

The background of the slide is a close-up photograph of several woven baskets. The baskets are made of natural fibers and feature vibrant, multi-colored patterns in shades of red, green, blue, yellow, and purple. The lighting is soft, highlighting the texture of the weaving.

# TOURISM INCLUSION FOR ALL (TIFA)

BY: CHARLOTTE KAZOORA

From: Uganda, East Africa

# Project Background

- TIFA is a company limited by guarantee that started its operations way back in 2015 through community development and skilling with the main objective of empowering people to create sustainable livelihoods. TIFA is also registered with as community based organization in Kalangala District. TIFA is independent, with no political or religious affiliations and the economic empowerment for the youth and women on the grassroots drives it.
- TIFA works closely with the poorest people along the tourism value chain to attain skills to help themselves and further links them to relevant market through its trading and development arm of business. Our underlying belief is that people benefit more from the opportunity to develop through their own efforts rather than simply relying on the donation of aid. Through our projects, we give people in need the initial means, knowledge and skills required to develop through their own efforts.

# Cow horn Products

*Office desk organizer*

*Forks, Teaspoons and table knives*

*Glasses frames*

# Cow skin Products
