World Intellectual Property Organization

Re SCIT 2469 – Information Technology Strategic Implementation Plan

November 1, 1999

Dear Mr. Wittig,

Perusing the highly complex Information Technology Strategic Implementation Plan and understanding the need of setting priorities the Hungarian Patent Office as a small IP office with fairly good information infrastructure and IP content provision supports the following projects:

In the field of Business Initiatives (IPO NOS)	In the field of Administrative Initiatives (IB NOS)
1. P9 – IPDL ¹ 2. P1 – Automated IPOs ² 3. P2 – Changeover Assistance ³	1. P3 – PCT Impact

- ¹ Comment on P9
The existing data asset either in paper or in electronic format should be made available on the network as soon as possible either on the side of the WIPO or on the side of the national offices.
- ² Comment on P1
SCIT objective a) “Narrow the information access gap that exists between developed and developing countries” is a very welcomed objective by our office.
- ³ Comment on P2
IPDL project requires guidance not only in CD-ROM medium but also in a networked environment.

(The answer refers to Figure 4. Global Network Concept – IB and IPO Functions and Relationships)

Sincerely yours,

Ágnes Vadász
