**** High Priority ****

After reviewed the draft of the SCIT IT Strategic Implementation Plan, we agree with WIPO s objectives and strategies to enhance the capability of WIPO and the Intellectual Property Offices. In particular, we are convinced in the necessity of technological development of all the Intellectual Property Office in order to improve the promotion of intellectual property rights, according to the challenges of the Information Age.

In that context, to select the "priority projects", we would like to suggest the criteria listed below:

1. The project must foster the development of a great numbers of Intellectual Property Offices in the short term.
2. The project must foster specific technical cooperation programs between Intellectual Property Offices.

We hope that our suggestions would help the SCIT in the allocations of financial resources.

Yours sincerely

Ernesto Franco
Manager
Human Resources and
Technical Cooperation Department
