Dear Mr. Takagi,

Regarding the requests for granting the observer status within the Committee of Experts of the IPC Union and SCIT, from Elsevier Science and the Copyright group we inform you, that we support both of them.

The reason for supporting the first request is very obvious, since World Patent Information has been observer to the predecessor of SCIT, PCIPI.

The reason for supporting Copyright Group is based on our attitude to support the IPDL project and any third party that can contribute to IPDL and more general, WIPOnet and easy data access and dissemination.

Yours sincerely,
Liljana Varga
assistant director
