Dear Sir,

First of all we wish to express our gratitude for your letter of August 20, 1998 and for your assistance to enhance accessing of patent information. We consider that GlobalPat is the most valuable source of patent information at present especially for such a small Office as we are.

We intended to acquire this product gradually, therefore the decision of the Secretariat to provide us with the backfile set free of charge was unexpected and extremely pleasant.

This collection is intended for use in our library for initial search by the Office examiners and will be stored in CDROM storage files. Later we intend to use all available CDROMs in Juke-Box systems. We do hope that the use of the set of GlobalPat will increase the quality of our work.

You are also informed that we are not an exchange partner of USPTO at present.

Thank you once more for contributing so much to our common matter.

Sincerely yours,

Tamara Charkviani  
Head of the Department  
for Patent Information and  
International Relations.

National Intellectual Property Centre(Georgia).
