack of awareness and propereducation, financial constraints and poverty, difficulties in enforcing such rights in for eignlands, misuse of poverty and ignorance of the holders of folklore by outsiders,

inadequatestateparticipation, absence of proper mechanisms for preservati on, absence of an organizedcommercialenvironmentinmanydevelopingcountriesandnewchallengesposed byinformationtechnologyareamongthosedifficulties and issues. The collective managementsystemofcopyrightinitspresentformmaynotbedirec tlyapplicabletothe exerciseandmanagementoffolklorerights. The current system of collective management is basedonindividualownershipwhereasthefolklorerightsarebasedoncommonorcollective ownershiportrusteeship. Without firstresolvin gthebasicissuesinvolvingtheprotectionof folklore, the attempts to introduce a collective management system would fail to achieve the desiredobjectives. Folklorerights are actually exercised and managed collectively by the The collective exercise and management of such rights by different holdersofsuchrights. ownersorholdersoffolkloreinacountryorinaregionwouldbeadesirableprocess. The emphasisshouldbeplacedoncollectiveexerciseandmanagementofsuchrightsregionally and internationally. The individual communities or groups of people who hold the folklore mainlyindevelopingcountriesdonothavefinancialoranyotherresourcestochallengethe violation of their rights mainly inforeign countries. The establishment of managementsystemwouldbeapracticalanswertothisissue. Manyoftheissuesreferredto aboveinrespectoftheexerciseoffolklorerightsareequallyrelevanttocollective managementaswell.

PreservationandConservation

 $Traditional knowledge, including folklore, is fast disappearing due to many reasons. \\ Such knowledge may be long to a particular country or nation or community but$

isofgreatimportancetotheentirehumansociety. Traditionalknowledgemaybealong lastingre wardthatitsholderscanoffertomankind. Itshouldthereforebepreserved and conserved for the benefit of not only itsholders but also the human family as awhole. Legal protection would be meaningless if at least the existing knowledge is not preser ved and conserved.

Collection and Documentation

The collection and documentation of folklore could be considered a prerequisite to a successful program of protection and conservation. The collection and documentation of folklorewouldfacilitate interalia identificationoftheactualownersandfolkloreproper, proof of ownership or trusteeship, enforcement process and promotion and development of existingfolklore.Forexample,thecollectionanddocumentationoftraditionaldesignswould enableth eownersandtheCourtstoidentifytheexistingdesignsandotherdesigns independentlycreatedordrivedfromorbasedonfolklore. The documentation may be done bywayofphotographs,drawingandelectronic media including the compilation of databases. Inthecaseofgeographicalindications, it is necessary to identify, for example, the characteristicswhichareessentiallyattributabletothegeographicaloriginoftheconcerned goodintheareaconcerned. The collection and documentation of scienti ficheritagewould provideadatabaseconsistingofpriorartinvolvingtraditionalknowledge. Itshouldbe observedthatcollectionanddocumentationentailanumberofpracticalissuesanddifficulties involvingareassuchastheappropriatepersonsor authoritieswhocandocumentitandwho canauthorizedocumentation, the need of a competent authority for authorization of collection, compilation and documentation, the nature, constitution and power setc. of such competentauthority, the collection of eesorroyalties and the use of collected royalties.

The process of collection and documentation is hampered in many countries due to a lack of financial and human resources, propered ucation, awareness, programs for conservation and preservation and facilities in modern technology. In certain instances the holders of traditional knowledge are reluctant to divulge their knowledge to outsiders for many reasons such as fear of misuse of their knowledge and lack of mechanisms to share benefits.

Concluding Remarks

The protection of botheconomic and moral rights of the holders of folklores hould receivedueattentioninlawaswellasinpractice. The existing intellectual property regime maynothavethecapacityandabilitytoofferaviableandpra cticalsolutiontoalltheissues involvingtheprotection of folklore. All the same, some of the norms in the current intellectualpropertyregimeappeartohaveapplicationtotheprotectionofvariousaspectsof folklore.Itwouldbeadvisabletomake attemptstousethecurrentintellectualproperty systemandtoputitintotestintheprocessoffindingsuitableprotectivemechanisms. The presentsystemcanbeexaminedinordertofindout interalia howeffectiveandefficientitis. Suchanattemp twoulddemonstratewheretheshortcomingsoftheexistingsystemareand howthey can be remedied and improved. The current systemal ready embraces sound legal norms, effective enforcementand administrative mechanisms as well as appropriate internationalarrangements. However, the introduction of a new regime would involve the developmentofnewnorms(bothsubstantialandprocedural)andenforcementand administrative mechanisms. The human and financial resources would be another complicatedissue. Ontheotherhand, where the existing norms are not satisfactory, the introduction and implementation of new principles, including mechanisms for effective enforcementandmanagement, seems necessary. The public domain legislation of a country can be seen as a progressive effort, but such legislation does not have application beyond the boundaries of the country. The protection should be accorded nationally and internationally. Theinternational cooperation and collaboration in monitoring infringement offolklorerights, benefitmonitoring and sharing, dissemination and development of folklores hould be promoted. Aglobal information network such as WIPON et could be of much use. The exploitationoftraditionalknowledgeincludingfolkloreonlywithth econsentofitsholders, benefit sharing arrangements and active participation of the holders of traditional knowledgeinitsmanagement, as well as development and promotional activities are certain are as which needconstructiveattention. The access to anduseoftraditionalknowledgeshouldbe rationalizedwhereastheunauthorizedaccessanduseshouldbeprohibited, wherenecessary. Atthesametime, active measures should be taken to conserve and promote existing traditionalknowledge,includingfol klore.
