Re. Circular C.SCIT 2386

Dear Sirs,

Thank you very much for adding the Polish Patent Office to the mailing list for GLOBALPAT on CD-ROM. The publications are very much welcome addition to our CD-ROM patent collections.

May we take this opportunity to apply for additional set of this valuable and useful database. The Polish Patent Office intention is to provide with this additional set one of our regional patent information centre -- very well organised and equipped, where the collection could be consulted at the place of this regional patent library. Patent information users would therefore consult the collection with no need to visit the main patent library, i.e. placed within the Polish Patent Office, Warsaw.

Moreover, the Polish Patent Office is strongly engaged in the awareness campaign targeted towards the patent information users. We organise seminars, conferences and presentations to name a few of the campaign tasks. CD-ROMs are often used to present data gathered in this format. As a result of this, the in-house collections are occasionally being broken up

We shall therefore appreciate very much your providing us with additional set of the database GLOBALPAT. It is also hoped that it will be possible for you to supply this to us either as a gift or on an exchange basis.

We hope that you will be able to meet this our request .

Yours faithfully,
Jacek Zawadzki, Head Acquisitions
for
Marianna Zaremba, Director Patent Literature Department
Patent Office of the Republic of Poland
