Switzerland

Dear Ms. Frary,

The German Patent and Trademark Office has taken note document SCIT/RES/1 Rev. of the International Bureau as a first proposal to the restructuring of the SCIT and welcomes the made suggestions. The proposal of the IB delivers a basis for clear responsibilities and work sharing.

About funding of Member State participation on both the Standing Committee on Technical Standards and Documentation and the Advisory Group on Information Technologies we would like to have statements of the IB already in the second draft for planning our future participation in both the committees.

By order
Annelie Herz
German Patent and Trademark Office
