Re: Recommended Minimum Contents for Web Sites of Intellectual Property Offices

Mr. K.-P. Wittig
Deputy Director
Inter-Office Information Services Department

Sir,

The experts of the Office have studied the SCIT/WG/2/4 Document. The structure, format and content requirements for Web sites of Intellectual Property Offices are reasonable and will provide fast Web page load to an end user, quick finding a Web site while making search across Internet. Our test Web site, in principle, corresponds to the given document. But, unfortunately, without external financial support, our Office is not able to pay for Internet access through the authorized line to publish our Office Web site.

Sincerely yours,

R. T. Alchimbayeva
Deputy Director
National Patent Office
Republic of Kazakhstan
