PCT MINIMUM DOCUMENTATION

INVENTORY OF PATENT DOCUMENTS ACCORDING TO PCT RULE 34.1
(PERIOD FROM 1920 TO 1999)

Explanatory Notes

1. On the following pages is given the inventory of patent documents, covering the period January 1, 1920, to December 31, 1999, forming the PCT Minimum Documentation according to PCT Rule 34.1.
2. The different kinds of patent documents issued by each Office falling within the PCT Minimum Documentation according to PCT Rule 34.1 are arranged in the third column in the order in which patent documents were issued by that Office at various procedural steps. The letter code from WIPO Standard ST.16 that corresponds to each kind of those patent documents is given in the second column.
3. The fourth column gives the range of publication numbers of each kind of patent document issued by each Office. The fifth column gives the publication years of those documents. The sixth column of the inventory gives an indication of the total number of each kind of patent document issued. In some cases, the number of patent documents issued can only be estimated.
4. In the last column is given an indication of the nature of each series of patent documents issued; the indications have the following significance:
 - “a” indicates a series consisting of documents sequentially numbered as issued;
 - “b” indicates a series consisting of documents numbered at an earlier procedural step before issuance and therefore not sequentially numbered as issued, the series normally having many unused numbers;
 - “c” indicates that a list of unused numbers, or of the issued documents in the series, has been reported to the International Bureau.
5. The patent documents issued by Australia, Austria and Canada fall within the PCT Minimum Documentation by virtue of PCT Rule 34.1(c)(vi).
6. The total number of patent documents forming part of the PCT Minimum Documentation by the end of December 1999 is estimated at xx million (estimation by..... taking into account patent family data).
