Subject: GLOBALPat

Dear Mr. Yo Takagi

With referenced to your letter Ref. No. C.SCIT 2386 dated August 20, 1998, I would like to inform you that I have waited for the GLOBALPat for long time, because my user always ask me that how he can search the UK patent information. As you know there is not index for searching the UK patent information but I try to search from the non-patent literature, for instant, Chemical Abstracts or other abstracting journals. Sometimes I can not help my user to find his subject. I think the GLOBALPat will be very useful for my user because there are patent information from the big Patent Offices and information of patent family which is also useful for my user too. I and my user will be very happy if you can send one complete set of GLOBALPat free-of-charge to the IP Library of Thai Intellectual Property Department. For the copy which under the exchange partners of the USPTO, I did not receive. If my office is going to receive in the future, it will be available for the patent examiner not for the publish user. I know that the patent information dissemination to publish is the main purpose of WIPO. In my case WIPO can disseminate patent information to the large group of publish.

I and my user are looking for your assistance and cooperation.

Yours sincerely,
Ms. Onsiree Nooprom
Head of IP Library
Department of Intellectual Property,
Thailand
