Re: C.SCIT 2386 – GLOBALPat

Dear **Mr. Takagi**,

It was a great pleasure to us to read the Circular letter C.SCIT 2386 received from the International Bureau, in which the Secretariat offers a free-of-charge set of the backfile GLOBALPat. According to the Annex to this Circular letter we have already received a backfile set of the GLOBALPat CD-ROM and have very good experiences with it. We found GLOBALPat an excellent search tool, as it contains the bibliographic data including title and abstract and drawings of patents of all important countries arranged in IPC order in the period 1971–1996.

Now we use our set of GLOBALPat in the Public Patent Library. Unfortunately, as the Public Patent Library and the Office itself functions in separate buildings, it would be very useful if we could get another set for the Internal Patent Library for novelty search purposes.

Sincerely yours,

Mr. Csaba Czinkóczy
Head
Information Technologic Department
