Looking at the table I think I have forgotten one line: The code E is used in AT for European Patents, for which AT was designated.

So in table 1, patents, can you please insert a line

Country: AT
Code: E
Related WIPO Std: ST.10/C, ST 13
Meaning/use: Series code associated with European Patents with designation AT
External exposure: Yes
Publication/Fora: AT Patent documents and related databases.
Date range: in use at present
Comments: Ex. AT E 148 577 T1; both Series code E and serial number are needed to uniquely identify an EP patent valid in AT. A publication document does only exist, if the original language of the EP Patent was English or French.

mit freundlichen Grüßen / kind regards / avec mes meilleurs sentiments
